***Sense it! Connect it! Bus it! Solve it!***

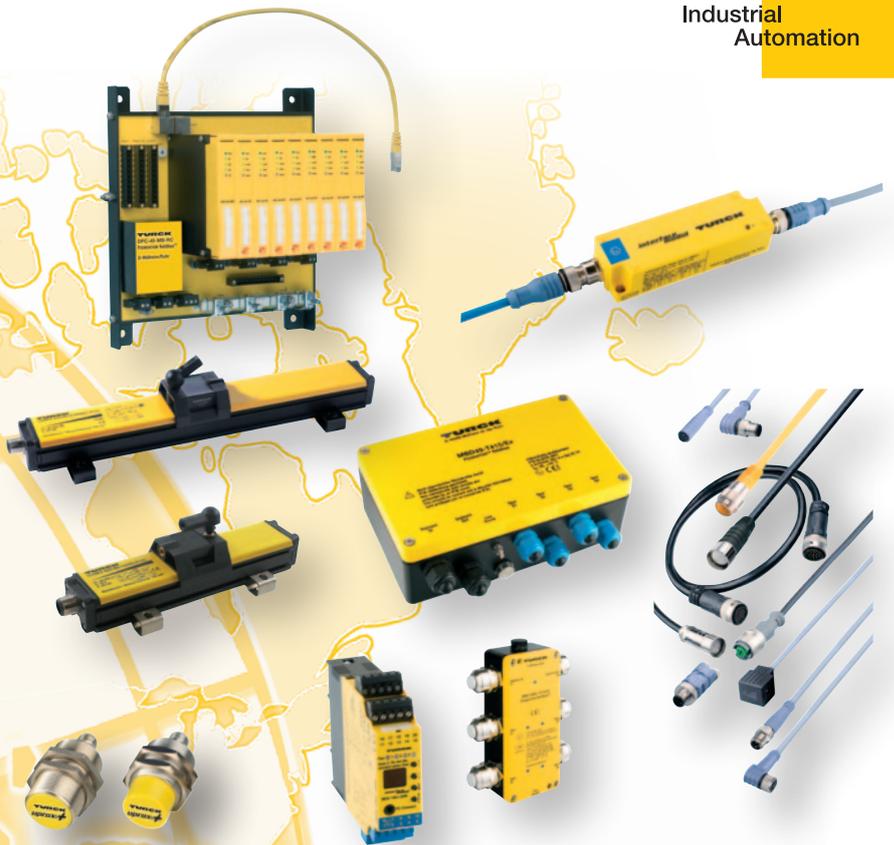

# The company

TURCK is one of the leading manufacturers in industrial automation. With more than 3.000 employees in 27 countries as well as sales partners in further 60 states, we are always close to you.

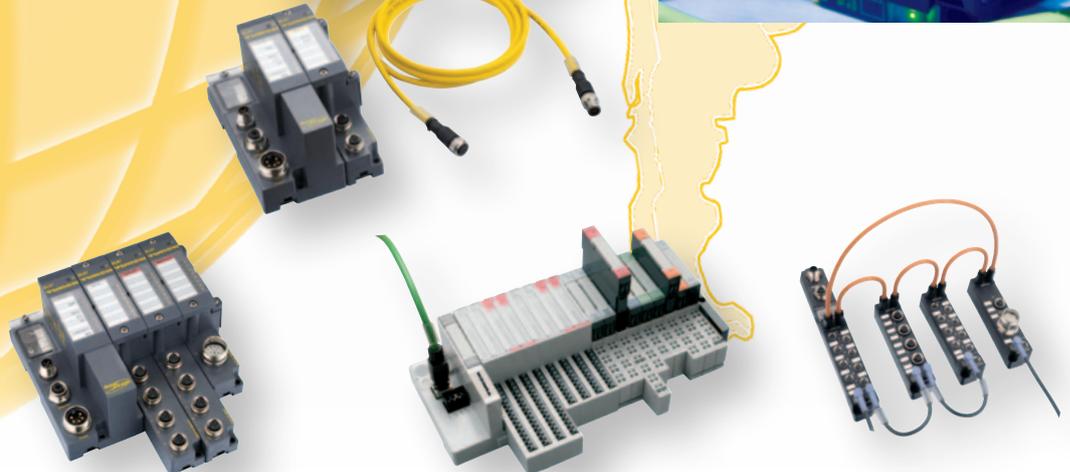

As a specialist in sensor, fieldbus, connection and interface technology and also human-machine interfaces (HMI) and RFID, we offer efficient solutions for factory and process automation. With our state-of-the-art production facilities in Germany, Switzerland, the USA, Mexico and China we, as a family-owned company, are able to react quickly and flexibly to the demands of local markets.

**The product portfolio**

Whether applied in machine and plant construction, in the sectors of automotive, transport and handling, food and beverage or in the chemical or pharmaceutical industry, TURCK automation solutions and products increase the availability and efficiency of your systems. Moreover, you also lower your costs for purchase, storage, installation and operational safety through effective standardization. We provide you with optimal solutions for your automation lines. This is possible thanks to the industry-specific know-how we have acquired in close co-operation with our customers and through electronics development and production on the highest level.

# Service & Support

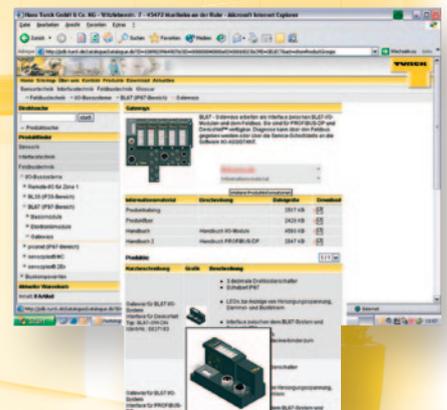

## Our service

Based on 50 years of experience and extensive know-how, we support our customers with efficient service, from a first analysis up to tailor-made solutions and commissioning of your application. We aim at enhancing the efficiency and productivity of your production processes and machines continuously. The excellent quality of our products combined with the support of our specialists and fast delivery service guarantees you high system availability.

## The product data base

Whether software tools for programming, configuration or commissioning support, our data sheets or CAD data are available in 80 export formats. Our website [www.turck.com](http://www.turck.com) helps you to find products and solutions fast, seven days a week, at any place worldwide and in nine different languages. You have access to nearly all products and solutions – clearly structured, completely documented and free for download.

# Modular I/O systems and compact I/O modules

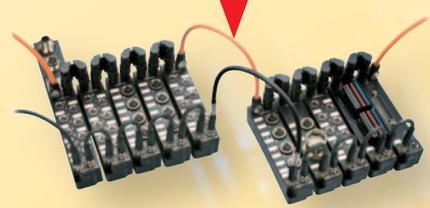

**Perfect connections** – no matter which fieldbus you use; TURCK provides you with a complete range of products:

- Modular and compact I/O systems in a variety of housing styles and IP-ratings
- Optimal support for planning, commissioning and service with the I/O-ASSISTANT software tool
- Decentralised intelligence with IEC 61131

**BL67**

# The *BL ident*<sup>®</sup> modular RFID system for HF/UHF operation

## Make use of the advantages!

*BL ident*<sup>®</sup> is an all-in-one RFID system designed for industrial applications. The I/O systems BL67 (field application), BL20 (cabinet mounting) and *BL compact* (field application) are the basic components of the modular concept. Whether deployed in production control, logistics or automation processes: Both technologies, interference immune HF (13.56 MHz, ISO 15693) and long range UHF (840...960 MHz, ISO 18000-6C/EPCglobal Class 1 Gen 2) are available in one identification solution, in *BL ident*<sup>®</sup>, the modular RFID system from TURCK.

Data carriers, read/write heads, connection technology and interfaces (gateway and RFID modules) can be combined to a customized *BL ident*<sup>®</sup> solution. You can choose from extremely fast and almost infinitely writable FRAM data carriers, but also from high-temperature versions for paint-spray lines. *BL ident*<sup>®</sup> can be integrated in existing system configurations via gateways which are available for all standard fieldbus protocols. The TURCK RFID system operates wear-free and contactless and is insensitive to dirt, water, oils and temperature fluctuations.

Make use of the new advantages for industrial applications with RFID solutions made by TURCK.

The *BL ident*<sup>®</sup> system guarantees significant potentials for cost-saving:

- Easy integration in the existing control world
- Efficient production and increased system availability
- The short period of amortisation and a quick ROI (Return on Investment) of the system are a considerable contribution to the success of your company.

*BL ident*<sup>®</sup> speeds up your production and increases efficiency:

- Fast FRAM technology (0.5 ms/Byte)
- Parallel processing of data with up to 16 channels per gateway
- Read and write "on the fly"

*BL ident*® offers maximum freedom and highest flexibility with respect to system integration. Your projects can thus be implemented quicker:

- Fully encapsulated, rugged HF read/write heads, rectangular and cylindrical design (M18, M30)
- UHF read/write heads designed for industrial use
- Robust IP69 tags
- Modular interfaces allow the integration of additional I/O modules
- Up to 50 m connection cable between read-write head and interface
- Extensive range of mounting accessories
- Multiple fieldbus interfaces such as PROFIBUS-DP, DeviceNet™, CANopen, EtherCAT®, EtherNet/IP™, Modbus TCP, and PROFINET IO, in IP20 and IP67
- Programmable gateways with decentralised pre-processing relieve the higher-level control and bus system

With the *BL ident*® technology, maintenance intervals can be extended, thus improving system availability:

- High safety level due to long data storage period (10 years if operated at prescribed temperature)
- EEPROM data carriers with 128 byte memory, FRAM data carriers of up to 8 kByte for high speeds and nearly unlimited write cycles
- Extremely resistant:  
The materials used for the read-write heads of the WD-series are resistant to all common acid and alkaline detergent and disinfectants. Problems caused by aggressive cleaning materials are thus reduced to a minimum.

Easy maintenance is a further contribution of the *BL ident*® system to safety and cost reduction:

- No down-times of the system due to the "Hot-Swapping" function
- Local display of the fieldbus diagnostics directly in the field by LEDs on the read-write heads and on the interface
- Connection to other fieldbuses is simply implemented by replacing the gateway – the remaining configuration is left unchanged
- Same mounting accessories as for inductive sensors – less mounting accessories are needed

# System description PROFIBUS-DP (Overview)

## PROFIBUS-DP

- Open fieldbus standard according to EN 50170
- Transmission medium:  
2-wire cable, twisted, shielded
- Transmission technology: RS485
- Bus topology: line structure with bus termination at both ends
- Bus access mode:  
Master-Slave/Master-Master with "Token Passing"
- 32 stations per segment, max. 126 stations.
- Repeater modules for signal regeneration
- Addressing via coding switches
- Configuration/parameterisation of devices via standardised device data base files (GSD files = Gerätstammdaten-Dateien)

PROFIBUS (**Process Field Bus**) is a standardised and open communication fieldbus. It complies with EN 50170 and consists of three different protocol profiles:

- PROFIBUS-FMS (Fieldbus Message Specification) is primarily designed for data exchange between program mable logic controllers (PLCs or PCs).
- PROFIBUS-DP (Decentral Periphery) is designed for fast data exchange between the central control and the remote field devices
- PROFIBUS-PA (Process Automation) is an intrinsically safe network for the process industry.

TURCK fieldbus components support PROFIBUS-DP. Within the PROFIBUS-DP network, the central control (e.g. the PLC) communicates with the remote input and output stations via a fast serial connection.

Data are exchanged cyclically between master and slave.

PROFIBUS-DP systems excel in their fast system response times. At a transmission rate of 12 Mbps, 512 bit input and 512 bit output data can be transferred, for instance, in less than 2 ms to 32 stations.

The system speed corresponds to the transmission rate set via the PROFIBUS master. The transmission speed is automatically detected by the TURCK PROFIBUS modules (auto baud).

The manufacturer provides device data base files (GSD files = Gerätstammdaten) for the individual PROFIBUS stations for configuration. TURCK additionally offers the I/O-ASSISTANT, a helpful software tool for configuration, parameterisation and set-up of the individual modules.

Transmission speed	Length of bus line (max.)	Max. numbers of repeaters <sup>1)</sup>	Max. numbers of stations
9,6...93,75 kbps	1200 m	2	126
187,5 kbps	1000 m	2	126
500 kbps	400 m	4	126
1500 kbps	200 m	6	126
3000...12000 kbps	100 m	9	126

<sup>1)</sup> At maximum transmission speed up to 9 repeaters of the TURCK series REP-DP 0002 can be connected in series (applicable to DP-profile bus parameters). If more repeaters are to be cascaded, the bus timing parameters must be adapted accordingly by the user.

Systemdaten PROFIBUS-DP	
Number of I/O stations	126 (incl. Repeater)
Number of I/O points	approx. 6000, depending on master
Transmission medium	shielded twisted copper cable, 2 × 0.34 mm <sup>2</sup>

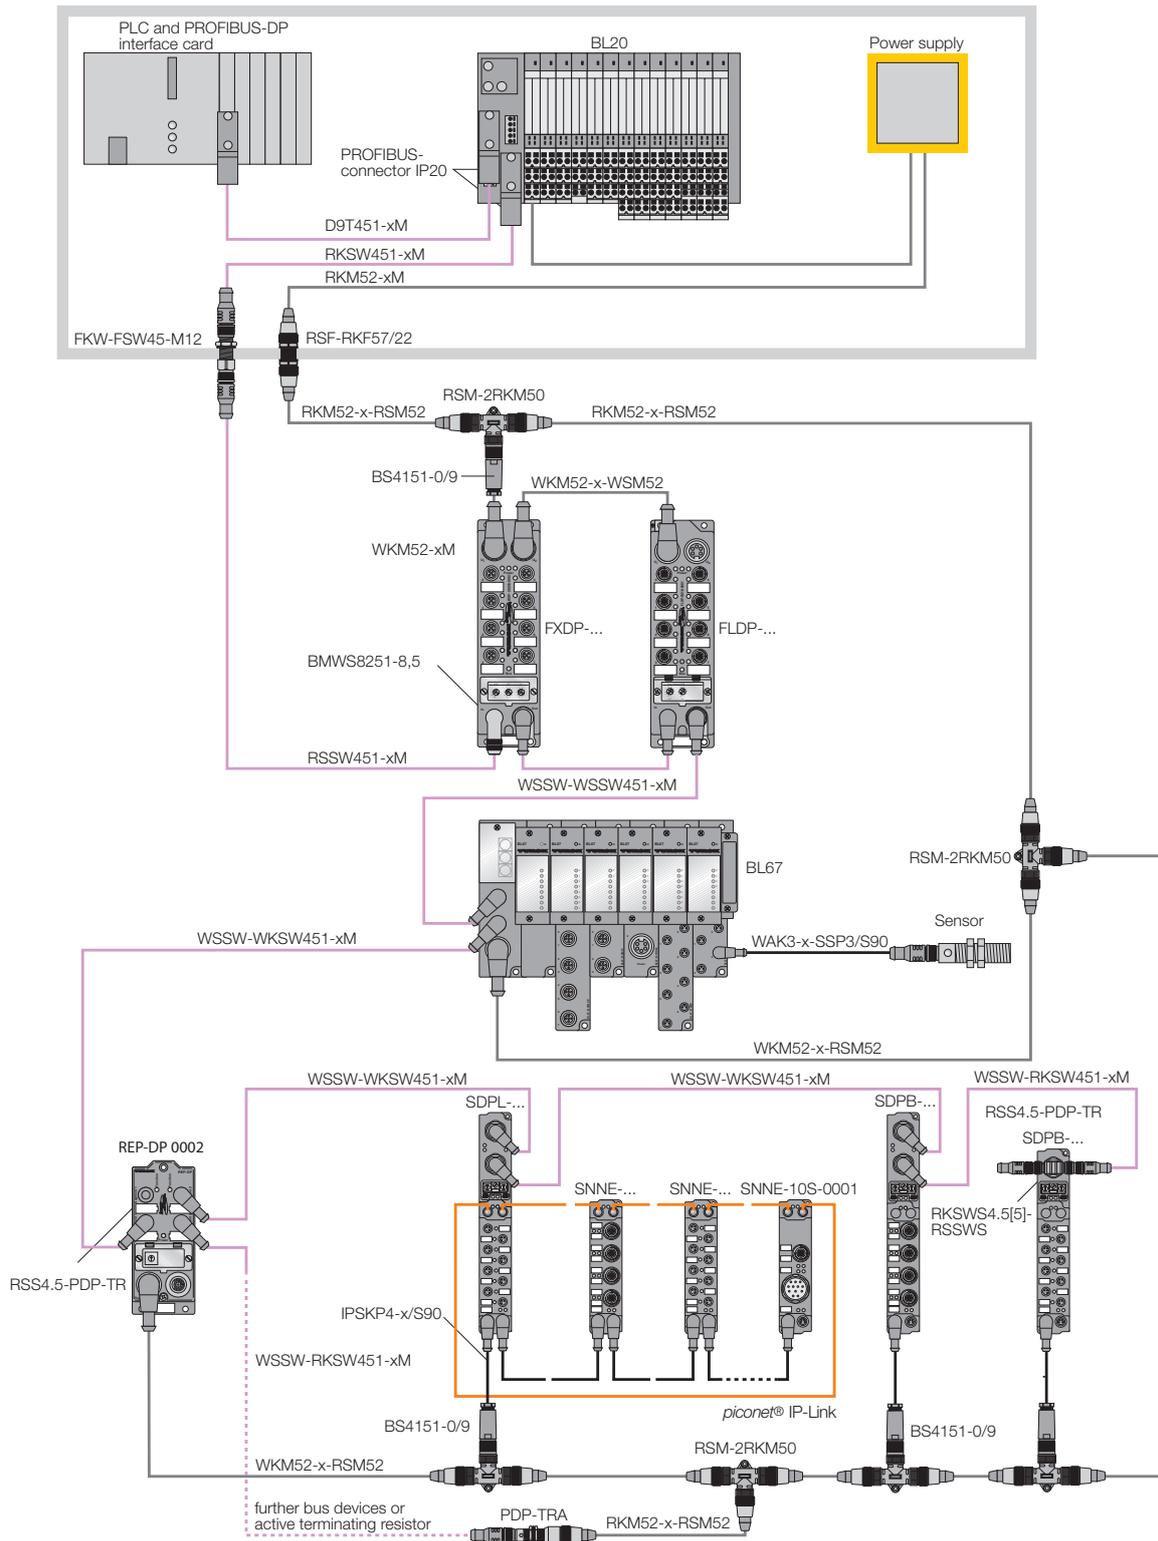

## Application example: TURCK fieldbus components for PROFIBUS-DP

The schematic representation below shows a PROFIBUS-DP network based on components offered by TURCK. In addition to BL67 fieldbus stations in IP67, TURCK offers further modular bus components in IP20 (BL20)

and IP67 (miniature *piconet*<sup>®</sup> modules and compact fieldbus stations) which are characterised by flexibility and a user-friendly set-up. Premoulded cables in various designs, as well as field-wireable connectors, feed-

through receptacles for cabinet mounting, flange connectors, T-pieces, terminating resistors and repeaters are available for network construction.

1

# System description DeviceNet™ (Overview)

## DeviceNet™

- Open fieldbus standard according to EN 50325
- Transmission medium:  
2-pair cable, twisted shielded, for data transmission and for power supply (24 volt)
- Transmission technology: CAN
- Bus topology: Line structure (bus termination at both ends) with drop lines
- Bus access mode: Multi-master system with CSMA/CA access mode, network-wide multi/broadcasting
- Use of repeaters in order to extend the length of the trunk and drop line
- Max. 64 nodes (incl. master)
- Addressing via coding switches
- Configuration/parameterisation of the devices via standardised EDS files (Electronic Data sheets)

DeviceNet™ is an open, standardised bus system according to EN 50325 and is based on the CAN specification (Controller Area Network). As a multimaster system DeviceNet™ provides the following I/O communication modes:

- Polling: the master module cyclically sends output data to all subordinate slaves and receives input data via the response message.
- Change of state: telegrams are not sent constantly, but only if the contents has changed, i.e. the process image/mapping is only transferred when it changes.
- Cyclic: the nodes automatically send data after a certain cycle time
- Strobed: the scanner requests input data via a broadcast message to all bus nodes.

TURCK fieldbus components support all these I/O communication modes. The bus length depends on the transmission speed (125, 250 or 500 kbps) as shown in the table below. Due to this especially efficient usage of the bus capacities, it is possible to achieve short response times, particularly in the change-of-state mode (despite relatively low data rates).

The manufacturer provides EDS files (EDS = Electronic Data Sheet) for configuration of the individual DeviceNet™ nodes. DeviceNet™ devices are parameterised via acyclic services (Explicit Messaging). TURCK additionally offers the I/O-ASSISTANT, a helpful software tool for configuration, parameterisation and set-up of the individual modules.

## DeviceNet™ – Transmission speed and bus lengths

Transmission speed	Bus lines – max. length				Drop lines – max. length		Number of nodes (max.)
	Flat Cable	Thick Cable	Mid Cable	Thin Cable	(per drop)	(total)	
125 kbps	420 m	500 m	300 m	100 m	6 m	156 m	64
250 kbps	200 m	250 m	250 m	100 m	6 m	78 m	64
500 Kbps	75 m	100 m	100 m	100 m	6 m	39 m	64

System data DeviceNet™	
Number of nodes	64 (incl. master)
Number of I/O points	depending on control system
Transmission medium	shielded twisted copper cable, at least 2 × 2 × 0.21 mm <sup>2</sup>
I/O communication modes	polling, change of State, cyclic, strobed

# System description CANopen (Overview)

## CANopen

- Open fieldbus standard according to EN 50325-4
- Transmission medium: 2-pair cable, twisted and shielded, for data transmission and for power supply (24 volt)
- Transmission technology: CAN
- Bus topology: Line structure (bus termination at both ends) with drop lines
- Bus access mode: Multi-master system with CSMA/CA access mode, network-wide multi/broadcasting
- Max. 127 nodes (incl. repeaters)
- Addressing via coding switches
- Use of repeaters in order to extend the length of the trunk and drop line
- Configuration/parameterisation of the devices via standardised EDS files (Electronic Data sheets)

The CAN user layer CANopen consists of device profiles, which standardise the data contents of the respective device categories, and of communication profiles. The communication profile determines the method of data exchange between the devices. In this context, one differentiates between real time data (process data objects – PDO) and parameter data (service data objects – SDO). CANopen defines different communication modes for the transmission of the process data (PDOs):

- Event-controlled: Messages are sent as soon as the content has changed.
- Therefore, the process image/mapping is not transferred permanently; only the changed signals are transmitted.
- Cyclic synchronous mode: The components are requested to accept the output data received and to send new input data via a SYNC telegram.
- Request-controlled: The components are triggered to send their input data via a CAN data request message.

CANopen devices are parameterised via SDOs. These are primarily used to transfer parameters during device configuration and to transmit longer data fields. Due to effective usage of the bus band-width CANopen offers short system response times despite a relatively low transmission speed (max. 1 Mbps).

The manufacturer provides EDS files (EDS = Electronic Data Sheet) for configuration of the individual CANopen nodes. TURCK additionally offers the I/O-ASSISTANT, a helpful software tool for configuration, parameterisation and set-up of the individual modules.

Transmission speed	Bus trunk line (max.)	Number of nodes (max.)
10 kbps	5000 m	127
20 kbps	2500 m	127
50 kbps	1000 m	127
125 kbps	500 m	127
250 kbps	250 m	127
500 kbps	100 m	127
800 kbps	50 m	127
1000 kbps	25 m	127

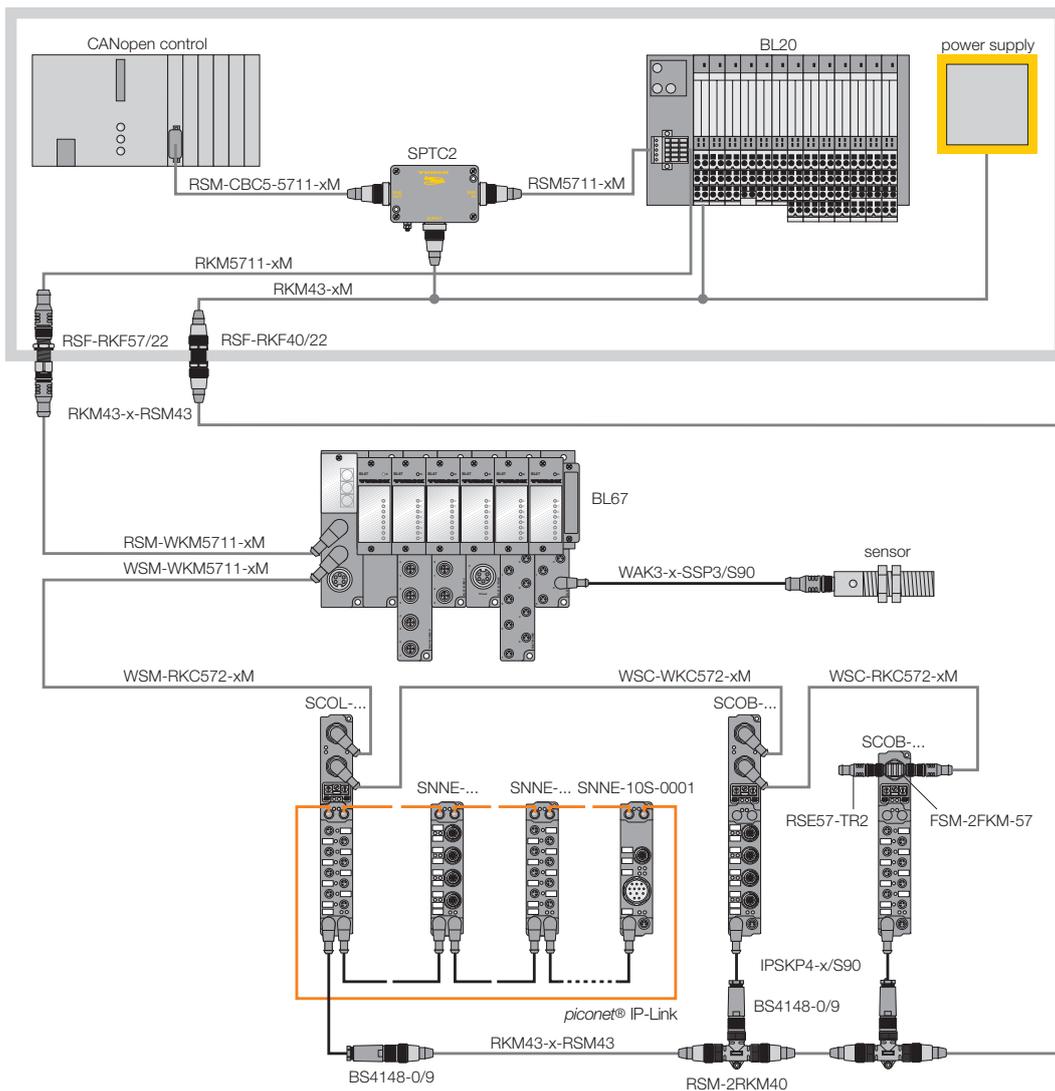

System data CANopen	
Number of I/O stations	127 (incl. Repeater)
Number of I/O points	depending on control system
Transmission medium	shielded twisted copper cable, at least 2 × 2 × 0.21 mm <sup>2</sup>

### Application example: TURCK fieldbus components for CANopen

The schematic representation below shows a CANopen network based on components offered by TURCK. In addition to BL67 fieldbus stations in IP67 TURCK offers further modular bus components for the IP20 (BL20) and the IP67 environment (miniature

*piconet*<sup>®</sup> modules and compact fieldbus stations) which are characterised by flexibility and user-friendly set-up. Premoulded cables in various designs, as well as field-wireable connectors, feed-

through receptacles for cabinet mounting, flange connectors, T-pieces, terminating resistors and repeaters are available for network construction.

# System description Ethernet (Overview)

## Ethernet

- Open fieldbus standard acc. to IEEE 802.3
- Transmission medium: 2 × 2 twisted-pair copper cable, shielded, category 3 (10 Mbps), category 5 (100 Mbps)
- Bus topology: star structure/tree structure
- Switches and hubs as junction points for connection of the Ethernet nodes
- Bus access mode: multi-master system with CSMA/CD access mode, network-wide multi/broadcasting
- Number of bus nodes theoretically unlimited
- Protocols: Modbus TCP, EtherNet/IP™ and PROFINET IO

The term Ethernet generally refers to the IEEE 802.3 specification. The modules are networked within a tree or star structure and are identified using a 6-byte, worldwide and unique identification code (MAC ID). The distance between two bus nodes may not exceed 100 m when using rigid cables. If flexible cables are used, the maximum length depends on the network construction.

Switches and hubs interconnect the Ethernet nodes and are thus the nodal points within the network. Hubs always send data to and receive data from all nodes, whereas switches feature a selective data transmission mode. Switches dynamically maintain a list with the IP addresses of all connected bus nodes. This ensures that data are only sent to the relevant target address. Data collisions are avoided and the network bandwidth is increased.

The original Ethernet protocol transfers the data frame from one to a single or several other nodes. The transmission mode does not include acknowledgement messages (handshake communication) and retransfer of lost data frames. The Internet Protocol (IP) handles segmenting, routing (path finding), searching and allocation of the permanent MAC-IDs.

Just like the Ethernet protocol, the IP does not ensure secure data transport. Data frames can get lost or be disrupted in their order.

Protocols such as TCP/IP, which ensure safe data transmission, are available. The Transmission Control Protocol (TCP) is based on the IP and is a connection-orientated transfer protocol, comprising error diagnostics and error handling mechanisms. This protocol ensures that lost telegrams are re-transmitted. Based on TCP, further protocols such as Modbus TCP, EtherNet/IP™ and PROFINET IO have been developed for applications involving industrial data communication.

### System data Ethernet

Number of I/O stations	only limited through IP address area
Number of I/O points	depending on control system
Transmission medium	2 × 2 twisted-pair copper cable, shielded, category 3 (10 Mbps), category 5 (100 Mbps)
Line length	max. 100 m distance between the modules

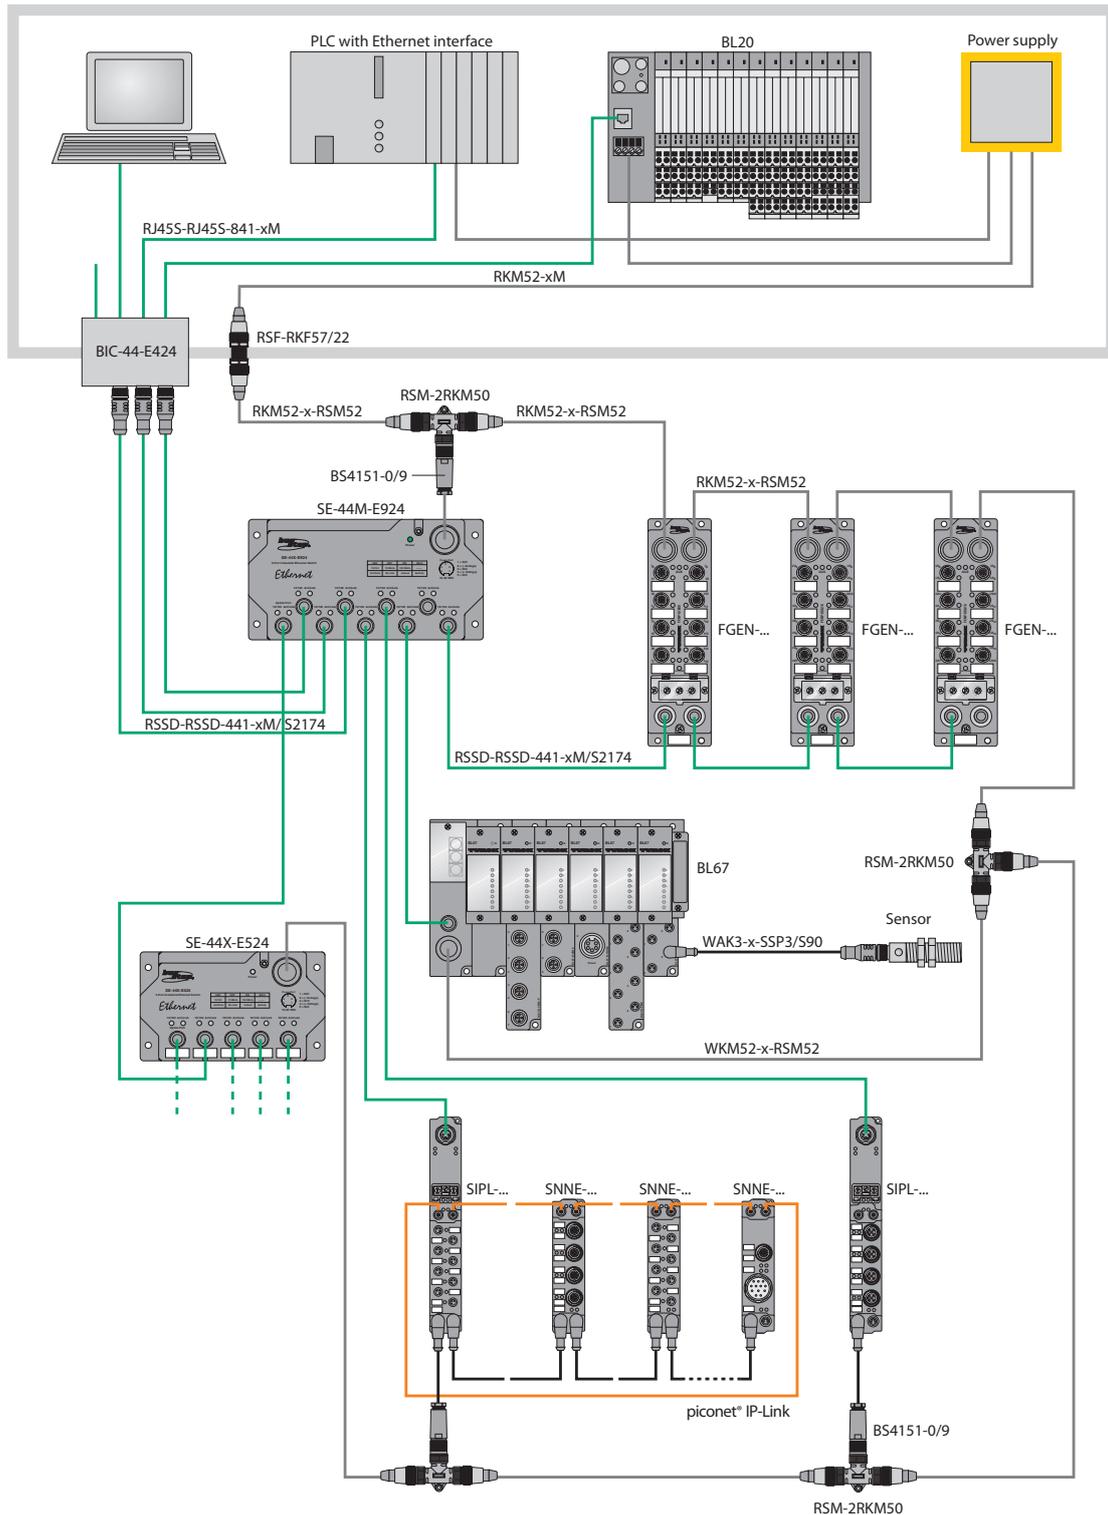

## Application example: TURCK-Fieldbus components for Ethernet

The schematic representation below shows an Ethernet network based on components offered by TURCK. In addition to BL67 fieldbus stations in IP67, TURCK offers fur-

ther modular bus components for the IP20 (BL20) and the IP67 environment (miniature *piconet*<sup>®</sup> modules and compact fieldbus stations) which are characterised by flexibility

and user-friendly set-up. Premoulded cables in various designs, as well as field-wireable connectors, feed-through receptacles for cabinet mounting.

1

# System description INTERBUS (Overview)

## INTERBUS

- Open fieldbus standard acc. to IEC 61158
- Transmission medium: multicore cable, 6-wire, twisted, shielded
- Transmission technology: RS485
- Bus topology: active ring, each node acts as a repeater
- Bus access mode: Master/slave system, defined telegram length, deterministic
- Max. 512 nodes
- Addressing: automatic addressing according to the physical order of the nodes within the system

INTERBUS is an open and standardised fieldbus system according to IEC 61158. The system always features a ring structure. All bus nodes are actively interconnected within a closed transmission path.

In contrast to other ring systems, the data forward and data return line of the INTERBUS system are routed in a single cable. The last node automatically terminates the ring.

Based on this construction, the physical appearance of a line or tree structure can be created. Several sub-systems for structuring the entire system can be branched off the main (trunk) line which exits the master. As a result, the bus system can be flexibly adapted to any application.

Bus access is based on the master/slave mode, in which data are sent from the master to the first node and then transferred sequentially from one node to the other. Due to its active coupling, each node functions as a repeater, which re-generates the signal.

Up to 512 nodes can be connected to the so-called "data highway". The distance between the individual nodes is specified with 400 m max., so that the total length of the "data highway" amounts to 12 km max. (copper cables).

The data transmission rate is 500 kbps. The cycle time depends on the user data volume of the respective system and increases linearly with the number of I/O points.

INTERBUS operates on the summation frame method. As the summation frame is always identical, the cycle time is also constant. Thus deterministic operation is ensured.

### Addressing

Data are allocated to the individual nodes automatically according to their physical order in the ring. It is thus not required to assign a bus address to each node via coding switches.

### Configuration

With INTERBUS, configuration is triggered via an identification cycle. Via this cycle the master automatically detects all connected devices. Identification is accomplished via an identification code which is stored in each node and a length code, containing the length of the data to be transferred.

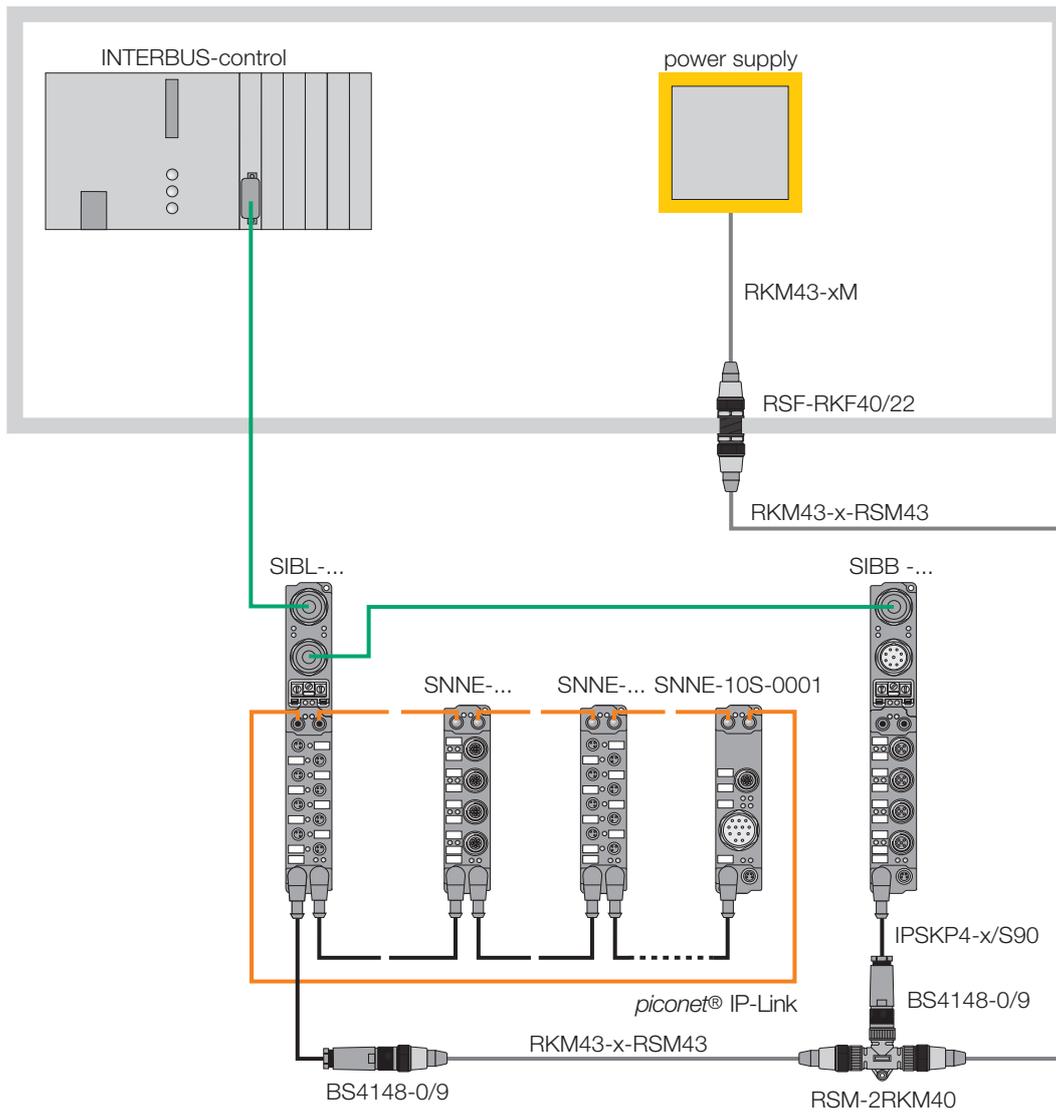

System data INTERBUS	
Number of I/O stations	depending on master (max. 512)
Number of I/O points	depending on master
Transmission medium	LiYCY 3 × 2 × 0.22 mm <sup>2</sup>
Line length	max. 400 m between the modules
Transmission speed	500 kbps
Transmission time	approx. 1 ms with 10 modules for each 32 bits inputs/outputs

piconet <sup>®</sup> modules		
	<b>for coupling modules, type SIBL-...</b>	<b>for stand-alone modules, type SIBB-...</b>
Number of extension modules, type SNNE-...	max. 120 with max. 64 bytes input- and 64 bytes output data	-
Digital periphery signals	max. 512 inputs and 512 outputs	according to I/O version
Analogue periphery signals	max. 28 inputs and 28 outputs	according to I/O version
Transmission speed	500 kbps	

INTERBUS bus connection		
1 × M23 male connector, 9-pole 1 × M23 female connector, 9-pole	<p>Fieldbus input (M23)</p>	<p>Fieldbus input (M23)</p>

# The BL67 I/O system – the modular I/O system in IP67

## Gateway: The system control

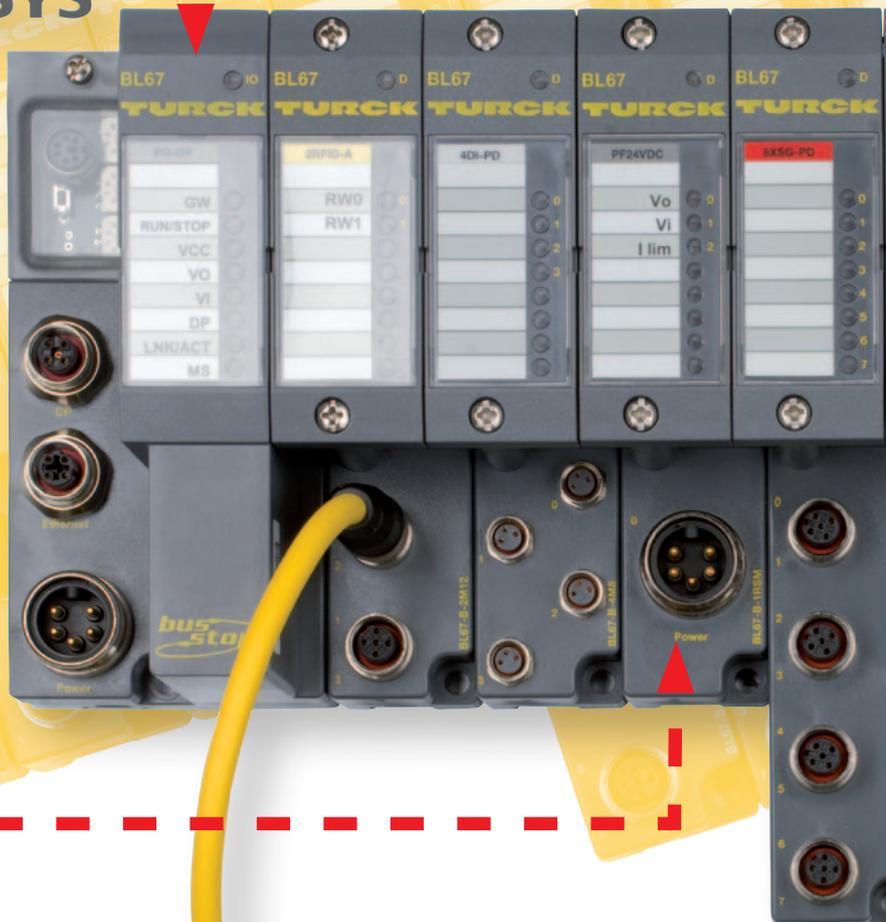

- The interface to the higher level control system
- Gateways for PROFIBUS-DP, CANopen, DeviceNet™, PROFINET IO, EtherNet/IP™ and Ethernet Modbus TCP

**CODESYS**

## Optional: CODESYS-programmable according to IEC 61131

- Relieves higher-level controller and bus system
- I/O modules independent of the fieldbus
- Prefabricated function blocks e.g. for the RFID *BL ident*® system and serial interfaces

## Power Feeding Module

- Power supply for the field, sensors and actuators
- Enables the creation of potential groups which can be switched on or off according to the requirements of the application

## Operation control with Pick-to-Light sensors

- Combined digital modules enable one input and one output per M12 connector
- Prefabricated standard M12 sensor cables

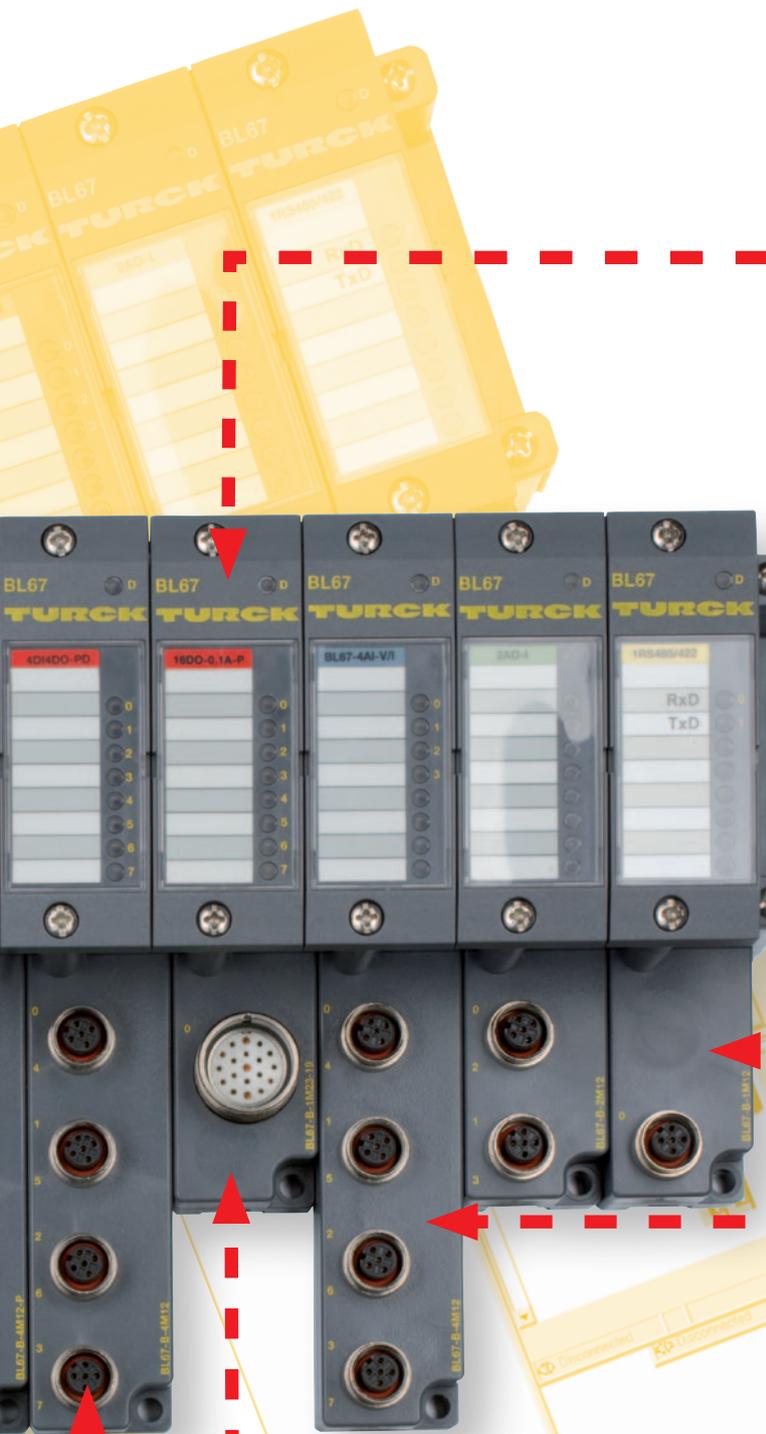

## *BL ident*® system

- The modular RFID system made by TURCK
- Modular extension, up to 8 channels
- Temperature range of the data carriers between -40 and +210 °C

**EtherNet/IP™**

**PROFI**  
INDUSTRIAL ETHERNET  
**NET**

**Modbus TCP**

**Elektronic modules**

- Digital, analog, temperature, RS232, SSI, CANopen interface and more
- Independent from the applied fieldbus
- Free choice of connection technology
- Available as 2, 4, 8 or 16-channel version
- Local diagnostics and status display via LEDs
- Hot-Swapping function

**Base modules**

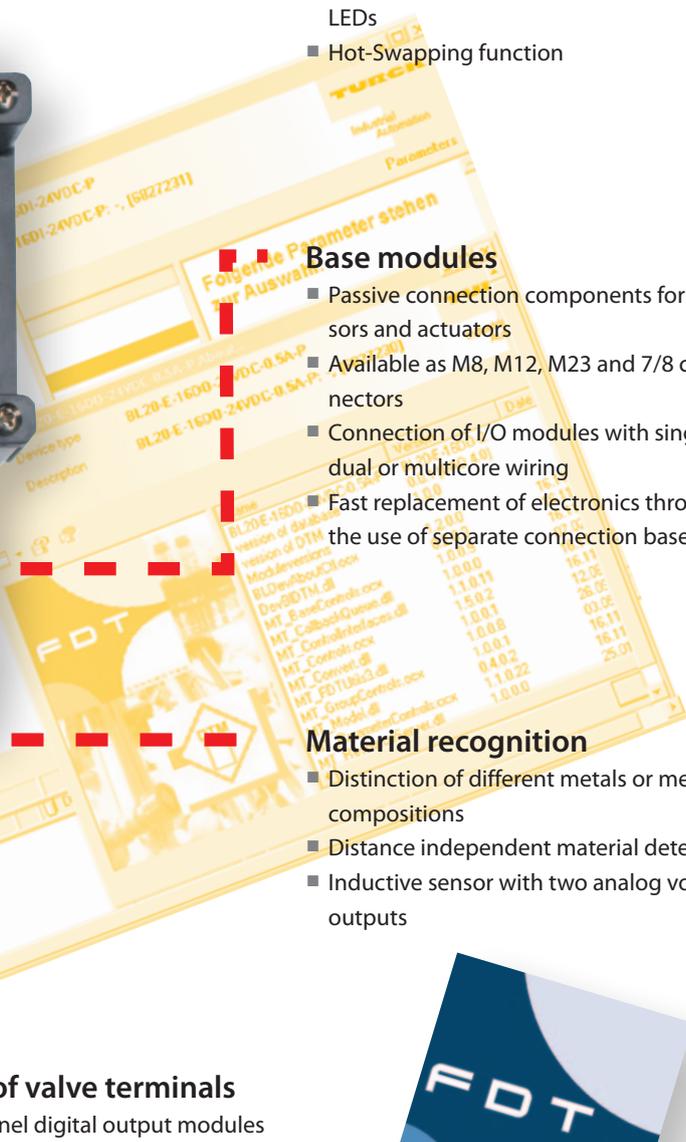

- Passive connection components for sensors and actuators
- Available as M8, M12, M23 and 7/8 connectors
- Connection of I/O modules with single, dual or multicore wiring
- Fast replacement of electronics through the use of separate connection bases

**Material recognition**

- Distinction of different metals or metallic compositions
- Distance independent material detection
- Inductive sensor with two analog voltage outputs

**Integration of valve terminals**

- 4, 8 or 16-channel digital output modules with M23 base modules for multipole valve terminals
- Up to 8 CANopen valve terminals with one CAN-valve interface connection module

**I/O-ASSISTANT**

- Planning, configuration, commissioning and diagnostic software
- Based on FDT/DTM technology
- Available as freeware on [www.turck.com](http://www.turck.com)

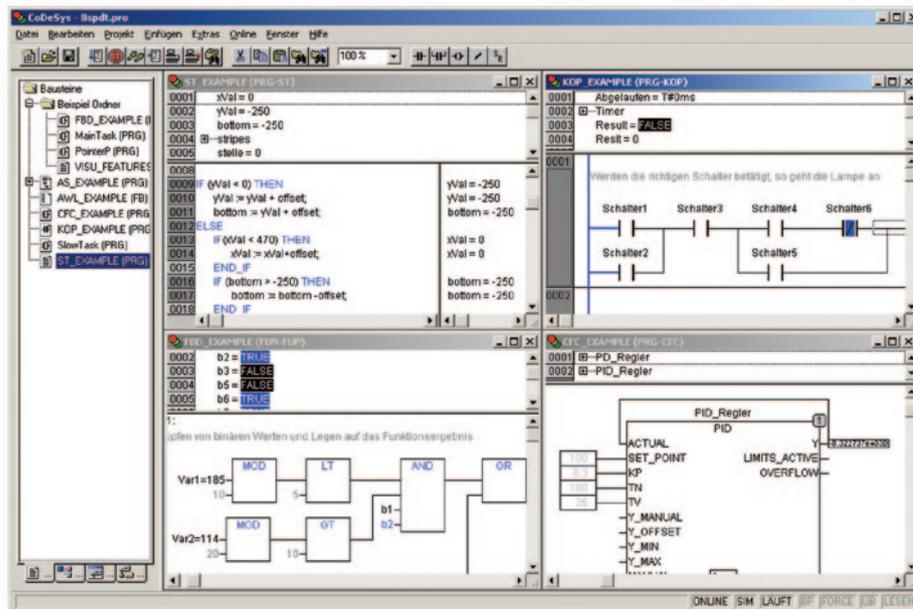

## Easy programming with CODESYS according to IEC 61131-3

The programmable gateways become decentral control units with the CODESYS programming software. The graphical programming interface supports all IEC 61131-3 programming languages

- Statement list (STL)
- Ladder Diagram (LD)
- Continuous Function Chart (CFC)
- Structured Text (ST)
- Sequential Function Chart (AS)

# CODESYS

### Simple connection

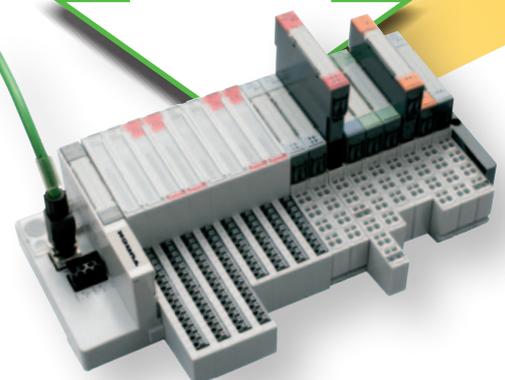

- Quick and simple connection of heterogeneous systems
- Standard transmission protocols such as e.g. TCP/IP and UDP/IP
- Network-global variables
- Bidirectional data exchange between CODESYS systems
- Additional programming is not required

### Project planning and configuration

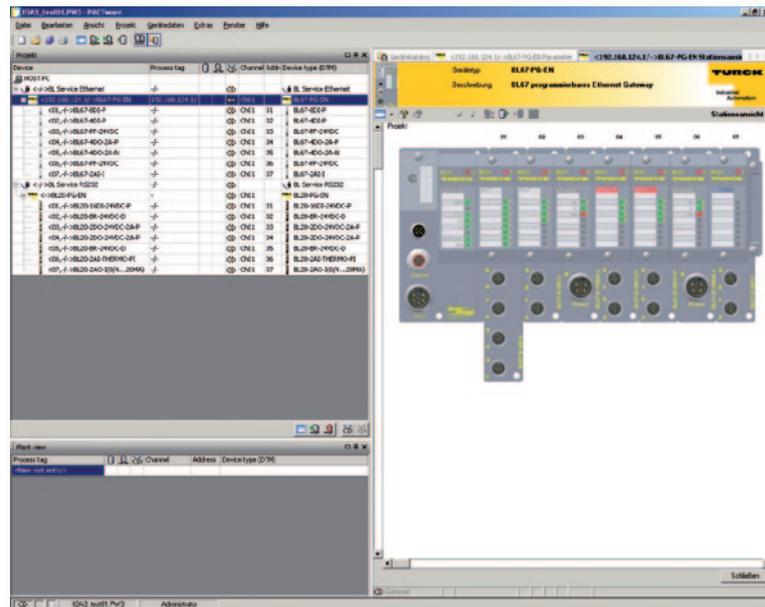

- Target-Support-Package as driver for the target system
- Drag and Drop function for the hardware configuration
- Standard editor for I/O configuration and parametrization
- Symbolic display of variables for I/O addresses
- Numerous diagnostics and commissioning functions
- Funktion blocks e. g. for the RFID system *BL ident®*

Data exchange via Ethernet

## Easy parametrization with I/O-ASSISTANT on the basis of FDT/DTM

- System configuration, parametrization and diagnostics with a graphical interface based on FDT/DTM technology
- DTMs can be integrated in any FDT frame application for configuration, commissioning and maintenance
- I/O-ASSISTANT and DTMs are available free of charge on [www.turck.com](http://www.turck.com)

## Description

The configuration software I/O-ASSISTANT supports you in planning and implementation of an I/O system. No matter if you are online or offline, the I/O-ASSISTANT simplifies the configuration as well as the configuration and parametrization of the modules.

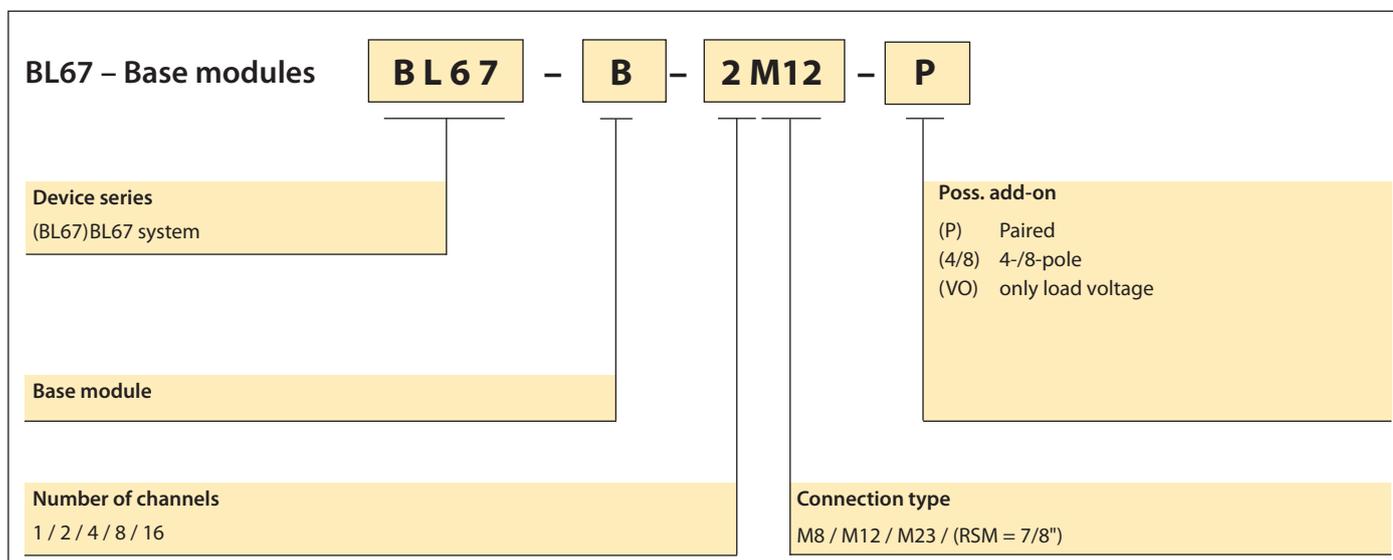

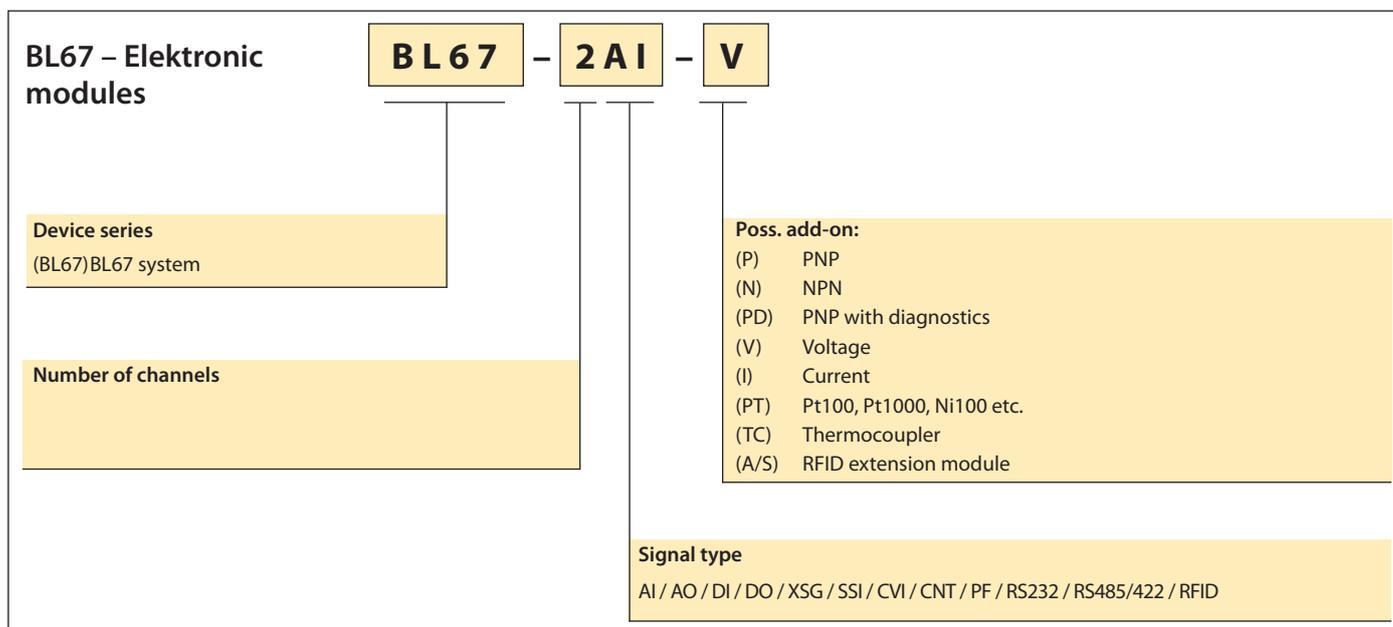

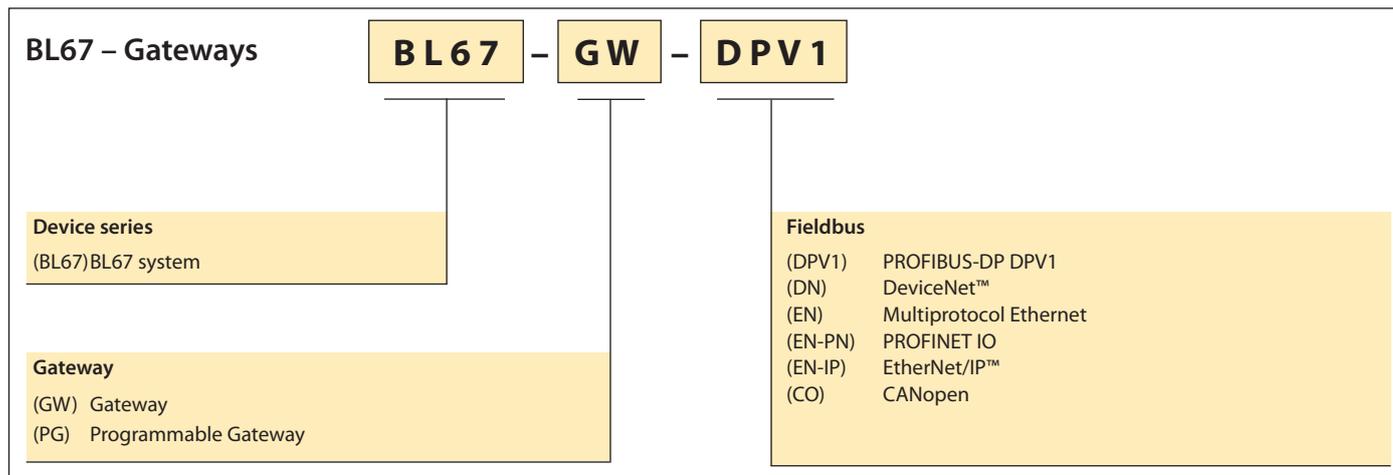

This software is also extremely helpful in system set-up and testing.

## Functions

- Supporting software tool
- Selection of the required modules
- Offline planning and configuration of BL67 modules
- Configuration, parametrization and commissioning of individual modules
- Reading and setting of process data
- Commissioning help for testing the wiring and sensors without PLC
- Realistic display of configured BL67 components
- Automatic documentation of configured BL67 systems

# BL67 – Maximum system extension/System supply

## Maximum system extension

The maximum number of modules for extension depends on the respective system configuration. As the maximum current consumption of the modulbus should not exceed 1.5 A, the number of modules is restricted (see table Nominal current consumption, p. 31). The use of modules with a high volume of process, parameter and diagnostic data might also impose restric-

tions to the extension of the system. The I/O-ASSISTANT takes these aspects into account and issues a warning message if appropriate.

A BL67 system can be extended to a total length of 1 m, comprising of a gateway for PROFIBUS-DP, DeviceNet™/CANopen or Ethernet and a maximum of 32 modules.

## Maximum system extension PROFIBUS-DP, DeviceNet™, CANopen

Module type	PROFI <sup>®</sup> BUS		DeviceNet™		CANopen

## System supply: General

The power supply for the BL67 system is either derived separately for PROFIBUS-DP and Ethernet gateways or directly from the DeviceNet™/CANopen cable for the DeviceNet™/CANopen gateway.

**Power-Feeding modules** can be inserted anywhere in the BL67 station. They provide isolated field voltage for the I/O modules mounted to their right. Thus Power-Feeding modules can also be used to create different potential groups.

## System supply via the module bus

The number of BL67 modules, which can be powered via the internal module bus, depends on the nominal current rating  $I_{MB}$  of the individual modules on the module bus. The total current consumption of the installed BL67 modules may not exceed 1.5 A.

When using the software I/O-ASSISTANT, the menu item <Station - Verify> will automatically generate an error message if the system supply via the module bus is not reliably ensured.

### Nominal current consumption

The following table shows the nominal current consumption  $I_{MB(5V)}$  of the various BL67 modules on the module bus, the resulting nominal current consumption  $I_{MB(24V)}$  of the modules via the 24 VDC supply and the nominal current consumption  $I_I$  or  $I_O$  of the modules via the supply:

Modules	Nom. current module bus $I_{MB(5V)}^{1)}$	Nom. current module bus $I_{MB(24V)}^{2)}$	$I_{ges.}^{5)}$	
			Nom. current input module $I_I^{3)}$	Nom. current Output module $I_O^{4)}$

## Dimensions and mounting holes

### Note:

Extended vibration resistance:

- Max. 5 g when mounted on non-perforated DIN rail acc. to EN 60715, with end brackets
- Max. 20 g when mounted on a base plate or directly on the machine.

At least the gateway and each second module has to be fixed with two screws.

**General technical data**

**BL67 general data**

Potential isolation	via opto-coupler
Ambient temperature	-25 (-40)... +70 °C ( possible function limitation of single modules < 0 °C or > 55 °C, see module description)
- Operating temperature	-25 up to +85 °C
- Storage temperature	5 up to 95 % (inside), level RH-2, no condensation (at 45 °C storage temperature)
Relative humidity	acc. to IEC 60068-2-42/43
Corrosive gas	10 ppm (rel. humidity < 75 %, no condensation)
- SO <sub>2</sub>	1.0 ppm (rel. humidity < 75 %, no condensation)
- H <sub>2</sub> S	according to EN 61131
Vibration resistance	yes
- 10 to 57 Hz, constant amplitude 0,075 mm, 1 g	yes
- 57 to 150 Hz, constant acceleration 1 g	frequency cycles with a change rate of 1 octave/min
- Vibration mode	20 frequency cycles per coordinate axis
- Vibration duration	(gateways VN 02-00)
Extended vibration resistance	mounting on non-perforated DIN rail acc. to EN 60715, with end brackets
- up to 5 g (between 10 and 150 Hz)	firm mounting on base plate or machine. Each second module has to be fixed with two screws.
- up to 20 g (between 10 and 150 Hz)	according to EN 61131
Application conditions	according to IEC 68-2-27, 18 shocks, semi-sinusoidal 15 g threshold/11 ms, each in ±-direction per space coordinate
Shock resistance	according to IEC 68-2-29, 1000 shocks, semi-sinusoidal 25 g threshold/6 ms, each in ±-direction per space coordinate
Repetitive shock resistance	according to IEC 68-2-31 and free fall according to IEC 68-2-32
Drop and topple	1.0 m
- Drop height (weight < 10 kg)	0.5 m
- Drop height (weight 10 to 40 kg)	7
- Test cycles	IP67
Protection degree	according to EN 61131-2/EN 50082-2 (Industrial)
Electromagnetic capability (EMC)	
- Static electricity according to EN 61000-4-2	8 kV
- Air discharge (direct)	4 kV
- Relay discharge (indirect)	PC-V0 (Lexan)
Housing material	
Approvals	CE
	cUL

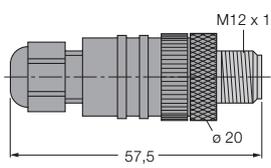

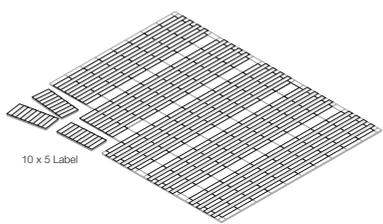

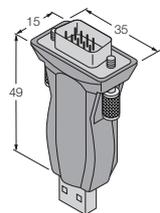

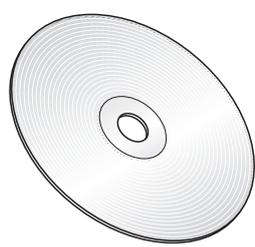

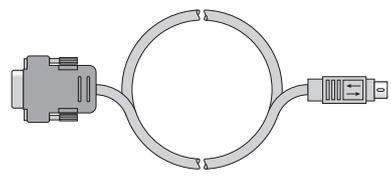

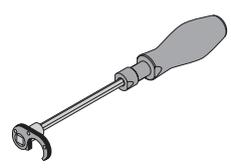

The I/O system BL67 does not require mounting in an extra housing. It was specially designed for harsh industrial environments and for direct mounting on the machine and in the process. The system is extremely robust and protected against dirt, dust and most liquids through its high degree of protection. However, it is not suited for the following applications: high pressure jet cleaning, 100% humidity, outdoor installation or permanent operation in liquids.

**Tightening torque BL67:**

- 0.8...1.0 nm for male M12 sensor connector
- 0.9...1.2 nm for base and electronic module screws

## User manuals

The user manuals for BL67 systems are only available as PDF file and can be downloaded on [www.turck.com](http://www.turck.com)

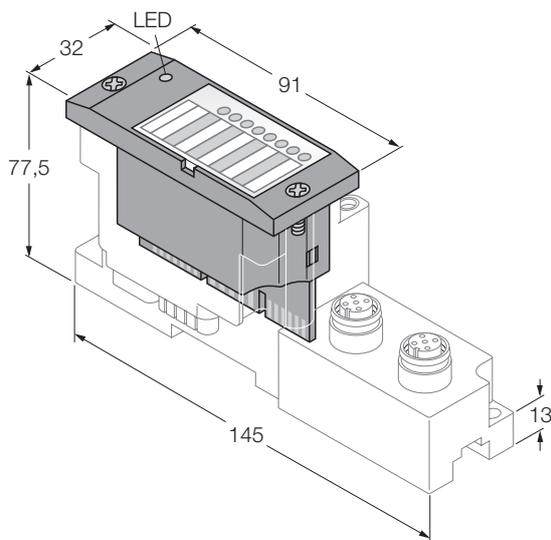

## Gateway

BL67 gateways are the heart of a BL67 station. They are designed to connect the modular fieldbus nodes to the higher level fieldbus (PROFIBUS-DP, DeviceNet™, CANopen, Ethernet).

All BL67 electronic modules communicate over the internal module bus with the gateway. The gateway structures the data and sends them clustered via fieldbus nodes to the higher control system. This way all I/O modules can be configured independently of the bus system.

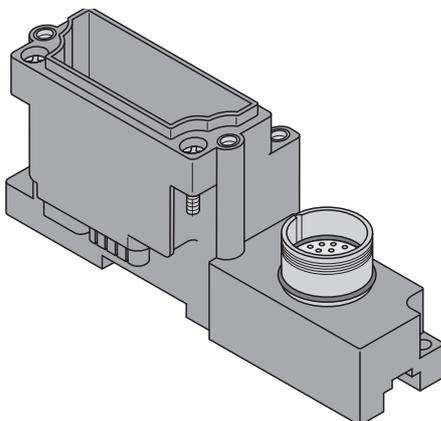

## Elektronik module

BL67 electronic modules are inserted into the passive base modules from above and then simply affixed with two screws. Maintenance is extremely simplified due to the separation of connection level and module electronics. Moreover, flexibility is enhanced because the base modules provide different types of connectors.

Voltage supply for the electronic modules is either provided via the gateway or a Power-Feeding module. Power-Feeding modules can be used to create galvanically isolated potential groups.

## Base module

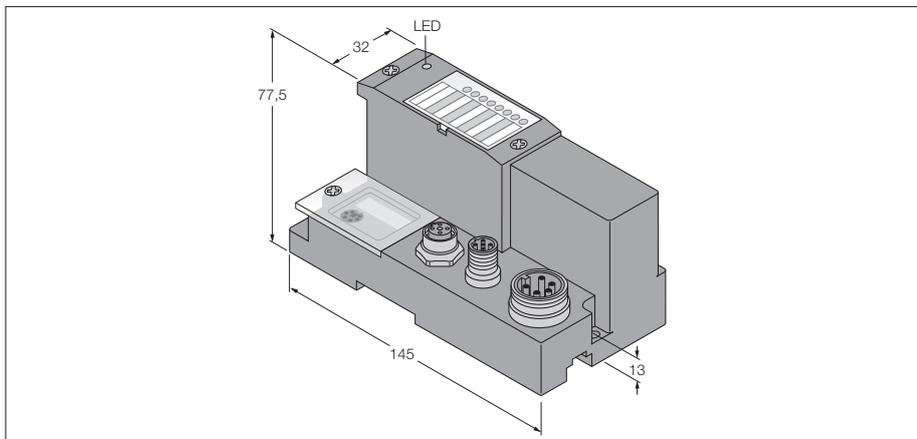

BL67 base modules are aligned one by one to the right of the gateway and are tightened each with two screws, either with the gateway or with the previous module. A DIN rail is not required. This way a compact and stable unit is created which can be mounted directly on the machine or on a DIN-rail.

The base modules serve for connection of the field devices and are available with different connection types (M8, M12, M23 und 7/8").

## Interface for PROFIBUS-DP

### BL67-GW-DPV1

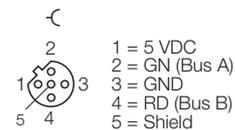

- 3 decimally coded rotary switches
- Degree of protection IP67
- LEDs for display of supply voltage, common alarm and bus errors
- Interface between the BL67 system and PROFIBUS-DPV0/DPV1
- 12 Mbps
- Two 5-pole reverse-keyed M12 × 1 connectors for fieldbus connection
- One 5-pole 7/8" connector for power connection

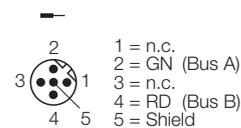

<b>Type</b>	BL67-GW-DPV1
<b>Ident-No.</b>	6827232
<b>Supply voltage</b>	24 VDC
Admissible range	18...30 VDC
Rated current from module bus	≤ 650 mA
max. system supply current $I_{mb(SV)}$	1.5 A
max. sensor supply $I_{sens}$	4 A electronically limited current supply
max. load current $I_o$	10 A
Voltage supply connection	5-pole male 7/8" connector
<b>Fieldbus transmission rate</b>	9.6 kbps up to 12 Mbps
Fieldbus addressing range	1...125
Fieldbus addressing	3 decimally coded rotary switches
Service interface	RS232 interface (PS/2 socket)
Fieldbus connection technology	2 x M12, 5-pole, inversely coded
Voltage supply connection	5-pole male 7/8" connector
Fieldbus connection	external
<b>Operating temperature</b>	-40...+70 °C
Function degrading operating temperature	
> 55 °C circulating air (ventilation)	no limitation
> 55 °C steady ambient air	$I_{sens} < 3A, I_{mb} < 1A$
<b>General technical data</b>	see page 35

# Multiprotocol interface for BL67

**TURCK**

Industrielle  
Automation

## Multiprotocol I/O systems: One device – Three Ethernet protocols

The devices marketed by TURCK under the concept of “multiprotocol”, share the same functionality:

- **Multiprotocol:**

The gateways as well as the compact I/O modules combine the three Ethernet protocols PROFINET IO, EtherNet/IP™ and Modbus TCP in one device

- **Line topology:**

All devices have a 3-port switch integrated, allowing a network to be arranged in line topology.

- **Prioritized start-up:**

A lean architecture and optimized Ethernet protocol stacks enable accelerated start-up. Thanks to these features, the devices support Fast Startup (FSU) in PROFINET IO or Quick Connect (QC) in EtherNet/IP™ applications.

## New TURCK multiprotocol platform

A TURCK multiprotocol device can be operated at a PROFINET IO, EtherNet/IP™ or a Modbus TCP system without having to be reprogrammed. After connecting the power, the integrated snooping functionality enables the device to identify the Ethernet protocol requesting for connection buildup during a predefined recognition phase. If one of the three protocols is identified, the device automatically selects this protocol and ignores the other two.

The implementation of the protocols leaves nothing to be desired: When operated as a PROFINET IO device it supports prioritized start-up, the media redundancy protocol (MRP), topology recognition as well as address allocation via Link Layer discovery Protocol (LLDP). Both, QuickConnect (QC) and Device Level Ring (DLR) are implemented in EtherNet/IP™.

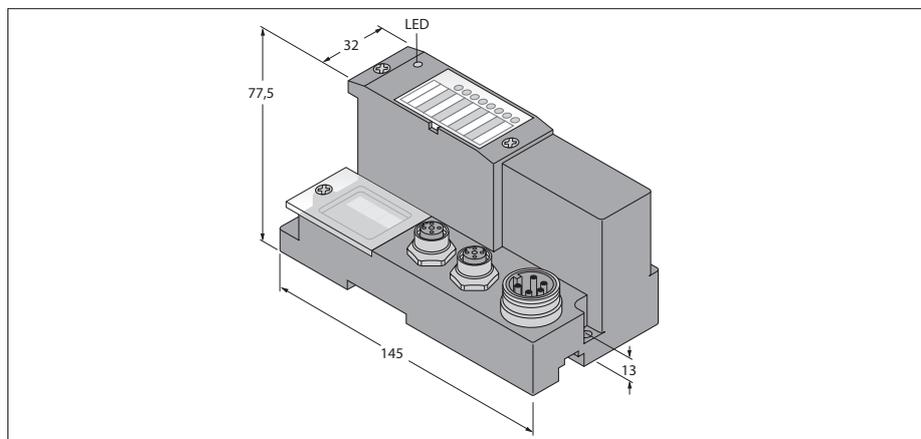

With the multiprotocol interface from TURCK, customers can now reduce the number of fieldbus variants considerably.

Multiprotocol I/O systems can thus be installed in machines and systems that are largely built with identical components but only need a customer specific control resp. master. Not only purchase and stock keeping of spare-parts profit from these obvious advantages, also electrical construction plans can just be duplicated.

# Gateway for BL67 I/O system

## Multiprotocol interface for Ethernet

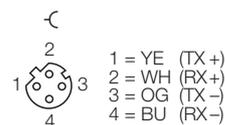

### BL67-GW-EN

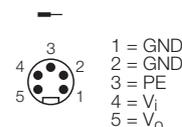

- 3 decimally coded rotary switches
- Degree of protection IP67
- LEDs for display of supply voltage, common alarm and bus errors
- Multi-protocol interface between the BL67 system and the Ethernet protocols Modbus TCP, EtherNet/IP™ and PROFINET IO (from VN 03-00)
- The EtherNet/IP™ protocol supports QuickConnect (QC)
- PROFINET IO supports fast start-up (FSU)
- Two 4-pole M12 connector, D coding, for fieldbus connection
- One 5-pole 7/8" connector for power connection

<b>Type</b>	BL67-GW-EN
<b>Ident-No.</b>	6827214
<b>Supply voltage</b>	24 VDC
Admissible range	18...30 VDC
Rated current from module bus	≤ 600 mA
max. system supply current $I_{mb(SV)}$	1.3 A
max. sensor supply $I_{sens}$	4 A electronically limited current supply
max. load current $I_o$	10 A
Voltage supply connection	5-pole male 7/8" connector
<b>System data</b>	
Transmission rate	10/100 Mbps; Full/Half Duplex; Auto Negotiation; Auto Crossing
Fieldbus connection technology	Two female M12 × 1 connector, 4-pole, D-coded
Protocol detection/changeover	automatic
Web server	in preparation
<b>Modbus TCP</b>	
Addressing	Static IP, BOOTP, DHCP
Supported function codes	FC1, FC2, FC3, FC4, FC5, FC6, FC15, FC16, FC23
Number of connections	6
<b>EtherNet/IP™</b>	
Addressing	acc. to EtherNet/IP™ specification
Quick Connect (QC)	< 150 ms
Device Level Ring (DLR)	supported
Number of connections	6
<b>PROFINET IO</b>	
	(available Q1/2013*)
Addressing	DCP
Conformance Class	B (RT)
MinCycleTime	1 ms
Fast Startup	< 150 ms
Diagnostics	acc. to PROFINET IO Alarm Handling
Topology detection	supported
Automatic addressing	supported
<b>Operating temperature</b>	
	-25...+70 °C
Function degrading operating temperature	
> 55 °C circulating air (ventilation)	no limitation
> 55 °C steady ambient air	$I_{sens} < 3A, I_{mb} < 1A$
<b>General technical data</b>	see page 35

\* The current device firmware supports Modbus TCP and EtherNet/IP™, the PROFINET IO protocol will be included in phase 2

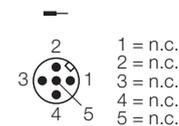

Gateway for BL67 I/O system  
Interface for PROFINET IO  
BL67-GW-EN-PN

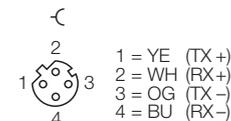

- 3 decimally coded rotary switches
- Degree of protection IP67
- LEDs for display of supply voltage, common alarm and bus errors
- Interface between BL67 system and PROFINET IO
- 10/100 Mbps
- One 4-pole M12 connector, D coding, for fieldbus connection
- One 5-pole 7/8" connector for power connection
- PROFINET RT

<b>Type</b>	BL67-GW-EN-PN
<b>Ident-No.</b>	6827228
<b>Supply voltage</b>	24 VDC
Admissible range	18...30 VDC
Rated current from module bus	≤ 600 mA
max. system supply current $I_{mb(5V)}$	1.3 A
max. sensor supply $I_{sens}$	4 A electronically limited current supply
max. load current $I_o$	10 A
Voltage supply connection	5-pole male 7/8" connector
<b>Fieldbus transmission rate</b>	10/100 Mbps
Fieldbus addressing	PROFINET IO conform, rotary switch, BOOTP, DHCP, IO-ASSISTANT
Service interface	RS232 interface (PS/2 socket)
Fieldbus connection technology	female M12 x 1 connector, 4-pole, D-coded
Voltage supply connection	5-pole male 7/8" connector
<b>Operating temperature</b>	-25...+70 °C
Function degrading operating temperature	
> 55 °C circulating air (ventilation)	no limitation
> 55 °C steady ambient air	$I_{sens} < 3A, I_{mb} < 1A$

# Gateway for BL67 I/O system

## AIDA gateway for PROFINET IO

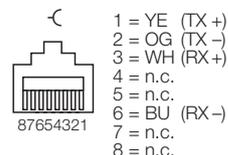

### BL67-GW-PN-AC

- LEDs for display of supply voltage, common alarm and bus errors
- Interface between the BL67 system and EtherNet/IP
- PROFINET IO supports fast start-up (FSU)
- Integrated switch 10/100 Mbps
- Two AIDA RJ45 (copper) fieldbus connections
- Two 5-pole AIDA power supply connectors
- Degree of protection IP67

<b>Type</b>	BL67-GW-PN-AC
<b>Ident-No.</b>	6827345
<b>Supply voltage</b>	24 VDC
Admissible range	18...30 VDC
Rated current from module bus	≤ 600 mA
max. system supply current $I_{mb(SV)}$	1.3 A
max. sensor supply $I_{sens}$	4 A electronically limited current supply
max. load current $I_o$	10 A
Voltage supply connection	2 × AIDA power, 5-pin
<b>System data</b>	
Transmission rate	10/100 Mbps; Full/Half Duplex; Auto Negotiation; Auto Crossing
Connection technology Ethernet	2 × AIDA Ethernet RJ45 (copper)
Protocol detection/changeover	automatic
Service interface	Mini USB
Web server	in preparation
<b>PROFINET IO</b>	
Addressing	DCP
Conformance Class	C (IRT)
MinCycleTime	1 ms
Fast Startup	< 150 ms
Diagnostics	acc. to PROFINET Alarm Handling
Topology detection	supported
Automatic addressing	supported
<b>Operating temperature</b>	-25...+70 °C
<b>General technical data</b>	see page 35

#### Voltage supply

# Programmable gateway for the BL67 I/O system

## Interface for PROFIBUS-DP (Slave)

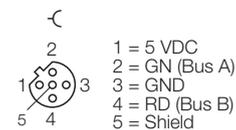

### BL67-PG-DP

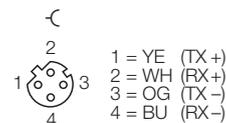

- Programmable acc.to IEC 61131-3 with CODESYS
- Ethernet and RS232 programmable interface
- 512 kByte program memory
- 32 Bit RISC processor
- < 1 ms for 1000 instructions
- Degree of protection IP67
- LEDs for display of supply voltage, common alarm and bus errors
- Interface for PROFIBUS-DP (Slave)
- 12 Mbps

<b>Type</b>	BL67-PG-DP
<b>Ident-No.</b>	6827240
<b>Supply voltage</b>	24 VDC
Admissible range	18...30 VDC
Rated current from module bus	≤ 600 mA
max. system supply current $I_{mb(5V)}$	1.3 A
max. sensor supply $I_{sens}$	4 A electronically limited current supply
max. load current $I_o$	10 A
Voltage supply connection	5-pole male 7/8" connector
<b>Fieldbus transmission rate</b>	9.6 kbps up to 12 Mbps
Fieldbus addressing range	1...125
Fieldbus addressing	Adjustment via CODESYS software
Service interface	RS232 interface (PS/2 socket)
Fieldbus connection technology	female M12 x 1 connector, 5-pole, reverse-keyed
Voltage supply connection	5-pole male 7/8" connector
Fieldbus connection	external
<b>PLC data</b>	
Programming	CODESYS V2.3
Released for CODESYS version	V 2.3.6.4
Programming languages	IEC 61131-3 (IL, LD, FBD, SFC, ST)
Application tasks	1
Number of POUs	1024
Programming interface	RS232 interface, Ethernet
Processor	RISC, 32 bit
Cycle time	< 1 ms for 1000 IL commands (without I/O cycle)
Program memory	512 kByte
Data memory	512 kByte
Input data	4 kByte
Output data	4 kByte
Non-volatile memory	16 kByte
<b>Operating temperature</b>	-25...+70 °C
Function degrading operating temperature	
> 55 °C circulating air (ventilation)	no limitation
> 55 °C steady ambient air	$I_{sens} < 3A, I_{mb} < 1A$

# BL67 electronic modules

## 8 digital inputs

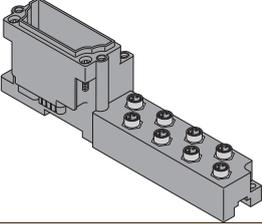

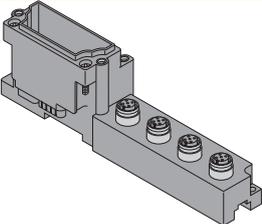

### BL67-8DI-PD

- Independent of the type of fieldbus and connection technology used
- Degree of protection IP67
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- 8 digital inputs, 24 VDC
- pnp
- Channel diagnostics
- Wire-break monitoring
- Selection of filter times
- Input inverting possible
- From version VN 01-06 and higher, the module supports accelerated run-up for applications with Fast Start-Up (FSU) and QuickConnect (QC)

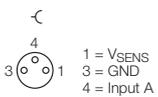

<b>Type</b>	BL67-8DI-PD
<b>Ident-No.</b>	6827205
<b>Number of channels</b>	8
Nominal voltage $V_i$	24 VDC
Rated current from field supply	$\leq 100$ mA
Rated current from module bus	$\leq 30$ mA
max. sensor supply $I_{senss}$	100 mA per channel, electronic short-circuit limiting
Power loss, typical	$\leq 1.5$ W
<b>Input type</b>	pnp
Type of input diagnostics	channel diagnostics
Low level signal voltage	$< 4.5$ V
High level signal voltage	7...30 V
Low level signal current	$< 1.5$ mA
High level signal current	2.1...3.7 mA
Input delay	0.25; 2.5 ms
Electrical isolation	electronics for the field level
<b>Number of diagnostic bits</b>	12
Number of parameter bytes	8
<b>Operating temperature</b>	-40...+70 °C
Function degrading operating temperature	
$< 0$ °C ambient temperature	Support for version VN 01-03 and higher, no limitation
$> 55$ °C circulating air (ventilation)	no limitation
$> 55$ °C steady ambient air	simultaneity factor 0.5
<b>General technical data</b>	see page 35

### BL67-4DO-4A-P

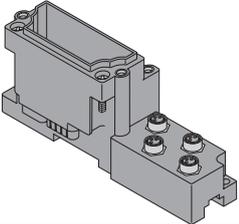

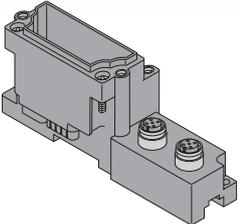

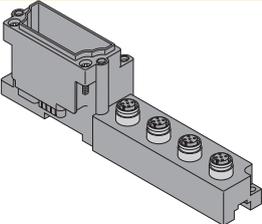

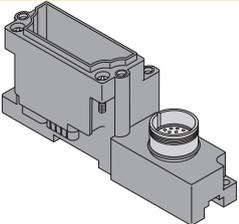

- Independent of the type of fieldbus and connection technology used
- Degree of protection IP67
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- 4 digital outputs, 24 VDC
- 4 A max.
- pnp
- From version VN 01-01 and higher, the module supports accelerated run-up for applications with Fast Start-Up (FSU) and QuickConnect (QC)

<b>Type</b>	BL67-4DO-4A-P
<b>Ident-No.</b>	6827308
<b>Number of channels</b>	4
Supply voltage	24 VDC
Nominal voltage $V_o$	24 VDC
Rated current from field supply	$\leq 100$ mA
Rated current from module bus	$\leq 30$ mA
max. sensor supply $I_{sens}$	4 A Electronically limited current supply via gateway or power feed
Max. load current $I_o$	10 A via gateway or power feed
Power loss, typical	$\leq 1.5$ W
<b>Output type</b>	pnp
Output voltage	24 VDC
Output current per channel	4.0 A
Output delay	3 ms
Load type	resistive, inductive, lamp load
Load resistance, resistive	$> 12 \Omega$
Load resistance, inductive	$< 1.2$ H
Lamp load	$< 10$ W
Switching frequency, resistive	$< 200$ Hz
Inductive switching frequency	$< 2$ Hz
Switching frequency, lamp load	$< 20$ Hz
Short-circuit protection	yes
Simultaneity factor	0.25
Electrical isolation	electronics for the field level
<b>Number of diagnostic bits</b>	4
<b>Operating temperature</b>	$-40 \dots +70$ °C
Function degrading operating temperature	
$< 0$ °C ambient temperature	support for version VN 01-03 and higher, no limitation
$> 55$ °C circulating air (Ventilation)	no limitation
$> 55$ °C steady ambient air	Simultaneity factor: 0.25 with 4 A, 0.5 with 3 A or 1.0 with 2 A

- Independent of the type of fieldbus and connection technology used
- Degree of protection IP67
- LEDs for status display
- Electronics galvanically isolated from the field level via opto-couplers
- 8 isolated relay outputs
- Potential-free electronic relay contact (MOSFET)
- 0.1 A max.

<b>Type</b>	BL67-8DO-R-NO
Ident-No.	6827277
<b>Number of channels</b>	8
Rated current from module bus	≤ 50 mA
Power loss, typical	≤ 2 W
<b>Output type</b>	Potential-free electronic relay contact (MOSFET)
Switching resistor	< 31 Ω
Output voltage	max. 50 V peak-peak voltage ( $U_{eff} \leq 50 \text{ VDC} / 17,6 \text{ VAC}$ )
Output current per channel	100 mA at 25 °C / 50 mA at 55 °C
Output delay	3 ms
Load type	resistive, TTL logic
Switching frequency, resistive	< 200 Hz
Short-circuit protection	no
Simultaneity factor	1
Electrical isolation	Electronics to the field level 250 VAC, channel to channel 50 VAC, channel to PE 100 VAC
<b>Operating temperature</b>	0...+55 °C
Function degrading operating temperature	
> 55 °C circulating air (ventilation)	max. 25 mA output current per channel
> 55 °C steady ambient air	max. 25 mA output current per channel

## 8 configurable digital channels

### BL67-8XSG-PD

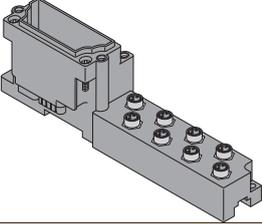

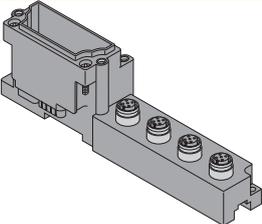

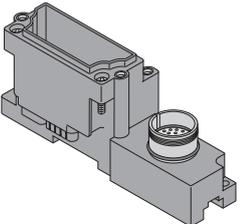

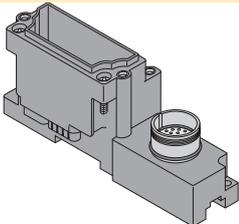

- Independent of the type of fieldbus and connection technology used
- Degree of protection IP67
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- 8 configurable digital channels
- 24 VDC, pnp
- 0.5 A max.
- Channel diagnostics
- Selection of filter times
- Input inverting possible
- From version VN 01-06 and higher, the module supports accelerated run-up for applications with Fast Start-Up (FSU) and QuickConnect (QC)

<b>Type</b>	BL67-8XSG-PD
<b>Ident-No.</b>	6827208
<b>Number of channels</b>	8
Nominal voltage $V_o$	24 VDC
Rated current from field supply	$\leq 100$ mA
Rated current from module bus	$\leq 30$ mA
max. sensor supply $I_{sens}$	100 mA for 2 channels ( $\Rightarrow$ e.g. per M12 slot), electronically limited current supply
Power loss, typical	$\leq 1.5$ W
<b>Input type</b>	pnp
Type of input diagnostics	channel diagnostics
Low level signal voltage	$< 4.5$ V
High level signal voltage	7...30 V
Low level signal current	$< 1.5$ mA
High level signal current	2.1...3.7 mA
Input delay	0.25; 2.5 ms
Electrical isolation	electronics for the field level
<b>Output type</b>	pnp
Output voltage	24 VDC
Output current per channel	0.5 A
Output delay	3 ms
Load type	resistive, inductive, lamp load
Load resistance, resistive	$> 48 \Omega$
Load resistance, inductive	$< 1.2$ H
Lamp load	$< 3$ W
Switching frequency, resistive	$< 200$ Hz
Inductive switching frequency	$< 2$ Hz
Switching frequency, lamp load	$< 20$ Hz
Simultaneity factor	1
Electrical isolation	electronics for the field level
<b>Number of diagnostic bits</b>	12
Number of parameter bytes	8
<b>Operating temperature</b>	-40...+70 °C
Function degrading operating temperature	
$< 0$ °C ambient temperature	support for version VN 01-03 and higher, no limitation
$> 55$ °C circulating air (ventilation)	no limitation
$> 55$ °C steady ambient air	simultaneity factor 0.5
<b>General technical data</b>	see page 35

#### Note

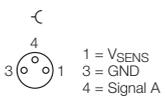

The inputs and outputs of the digital combi-module are supplied via a common GND. Therefore, we recommend not to use this module for safety or emergency stop applications. Otherwise, it must be ensured that  $V_I$  and  $V_O$  at the gateway or power feeding module are all-pole disabled.

Compatible base modules

<b>Type</b>	BL67-4AI-TC
<b>Ident-No.</b>	6827368
<b>Number of channels</b>	4
Nominal voltage $V_i$	24 VDC
Rated current from field supply	$\leq 30$ mA
Rated current from module bus	$\leq 35$ mA
Power loss, typical	$\leq 1$ W
<b>Inputs</b>	
Input type	types B, C, E, G, J, K, N, R, S, T
<b>Voltage resolution</b>	$\pm 50$ mV: $< 2$ $\mu$ V $\pm 100$ mV: $< 4$ $\mu$ V $\pm 500$ mV: $< 20$ $\mu$ V $\pm 1000$ mV: $< 50$ $\mu$ V
Basic fault limit at 23 °C	$< 0.2$ %
Repeatability	0.05 %
Temperature coefficient	$< 150$ ppm/°C of full scale
Resolution	16 Bit
Measured-value display	16 bit signed integer 12 bit full range left justified
<b>Number of diagnostic bytes</b>	4
Number of parameter bytes	4
<b>Operating temperature</b>	-40...+70 °C
<b>General technical data</b>	see page 35

- Independent of the type of fieldbus and connection technology used
- Degree of protection IP67
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- Transmission of serial data via RS232 interface
- For connection of different devices, such as printers, scanners or bar code readers

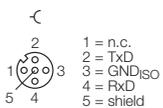

<b>Type</b>	BL67-1RS232
<b>Ident-No.</b>	6827181
<b>Number of channels</b>	1
Nominal voltage $V_i$	24 VDC
Rated current from field supply	≤ 50 mA
Rated current from module bus	≤ 140 mA
Power loss, typical	≤ 1 W
<b>Inputs / Outputs</b>	
Transmission level active (U RS1)	-15 to -3 VDC
Transmission level inactive (URSO)	3 to 15 VDC
Common-mode range (UGL)	-7 to 12 VDC
Transmission signals	RxD, TxD, RTS, CTS
Data buffer received	128 Byte
Send data buffer	64 Byte
Connection type	full duplex
Transmission rate	300 to 115200 bps
Parameter	transmission rate, diagnostics, data bits, stop bits, XON - character, XOFF - character, parity, flow control
Cable length	15 m
Electrical isolation	isolation of electronics and field level via opto-couplers
<b>Number of diagnostic bytes</b>	1
Number of parameter bytes	4
<b>Operating temperature</b>	-40...+70 °C

## Connection of SSI sensors

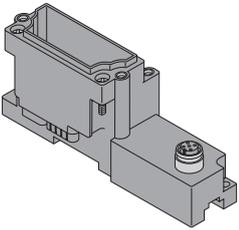

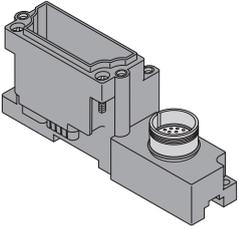

### BL67-1SSI

- Independent of the type of fieldbus and connection technology used
- Degree of protection IP67
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- Connection of SSI sensors
- Maximum bit transmission rate 1 MBit/s

<b>Type</b>	BL67-1SSI
<b>Ident-No.</b>	6827191
<b>Number of channels</b>	1
Nominal voltage $V_i$	24 VDC
Rated current from field supply	$\leq 50$ mA
Rated current from module bus	$\leq 50$ mA
Power loss, typical	$\leq 1$ W
<b>Inputs / Outputs</b>	
Transmission signals	CL, D
Connection type	4-wire full duplex (clock output/signal input)
Transmission rate	62.5 kbps up to 1 Mbps
Parameter	transmission rate, diagnostics, data format (binary / GRAY coded), data frame bits (1-32), number of invalid bits (LSB: 0-15, MSB 0-7)
Cable length	30 m
Electrical isolation	isolation of electronics and field level via opto-couplers
<b>Number of diagnostic bytes</b>	1
<b>Number of parameter bytes</b>	4
<b>Operating temperature</b>	-40...+70 °C
<b>General technical data</b>	see page 35

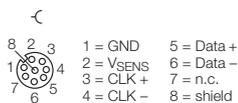

Compatible base modules

## BL67 electronic modules

### Detection of standard counting signals

#### BL67-1CNT/ENC

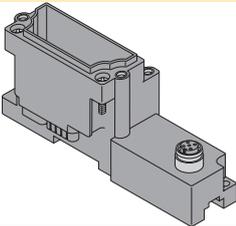

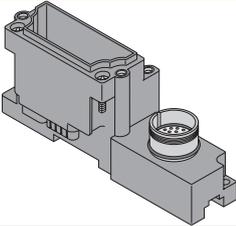

- Independent of the type of fieldbus and connection technology used
- Degree of protection IP67
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- Detection of standard counting signals
- 5 VDC differential
- 5... 24 VDC single ended
- 2 digital inputs, 24 VDC
- 2 digital outputs, 24 VDC, 0.5 A
- 2 more digital channels, configurable 24 VDC, 0.5 A

<b>Type</b>	BL67-1CNT/ENC
<b>Ident-No.</b>	6827224
<b>Number of channels</b>	1
Nominal voltage $V_i$	24 VDC
Rated current from field supply	$\leq 100$ mA
Rated current from module bus	$\leq 50$ mA
Power loss, typical	$\leq 1.2$ W
<b>Inputs / Outputs</b>	
Electrical isolation	isolation of electronics and field level via opto-couplers
<b>Input type</b>	pnp
Low level signal voltage	$< 5$ V
High level signal voltage	7...30 V
High level signal current	max. 5 mA
Connection technology	M12, M23
<b>Output type</b>	pnp
Output voltage	24 VDC
Output current per channel	0.5 A
Output delay	0.2 ms
Load type	resistive, inductive, lamp load
Lamp load	$< 10$ W
Switching frequency, resistive	$< 100$ Hz
Inductive switching frequency	$< 2$ Hz
Switching frequency, lamp load	$< 10$ Hz
Short-circuit protection	yes
Simultaneity factor	1
<b>Measuring ranges</b>	
Frequency measurement	up to 250 kHz
Speed measurement	factor parameterisable
Period duration measurement	Resolution 200 ns, max. period duration $(2^{32}-1) \times 200$ ns
Upper count limit	0x80000000 up to 0xFFFFFFFF
Lower count limit	0x80000000 up to 0xFFFFFFFF
<b>Operating temperature</b>	-40...+70 °C
<b>General technical data</b>	see page 35

**BL67 electronic modules**  
**Connection of CANopen nodes**  
**BL67-1CVI**

- Independent of the type of fieldbus and connection technology used
- Degree of protection IP67
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- 8 byte I/O process data per CVI module
- Connection of up to 8 CANopen nodes
- max. 4 byte I/O data per node
- max. transmission rate 1 MBit/s

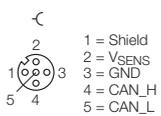

<b>Type</b>	BL67-1CVI
<b>Ident-No.</b>	6827223
<b>Number of channels</b>	1
Nominal voltage $V_i$	24 VDC
Rated current from field supply	$\leq 100$ mA
Rated current from module bus	$\leq 30$ mA
max. sensor supply $I_{sens}$	1 A electronically limited current supply
Power loss, typical	$\leq 1$ W
<b>Inputs / Outputs</b>	
Transmission signals	CAN high, CAN low
Connection type	CANopen
Transmission rate	10 kbps up to 1 Mbps
Parameter	transmission rate, diagnostics, bus termination, range of I/O data
Bus termination	internal
Electrical isolation	isolation of electronics and field level via opto-couplers
<b>Number of diagnostic bytes</b>	6
<b>Number of parameter bytes</b>	16
<b>Operating temperature</b>	-40...+70 °C
<b>General technical data</b>	see page 35

## RFID system

### Interface for connection of *BL ident*<sup>®</sup> write-read heads (HF/UHF)

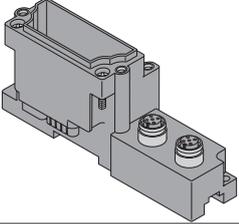

#### BL67-2RFID-A

- This module is used in conjunction with the BL67-GW-DPV1
- Degree of protection IP67
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- Connection of 2 *BL ident*<sup>®</sup> write-read heads
- Mixed operation of HF and UHF read/write heads
- Transmission rate: 115.2 kbps
- Cable length: 50 m maximum

<b>Type</b>	BL67-2RFID-A
<b>Ident-No.</b>	6827225
<b>Number of channels</b>	2
Nominal voltage $V_i$	24 VDC
Rated current from field supply	$\leq 100$ mA
Rated current from module bus	$\leq 30$ mA
Power loss, typical	$\leq 1$ W
<b>Inputs / Outputs</b>	
Transmission rate	115.2 kbps
Cable length	50 m
Electrical isolation	isolation of electronics and field level via opto-couplers
<b>Connection technology</b>	M12
<b>Simultaneity factor</b>	1
<b>Sensor supply</b>	0.5 A per channel, short-circuit proof
<b>Number of diagnostic bytes</b>	4
Number of parameter bytes	8
Number of input bytes	4
Number of output bytes	4
<b>Operating temperature</b>	-40...+70 °C

# The *piconet*® I/O system – in miniature housings for highest industrial requirements

## *piconet*® – Coupling modules

- As interface to the higher level control system
- Gateway between PROFIBUS-DP, CANopen, DeviceNet™, INTERBUS, EtherNet/IP™, Modbus TCP, PROFINET IO and fiber-optic cable based Sub-Bus „IP-Link“
- Coupling modules connect the higher level open fieldbus and the economical extension modules.
- Fiber-optic subnet (IP-Link) for connection of up to 120 extension modules per coupling module
- High-speed transmission, 1000 I/Os in approx. 1 ms via prefabricated and interference-free fiber-optic cables.
- Fiber-optic cable length up to 15 m

Bus addressing switch and service interface to I/O-ASSISTANT software

Bus LEDs

Module/ IP-Link LEDs

## Compact and robust housing

- Only 26.5 mm high, 30 mm wide and 210, 175 or 126 mm long
- Fully encapsulated IP67 housing
- Suited for direct use on the machine
- Ideally suited for special or serial machine engineering as well as for various field applications

## *piconet*®-Stand-alone module

- Stand-alone modules connect the integrated I/Os directly with the open fieldbus, e.g. PROFIBUS-DP, CANopen, DeviceNet™, INTERBUS, Modbus TCP, EtherNet/IP™ and PROFINET IO

## A secure connection

- Prefabricated bus, fiber optic, power and I/O cables
- Field-wireable connectors
- Additional networking components such as T-pieces, terminating resistors etc.

**PROFI**  
PROCESS FIELD BUS  
**BUS**

**DeviceNet™**

**CANopen**

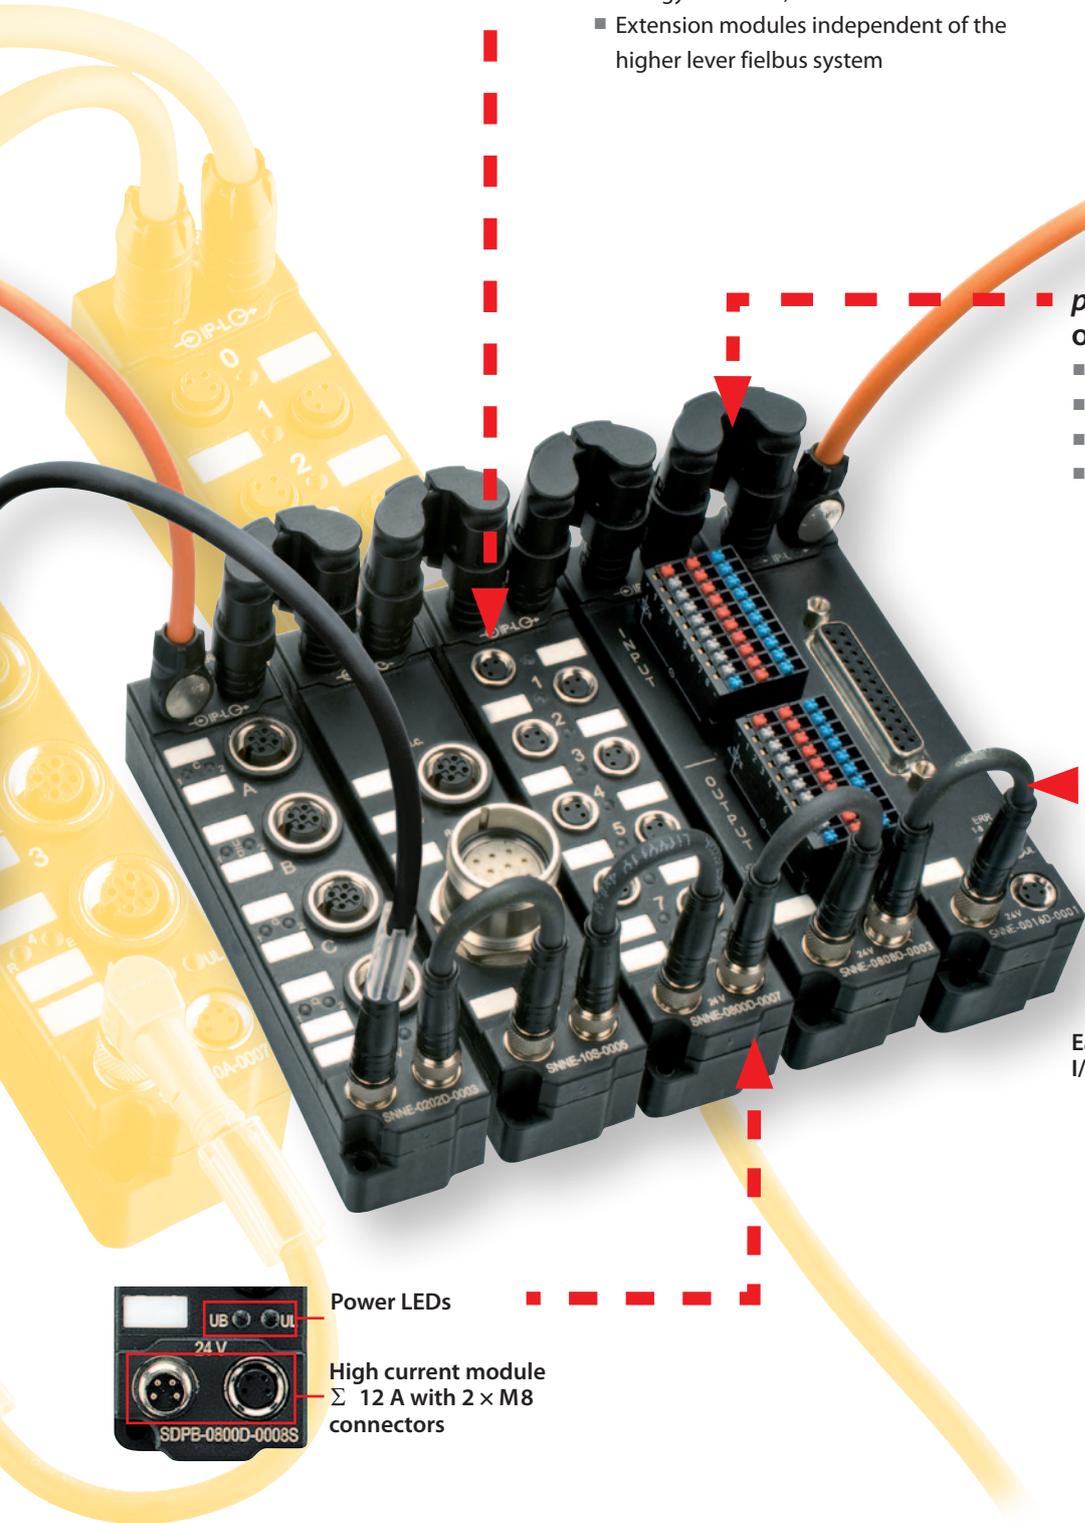

■ **piconet® - Extension modules**

- Flexible and tested I/O connection technology in M8 × 1, M12 × 1 and M23 × 1
- Extension modules independent of the higher level fieldbus system

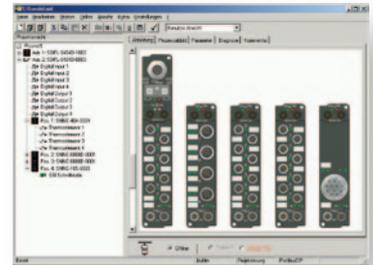

■ **piconet® - Bridges for fibre optics and power cables**

- Compact mounting
- Reduced space requirements
- Easy installation
- IP67

# I/O-ASSISTANT

## Easy planning and configuration with the I/O-ASSISTANT

Configuration software for

- Project planning
- Configuration
- Parameterisation

### Description

The configuration software I/O-ASSISTANT supports you in planning and implementation of an I/O system. Whether in the online or offline mode, the I/O-ASSISTANT simplifies module configuration and parameterisation.

The software is also extremely helpful in system set-up and testing.

### Functions

- Convenient software tool
- Selection of the required modules
- Offline planning and configuration of *piconet*<sup>®</sup> modules
- Parameterisation, configuration and set-up of individual modules
- Reading and setting of process data
- Set-up aid for checking the cabling and sensors without a PLC
- Realistic presentation of the configured *piconet*<sup>®</sup> components
- Automatic documentation of configured *piconet*<sup>®</sup> systems

# piconet® – Compact I/O system in IP67 – Overview

*piconet*®, the miniature IP67 product family within the TURCK fieldbus programme, featuring extremely compact housings and a fine modular structure, is the ideal solution for serial and special machine engineering and many other field applications. The product line includes:

- *piconet*® coupling modules  
The coupling modules function as the gateway between the open fieldbus and the fibre-optic based *piconet*® sub-bus “IP-Link”.
- *piconet*® extension modules  
The various extension modules are combined to form a modular network via the fibre-optic based IP-Link .
- *piconet*® stand-alone modules  
Stand-alone-modules connect the integrated inputs/outputs directly to the open fieldbus.

Based on the IP-Link, a modular network can be constructed, with which up to 120 extension modules can be operated via a single coupling module. The coupling module collects the I/O data of the connected extension modules via the interference-immune and fast IP-Link network with a transmission speed of 2 Mbps.

The transmission time for 1,000 I/Os is approx. 1 ms – if less data are transferred the transmission speed is even higher. The maximum fibre-optic cable length is 15 m.

The product line comprises of extension and stand-alone modules for the entire spectrum of I/O signals – ranging from standardised digital industrial signals to analogue inputs and outputs. The family is complemented by a choice of technology modules, such as a pulse width modulator, an up/down counter,

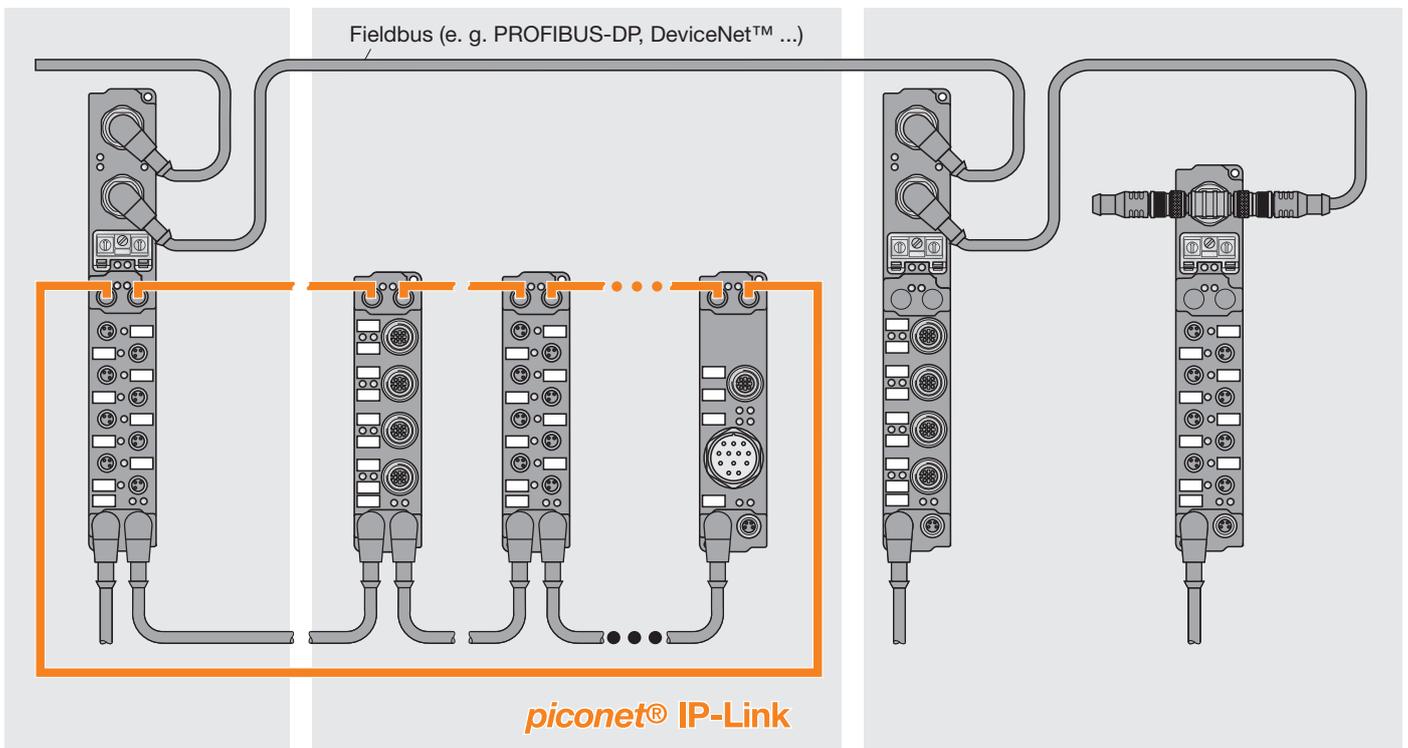

an incremental encoder as well as various serial interfaces. *piconet*® can be connected to all major industrial fieldbus systems (e.g. PROFIBUS-DP, DeviceNet™, CANopen, INTERBUS, Modbus TCP, EtherNet/IP™ and PROFINET IO).

The robust IP67 housing is extremely compact, fully encapsulated and equipped throughout with metal connectors. As a result, the modules are perfectly suited for application in harsh industrial environments as well as in space-critical applications in special and serial machine engineering.

The operating and load supply are fed separately to all *piconet*® modules.

A status LED is assigned to each channel to provide signal status indications.

## *piconet*® – modular network with direct connection to the higher level fieldbus

Coupling module (Gateway)

Extension modules

Stand-alone modules

The figure shows a PROFIBUS-DP application.

## piconet® – General technical information

A detailed technical system description as well as application guidelines for piconet® fieldbus components are contained in the piconet® – User Manual.

### Earthing/Shielding concept

The shield is capacitively coupled with the base of the piconet® modules. In order to eliminate interferences effectively via the shield, the surface on which the module is mounted must provide a low impedance or low-resistance connection to the ground ( e.g. the ground reference plane, the machine's ground). Optionally, the shield of the bus cable can be directly earthed via the piconet® earthing clip EL-0002.

### Data mapping

#### Compact mapping

In the compact data mapping mode, purely process/user data are mapped. Data of bit-oriented modules are mapped in the compact mode only.

#### Complex mapping

In the complex data mapping mode, control and status byte are mapped in addition to process/user data. Data of byte-oriented modules can be mapped either in the compact or complex mode.

**Note:** piconet® coupling modules first map the data of the byte-oriented (complex) extension modules to the process image according to their physical order within the IP-Link network. Then the data of the bit-oriented extension modules are added to the process image

### Data formats

#### The Intel format

In the Intel format, the most significant data byte follows the least significant data byte. The Intel format is colloquially also referred to as the "little Endian".

#### The Motorola format

In the Motorola format, the least significant data byte follows the most significant data byte. The Motorola format is colloquially also referred to as the "big Endian".

**Note:** The default data format setting of the various fieldbus types differs. Fieldbus components for DeviceNet™, CANopen and Ethernet are set by default to Intel, while PROFIBUS-DP and INTERBUS components are pre-set to the Motorola format. In the catalogue, the mapping tables (process images) of the extension modules are exclusively shown in the Motorola format.

### Alignment

#### Byte alignment

In order to ensure that the addressing area always starts at the beginning of a byte, so-called filler bits (unused/idle) are inserted into the process image when the byte alignment option is activated.

#### Word alignment

In order to ensure that the addressing area always starts at the beginning of a word, so-called filler bytes (unused/idle) are inserted into the process image when the word alignment option is activated.

## piconet® – technical data of fibre-optic cables “IP-Link”

### ⚠ ATTENTION:

For detailed assembly instructions concerning the IP-Link fiber optic cables, please refer to the “piconet® - User manual I/O modules” i.e. the mounting instructions of the IP-Link connector SFOC-0002-10

<b>Profile</b>	step index
Material fibre core	PMMA, Ø 980 µm
Material fibre jacket	PMMA, Ø 1000 µm
Material fibre insulation	PE, colour black, Ø 2.2 mm
Material strain relief	Aramid (Kevlar)
Material outer jacket	PUR, colour orange, Ø 5.5 ± 0.2 mm
<b>Application</b>	for stationary installation in the machine sector, in cable ducts and conduits on cable racks for flexible use in robot applications with slight dynamic strain for use in trailing cables
<b>Transmission characteristics</b>	
– Attenuation at 650 nm	typ. 170...180 dB/km, max. 200 dB/km
<b>Numerical aperture</b>	0.5
<b>Mechanical features</b>	
– Bending radius, static	min. 50 mm
– Bending radius, dynamic	min. 10 × outer diameter
– Bending radius, trailing chain	min. 10 × outer diameter (approx. 2 million cycles)
<b>Chemical features</b>	very good resistance to oils, fat, acids, alkalis long-term installation in water not admissible
<b>Operating temperature</b>	-20...+ 70 °C
Storage temperature	-40...+ 70 °C
<b>Flammability</b>	flame-retardent halogen-free to IEC 60754-2A1:1997, no corrosive and toxic gases

## *piconet*<sup>®</sup> – Coupling modules

*piconet*<sup>®</sup> coupling modules are the gateway between the higher level fieldbus (e.g. PROFIBUS-DP, DeviceNet™, CANopen, INTERBUS, Modbus TCP, EtherNet/IP™ and PROFINET IO) and the fibre-optic based *piconet*<sup>®</sup> sub-bus "IP-Link". Depending on the type of coupling module, they are equipped with one or two fieldbus connections and two further connectors for connection to the *piconet*<sup>®</sup> IP-Link.

On basis of the IP-Link, it is possible to construct a modular network, for operation of

up to 120 extension modules per coupling module.

The coupling module collects the I/O data of the connected extension modules via the interference immune and fast (2 Mbps) IP-Link network.

The transmission time for 1,000 I/Os is approx. 1 ms – if less data are transferred the transmission speed is even higher. The maximum fibre-optic cable length is 15 m.

The robust IP67 housing is extremely compact, fully encapsulated and equipped throughout with metal connectors. As a result, our *piconet*<sup>®</sup> modules are suited for application both in rough industrial environments as well as in space-critical applications in serial and special machine engineering. Operating and load voltage are – as with all *piconet*<sup>®</sup> module types – fed separately. Alongside the "Power" LED, each channel is assigned a "Status" LED for switching status indications.

### *piconet*<sup>®</sup> – coupling modules – general technical data

<b>Adjustment</b>	
Fieldbus address	1...99 (decimal), adjustable via coded rotary switches
Transmission rate	automatic
<b>LED indications (module-specific)</b>	
Fieldbus	fieldbus specific (s. manual)
Status IP-Link or module (local errors)	
– green LED flashing/ON – red LED OFF:	receipt of error-free IP-Link protocols
– green LED flashing/red LED flashing:	receipt of faulty IP-Link protocols (must not lead to a system error)
– green LED OFF/red LED flashing:	receipt of faulty IP-Link protocols
– green LED OFF/red LED ON:	no data transfer via the IP-Link or module error
Operating voltage U <sub>B</sub>	green: operational
Load voltage U <sub>L</sub>	green: operational
<b>Connections</b>	
Fieldbus	brass, nickel-plated
IP-Link	depending on the type of fieldbus system used
Length of fibre-optic cable	(2) IP-Link female connectors max. 15 m
Power supply	(1) M8 male connectors, 4-pole, (1) M8 female connectors, 4-pole
Inputs/outputs	selectable: (8) M8 female connectors, 3-pole, or (4) M12 female connectors, 5-pole
Service interface	(1) terminal strip, 5-pole (for I/O-ASSISTANT)
<b>Housing</b>	
Material	compact, fully encapsulated plastic housing PA6 (Polyamid)
Dimensions – device with 1 fieldbus connection	175 × 30 × 26.5 mm (H × W × D)
Dimensions – device with 2 fieldbus connections	210 × 30 × 26.5 mm (H × W × D)
Mounting	via 2 through-holes, Ø 3 mm
Mounting position	any
Operating temperature (range)	0 °C to +55 °C (+32 °F to +131 °F)
Operating temperature (storage)	-25 °C to +85 °C (-13 °F to +185 °F)
Degree of protection (IEC 60529/EN 60529)	IP65, IP66, IP67
Vibration and shock testing	according to IEC 68, part 2-6 / IEC 68, part 2-27
Electromagnetic capability (EMC)	according to EN 50081-2/EN 50082-2
Weight	approx. 250–280 g (depending on type)
Approvals	CE, 

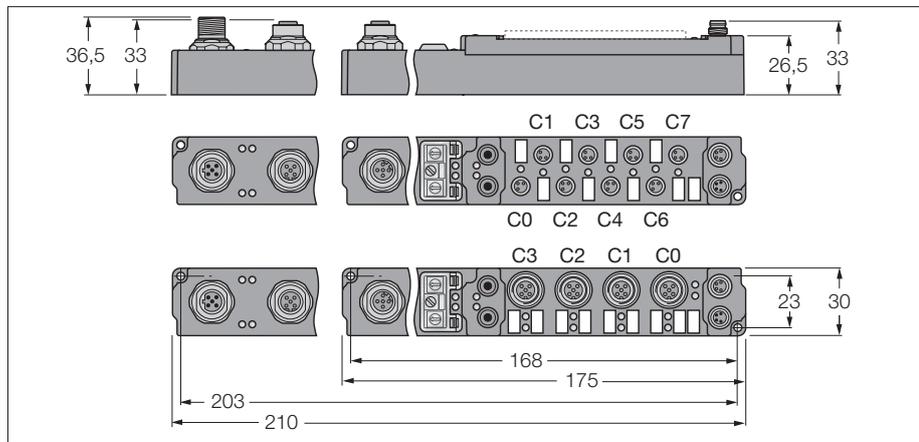

**Please note:** further technical information is contained in the *piconet*<sup>®</sup> user manuals.

# piconet® coupling module for PROFIBUS-DP

4 digital pnp inputs filter 3 ms

4 digital outputs 0.5 A

- 4 digital pnp inputs
- 4 digital outputs 0.5 A
- Input filter 3 ms
- Configuration interface
- Parameterisable functions
- Supported via I/O-ASSISTANT
- Direct connection to the fieldbus
- Direct connection to the IP link
- Fibre-glass reinforced PA6 housing
- Encapsulated module electronics
- Metal connector
- Degree of Protection IP67

<b>Operating / load voltage</b>	20...29 VDC
Operating current	≤ 100 mA
<b>Fieldbus transmission rate</b>	9.6 kbps up to 12 Mbps
Fieldbus addressing	0 to 99
Service interface	parameterisation via I/O-ASSISTANT
Electrical isolation	Fieldbus to operational voltage
<b>Fibre-optic length</b>	≤ 15 m
<b>Inputs</b>	
Number of channels	4 digital inputs acc. to EN 61131-2
Input voltage	20...29 VDC via operating voltage
Supply current	< 500 mA per channel, short-circuit proof
Low level signal voltage	-3...5 VDC (EN 61131-2, type 2)
High level signal voltage	11...30 VDC (EN 61131-2, type 2)
Max. input frequency	167 Hz
Input delay	3 ms
Max. input current	6 mA
<b>Outputs</b>	
Number of channels	4 digital outputs acc. to EN 61131-2
Output voltage	20...29 VDC from load voltage
Output current per channel	0.5 A, short-circuit proof
Load type	resistive, inductive, lamp load
Switching frequency	≤ 500 Hz
Simultaneity factor	1
<b>Operating temperature</b>	0 to 55 °C

# piconet® – Extension modules

## piconet® – Extension modules for IP-Link

Page

### Digital modules

8 digital inputs, filter 0.2 ms or 3 ms	160
8 digital outputs, 0.5 A	164
8 digital outputs, 2 A ( $I_{\Sigma} = 4 \text{ A}$ )	166
8 digital outputs, 2 A ( $I_{\Sigma} = 12 \text{ A}$ )	168
16 digital outputs, 0.5 A ( $I_{\Sigma} = 4 \text{ A}$ )	170
4 digital inputs, filter 0.2 ms or 3 ms and 4 digital outputs, 0.5 A	172
4 digital inputs, filter 0.2 ms or 3 ms and 4 digital outputs, 2 A ( $I_{\Sigma} = 4 \text{ A}$ )	176
8 digital inputs, filter 3 ms and 8 digital outputs, 0.5 A	180
8 digital inputs, filter 3 ms and 8 digital outputs, 0.5 A, IP20	182

### Analogue modules

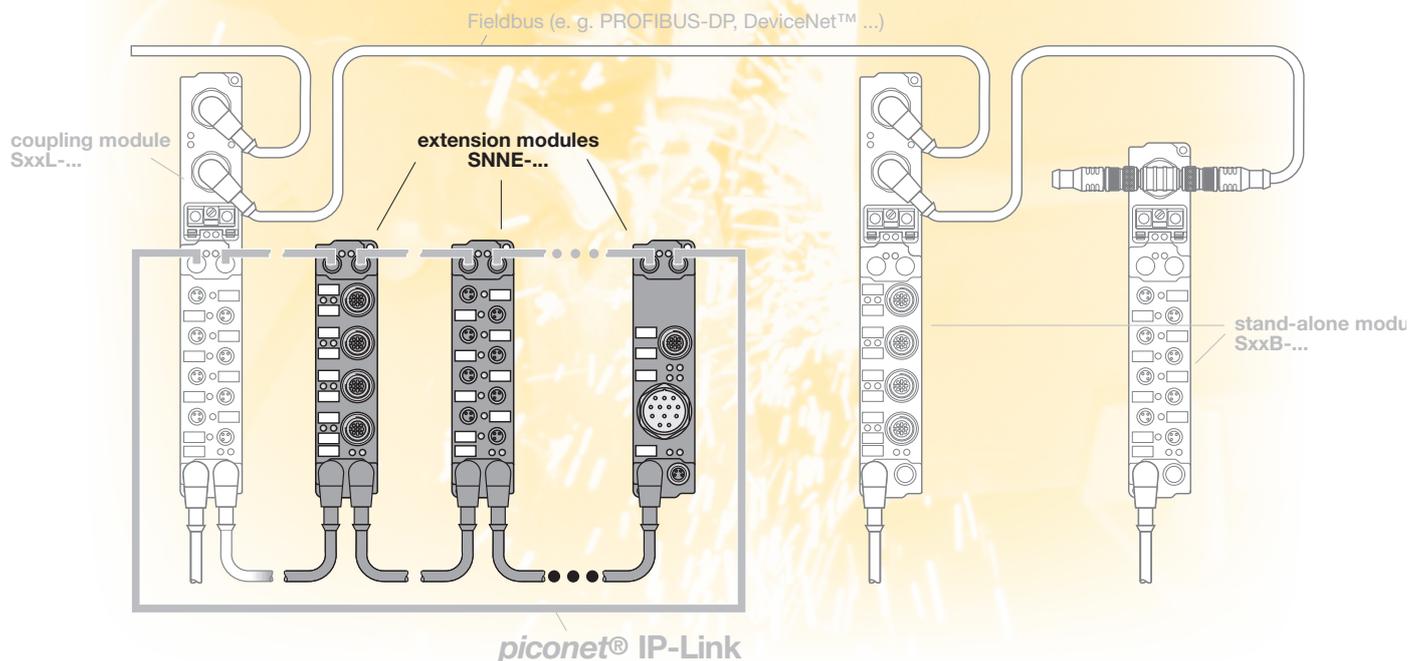

4 analogue differential inputs $\pm 10 \text{ V}$ , 16 bits	184
4 analogue differential inputs 0...20 mA, 16 bits	186
4 analogue inputs for Pt100 (RTD)	188
4 analogue inputs for thermoelements	190
4 analogue outputs, $\pm 10 \text{ V}$ , 16 bits	192
4 analogue outputs, 0...20 mA, 16 bits	194

### Technology modules

2-channel pulse width modulation, 24 VDC, 2.5 A	196
2-channel up/down counter, 24 VDC, 100 kHz	198
1-channel incremental encoder interface	200
1-channel serial interface RS232	202
1-channel serial interface 0..20 mA (TTY)	204
1-channel serial interface RS232/RS485	206
1-channel SSI encoder interface	208

### FESTO valve terminal

8 valve discs with max. 16 valve coils	210
--	-----

## **piconet® – Extension modules for IP-Link**

*piconet®* extension modules are equipped with a bus connector for the fibre-optic network IP-Link. The IP-Link allows connection and operation of up to 120 extension modules via a single coupling module.

The product spectrum comprises extension modules for the entire spectrum of I/O signals – ranging from standardised digital industrial signals up to analogue inputs and outputs. The family is complemented by a choice of technology modules, such as a pulse width modulator, an up/down counter

and an incremental encoder as well as various serial interfaces. The coupling module collects the I/O data of the connected extension modules via the interference immune and fast (2 Mbps) IP-Link network.

The transmission time for 1,000 I/Os is approx. 1 ms – if less data are transferred the transmission time is even less. The maximum length of a fibre-optic cable is 15 m.

The robust IP67 housing is extremely compact, fully encapsulated and equipped

throughout with metal connectors. As a result, our *piconet®* modules are suited for application both in rough industrial environments as well as in space-critical applications in serial and special machine engineering.

Operating and load voltage are – as with all *piconet®* module types – fed separately. Alongside the “Power” LED, each channel is assigned a “Status” LED for switching status indications.

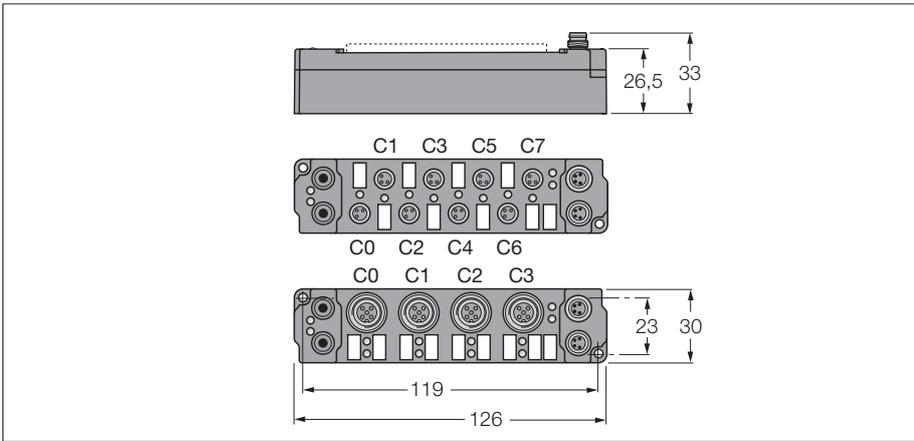

### **piconet® – Extension modules for IP-Link – general technical data**

<b>Adjustment</b>	
Transmission rate	automatic
<b>LED indications (module-specific)</b>	
Status IP-Link or module (local errors)	
– green LED flashing/ON – red LED OFF:	receipt of error-free IP-Link protocols
– green LED flashing/red LED flashing:	receipt of faulty IP-Link protocols (must not lead to a system error)
– green LED OFF/red LED flashing:	receipt of faulty IP-Link protocols
– green LED OFF/red LED ON:	no data transfer via the IP-Link or module error
Operating voltage $U_B$	green: operational
Load voltage $U_L$	green: operational
<b>Connections</b>	
IP-Link	brass, nickel-plated (2) IP-Link female connectors
Length of fibre-optic cable	max. 15 m
Power supply	depending on the respective module type
Inputs/outputs	selectable: (8) M8 female connectors or (4) M12 female connectors
<b>Housing</b>	
Material	compact, fully encapsulated plastic housing PA6 (Polyamid)
Dimensions	126 × 30 × 26.5 mm (H × W × D)
Mounting	via 2 through-holes, Ø 3 mm
Mounting position	any
Operating temperature (range)	0 °C to +55 °C (+32 °F to +131 °F)
Operating temperature (storage)	-25 °C to +85 °C (-13 °F to +185 °F)
Degree of protection (IEC 60529/EN 60529)	IP65, IP66, IP67
Vibration and shock testing	according to IEC 68, part 2-6 / IEC 68, part 2-27
Electromagnetic capability (EMC)	according to EN 50081-2/EN 50082-2
Weight	approx. 120–200 g (depending on type)
Approvals	CE, 

**Please note:** further technical information is contained in the *piconet®* user manuals.

**piconet® extension module for IP link**  
**8 digital pnp inputs filter 3 ms**

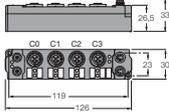

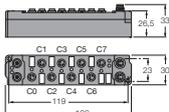

- 8 digital pnp inputs
- Input filter 3 ms
- Parameterisable functions
- Supported via I/O-ASSISTANT
- Direct connection to the IP link
- Fibre-glass reinforced PA6 housing
- Encapsulated module electronics
- Metal connector
- Degree of protection IP67

<b>Operating / load voltage</b>	20...29 VDC
<b>Operating current</b>	≤ 25 mA
<b>Fibre-optic length</b>	≤ 15 m
<b>Inputs</b>	
<b>Number of channels</b>	8 digital inputs acc. to EN 61131-2
<b>Input voltage</b>	20...29 VDC via operating voltage
<b>Supply current</b>	< 500 mA per channel, short-circuit proof
<b>Low level signal voltage</b>	-3...5 VDC (EN 61131-2, type 2)
<b>High level signal voltage</b>	11...30 VDC (EN 61131-2, type 2)
<b>Max. input frequency</b>	167 Hz
<b>Input delay</b>	3 ms
<b>Max. input current</b>	6 mA
<b>Operating temperature</b>	0 to 55 °C

**Data in process image**

F081 - Voltage supply M8 × 1

F077 - Input M8 × 1

F079 - Output M8 × 1

**piconet® extension module for IP link**  
**4 digital pnp inputs filter 0.2 ms**  
**4 digital outputs 0.5 A**

- 4 digital pnp inputs
- 4 digital outputs 0.5 A
- Input filter 0.2 ms
- Parameterisable functions
- Supported via I/O-ASSISTANT
- Direct connection to the IP link
- Fibre-glass reinforced PA6 housing
- Encapsulated module electronics
- Metal connector
- Degree of protection IP67

<b>Operating / load voltage</b>	20...29 VDC
<b>Operating current</b>	≤ 25 mA
<b>Fibre-optic length</b>	≤ 15 m
<b>Inputs</b>	
Number of channels	4 digital inputs acc. to EN 61131-2
Input voltage	20...29 VDC via operating voltage
Supply current	< 500 mA per channel, short-circuit proof
Low level signal voltage	-3...5 VDC (EN 61131-2, type 2)
High level signal voltage	11...30 VDC (EN 61131-2, type 2)
Max. input frequency	2.5 kHz
Input delay	0.2 ms
Max. input current	6 mA
<b>Outputs</b>	
Number of channels	4 digital outputs acc. to EN 61131-2
Output voltage	20...29 VDC from load voltage
Output current per channel	0.5 A, short-circuit proof
Load type	resistive, inductive, lamp load
Switching frequency	≤ 500 Hz
Simultaneity factor	1
<b>Operating temperature</b>	0 to 55 °C

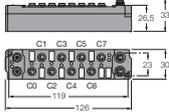

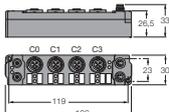

**Data in process image**

### Digital modules

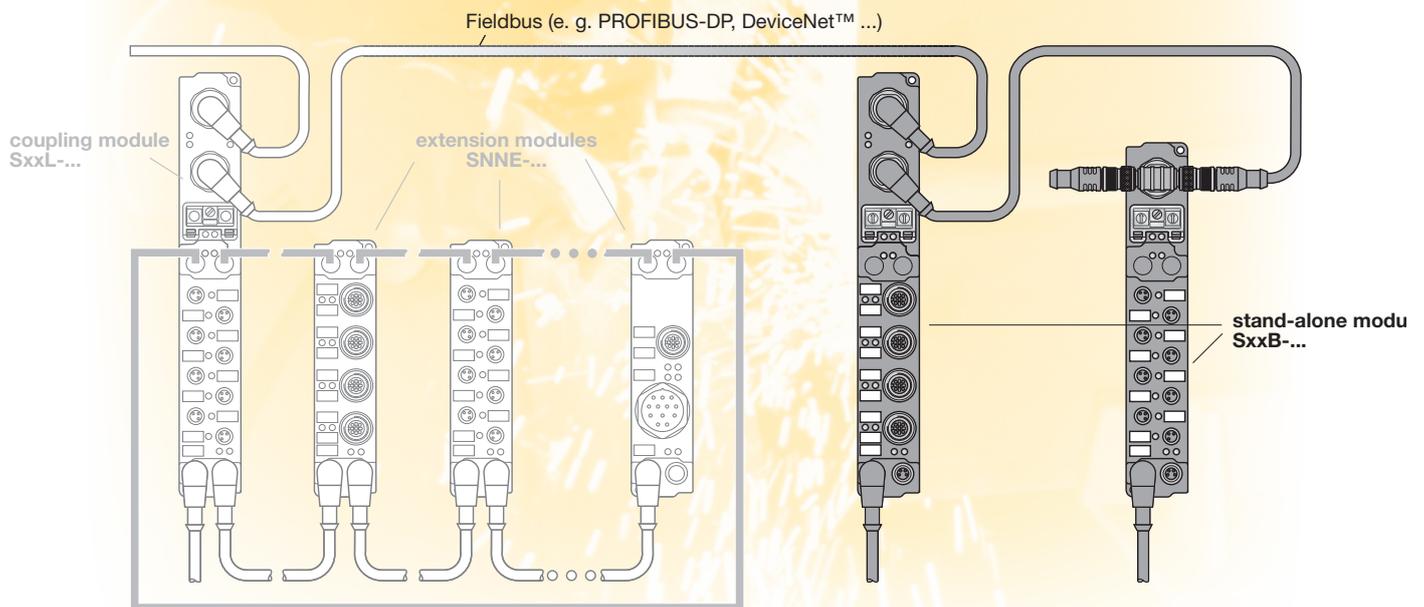

8 digital inputs, filter 0.2 ms or 3 ms	214
8 digital outputs, 0,5 A	218
8 digital outputs, 2 A ( $I_{\Sigma} = 4 \text{ A}$ )	220
8 digital outputs, 2 A ( $I_{\Sigma} = 12 \text{ A}$ )	222
4 digital inputs, filter 0.2 ms or 3 ms and 4 digital outputs, 0,5 A	224
4 digital inputs, filter 0.2 ms or 3 ms and 4 digital outputs, 2 A ( $I_{\Sigma} = 4 \text{ A}$ )	228
8 digital inputs, filter 3 ms and 8 digital outputs, 0,5 A	232

### Analogue modules

4 analogue differential inputs, $\pm 10 \text{ V}$ , 16 bit	234
4 analogue differential inputs, 0...20 mA, 16 bit	236
4 analogue inputs for Pt100 (RTD)	238
4 analogue inputs for thermoelements	240
4 analogue outputs $\pm 10 \text{ V}$	242
4 analogue outputs, 0...20 mA	244

### Technology modules

2-channel pulse width modulation, 24 VDC, 2.5 A	246
2-channel up/down counter, 100 kHz	248
1-channel incremental encoder interface	250
1-channel serial interface, RS232	252
1-channel serial interface, 0...20 mA (TTY))	254
1-channel serial interface, RS232/RS485	256
1-channel SSI encoder interface	258

piconet® IP-Link

**piconet® – Stand-alone modules for PROFIBUS-DP**

piconet® stand-alone modules connect each piconet® I/O module directly to the fieldbus. There are versions with one fieldbus connection (separate tee needed) and with two bus connections (tee piece integrated).

The programme comprises modules for the whole spectrum of I/O signals – from standardised digital industrial signals to analogue inputs and outputs. The family is complemented by a choice of technology modules, such as a pulse width modulator, an up/down counter, an incremental encoder as well as various serial interfaces.

The robust IP67 housing is extremely compact, fully encapsulated and equipped throughout with metal connectors. As a result, the piconet® modules are perfectly suited for application in harsh industrial environments as well as serial and special machine engineering.

Operating and load voltage are – as with all piconet® module types – fed separately. Alongside the “Power” LED, each channel is assigned a “Status” LED for switching status indications.

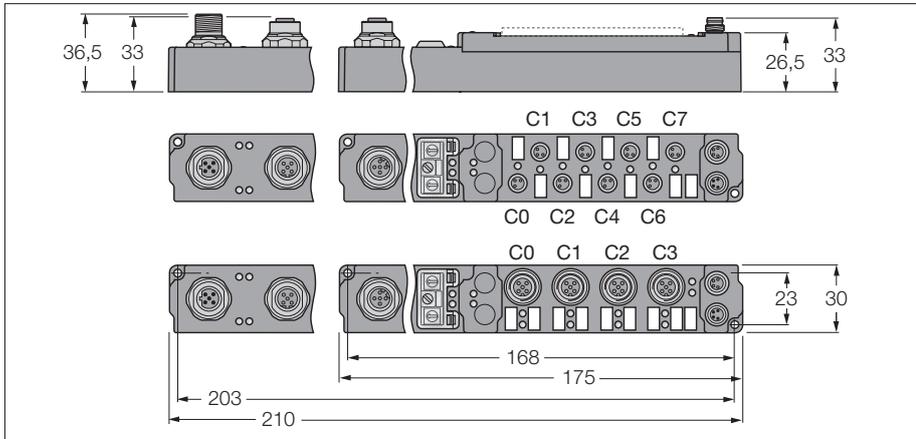

**piconet® – Stand-alone modules – general technical data**

<b>Adjustment</b>	
Fieldbus address	1...99 (decimal), adjustable via coded rotary switches
Transmission rate	automatic
<b>LED indications (module-specific)</b>	
Fieldbus	fieldbus specific (s. manual)
Operating voltage U <sub>B</sub>	green: operational
Load voltage U <sub>L</sub>	green: operational
<b>Connections</b>	
Fieldbus	brass, nickel-plated depending on the type of fieldbus system used
Power supply	(1) M8 male connectors, 4-pole, (1) M8 female connectors, 4-pole
Inputs/outputs	selectable: (8) M8 female connectors, 3-pole, or (4) M12 female connectors, 5-pole
Service interface	(1) terminal strip, 5-pole (for I/O-ASSISTANT)
<b>Housing</b>	
Material	compact, fully encapsulated plastic housing PA6 (Polyamid)
Dimensions – device with 1 fieldbus connection	175 × 30 × 26.5 mm (H × W × D)
Dimensions – device with 2 fieldbus connections	210 × 30 × 26.5 mm (H × W × D)
Mounting	via 2 through-holes, Ø 3 mm
Mounting position	any
Operating temperature (range)	0 °C to +55 °C (+32 °F to +131 °F)
Operating temperature (storage)	-25 °C to +85 °C (-13 °F to +185 °F)
Degree of protection (IEC 60529/EN 60529)	IP65, IP66, IP67
Vibration and shock testing	according to IEC 68, part 2-6 / IEC 68, part 2-27
Electromagnetic capability (EMC)	according to EN 50081-2/EN 50082-2
Weight	approx. 250–280 g (depending on type)
Approvals	CE, 

**Please note:** further technical information is contained in the piconet® user manuals. Additionally available to PROFIBUS-DP are stand-alone modules for DeviceNet™ and CANopen. For more detailed information concerning the availability of correspondent signal forms, please contact the Hans Turck GmbH & Co KG directly.

**piconet® stand-alone module for PROFIBUS-DP**  
**8 digital pnp inputs filter 3 ms**

- 8 digital pnp inputs
- Input filter 3 ms
- Configuration interface
- Parameterisable functions
- Supported via I/O-ASSISTANT
- Direct connection to the fieldbus
- Fibre-glass reinforced PA6 housing
- Encapsulated module electronics
- Metal connector
- Degree of protection IP67

<b>Operating / load voltage</b>	20...29 VDC
Operating current	≤ 85 mA
<b>Fieldbus transmission rate</b>	9.6 kbps up to 12 Mbps
Fieldbus addressing	0 to 99
Service interface	parameterisation via I/O-ASSISTANT
Electrical isolation	fieldbus to operational voltage
<b>Inputs</b>	
Number of channels	8 digital inputs acc. to EN 61131-2
Input voltage	20...29 VDC via operating voltage
Supply current	< 500 mA per channel, short-circuit proof
Low level signal voltage	-3...5 VDC (EN 61131-2, type 2)
High level signal voltage	11...30 VDC (EN 61131-2, type 2)
Max. input frequency	167 Hz
Input delay	3 ms
Max. input current	6 mA
<b>Operating temperature</b>	0 to 55 °C

**Data in process image**

		Bit 7	Bit 6	Bit 5	Bit 4	Bit 3	Bit 2	Bit 1	Bit 0

# Compact fieldbus I/O modules in IP67 and IP20

## Compact fieldbus modules

These rugged modules are ideal for use in harsh industrial environments (both electrical and mechanical).

No matter if PROFIBUS-DP, DeviceNet™, Modbus TCP, EtherNet/IP™ or PROFINET IO protocols are required, all compact fieldbus I/O modules are designed with the same mechanical concept and have the following characteristics:

- Fibre-glass reinforced plastic housing
- Fully encapsulated module electronics
- Standard connection technology
- Metal round connector
- Vibration and shock tested
- Degree of protection IP67

## FXDP – Configurable PROFIBUS-DP modules

- Freely configurable I/Os
- Channel-specific diagnostics
- Diagnostics according to PROFIBUS standard
- Diagnostics can be mapped to user data area
- Up to 16 digital channels

## FGDP – PROFIBUS-DP-Modules with galvanic isolation

- Channel-specific diagnostics
- Diagnostics according to PROFIBUS standard
- Diagnostics can be mapped to user data area
- Up to 16 digital channels
- Galvanic isolation of operating and load voltage

## FLDP – PROFIBUS-DP modules

- Module-specific diagnostics
- Up to 32 digital channels

**FDNL – DeviceNet™ modules**

- Channel-specific diagnostics (LX series) or module-specific diagnostics (SE series)
- Up to 16 digital channels
- Power supply via DeviceNet™

**FDNP – DeviceNet™ module**

- Channel-specific diagnostics (LX series) or module-specific diagnostics (SE series)
- Up to 16 digital channels
- Separate power supply for the outputs

**FDN/FDP – IP20 modules**

- Extremely compact for mounting in tight spaces
- PROFIBUS-DP or DeviceNet™
- Up to 16 digital channels

**FGEN – Configurable multi-protocol Ethernet modules**

- Integrated Ethernet switch
- Freely configurable I/Os
- Channel-specific diagnostics
- Up to 16 digital channels

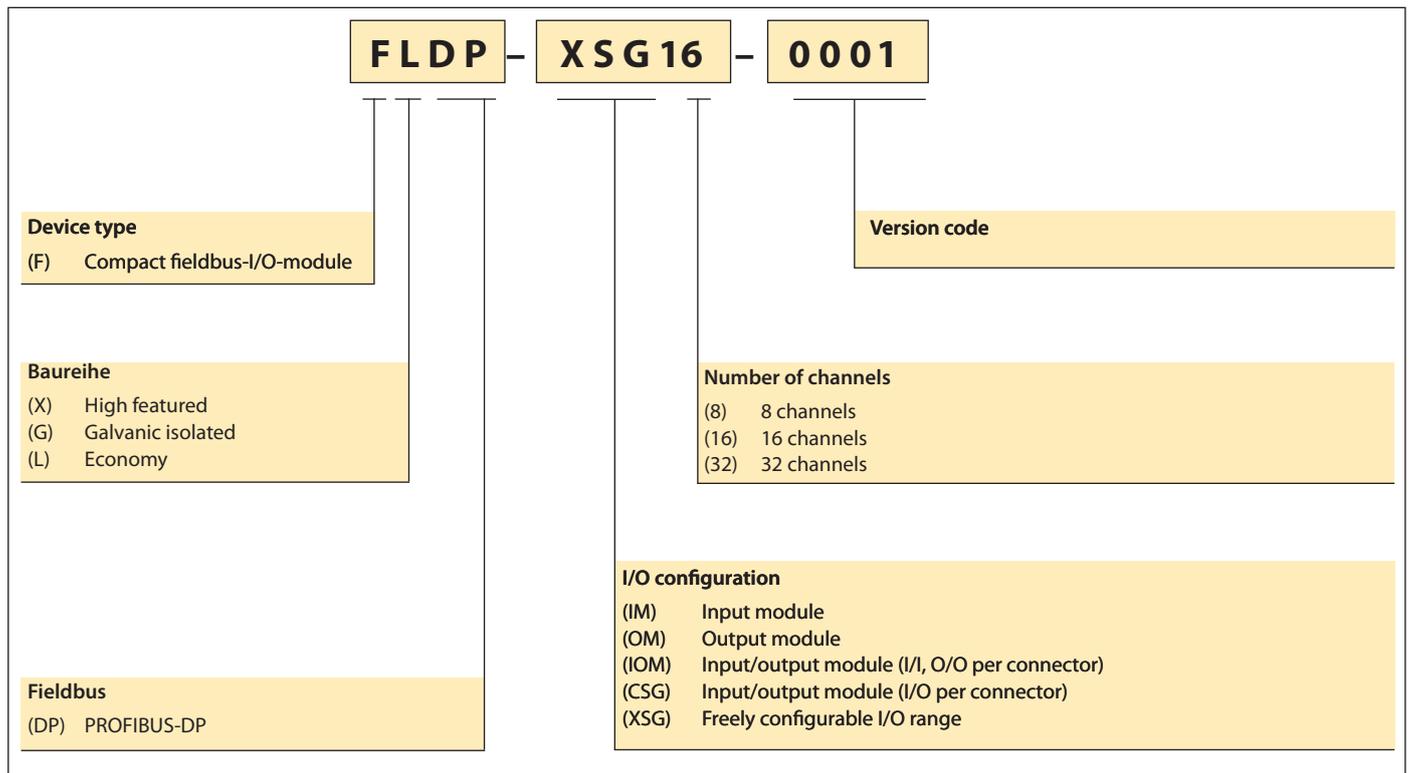

**Accessories**

- Cordsets – premoulded cables for bus, power supply and I/Os
- T and Y pieces
- Terminating resistors
- Flange connectors
- Feed-through receptacles
- Passive junction boxes

# Compact fieldbus I/O modules in IP67 for PROFIBUS-DP

## Type code

# Compact fieldbus I/O modules in IP67 for PROFIBUS-DP

## Series FLDP

### Housing version 1

- Compact flat housing
- Up to 16 channels
- Two bus connectors
- Module-specific diagnostics

### Housing version 2

- Compact flat housing
- Up to 32 channels
- Two bus connectors
- Module-specific diagnostics

## Series FXDP

- Compact flat housing
- Up to 16 channels
- Channel-specific diagnostics
- Diagnostics can be mapped to user data area
- Freely configurable I/Os

## Series FGDP

- Compact flat housing
- Up to 16 channels
- Channel-specific diagnostics
- Diagnostics can be mapped to user data area
- Galvanic isolation of operating and load voltage

# Compact fieldbus I/O modules in IP67 for PROFIBUS-DP

**TURCK**

Industrial  
Automation

## Series FXDP – general information

The compact FXDP series fieldbus I/O modules allow direct connection of up to 16 inputs/outputs to a PROFIBUS-DP network. The I/O modules offer channel-specific short-circuit diagnostics of the outputs and module specific short-circuit diagnostics of the inputs. The diagnostics can also be mapped to the user data area. The XSG version also allows the I/O area to be freely configured.

Operating and load voltage are fed separately. If the load supply is switched off, the module electronics and all inputs continue operation when the outputs are turned off. In this case, the load voltage diagnostics can also be deactivated.

The I/O modules support transmission rates of 12 Mbps. The PROFIBUS-DP connection is implemented via 5-pole, reverse-keyed M12 × 1 connectors.

The module is powered via a 7/8" round connector and can be fed through via a second 7/8" round connector.

The I/O level is equipped throughout with metal M12 connectors.

Glass-fibre reinforced plastic housings and the fully encapsulated module electronics guarantee protection degree IP67. The I/O modules are therefore particularly suited for use in harsh industrial environments.

### General technical data

#### Characteristics

Extended diagnostics, connector-specific short-circuit diagnostics of the sensor supply voltage, channel-specific short-circuit diagnostics of the outputs, Complete diagnostic information according to standards via the PROFIBUS-DP, channel-specific display of status and errors via LEDs, diagnostics can be mapped to the user data area (diagnostics inputs).

#### Settings

##### PROFIBUS-DP

address 1...126 (decimal) adjustable via three coded rotary switches  
Transmission rate of 9.6 kbps up to 12 Mbps, automatic

#### LEDs

##### Bus (dual colour LED)

green: communication, red: no communication

##### Power (dual colour LED)

green: operational, off:  $U_b < 18$  VDC, red:  $U_L < 18$  V (only modules with digital outputs)

##### Inputs (dual colour LED)

green: ON, red: short-circuit

##### Outputs (dual colour LED)

green: ON, red: short-circuit

#### Connections

##### PROFIBUS

Nickel-plated brass

##### Power supply

1 × male M12 connector (IN), 1 × female M12 connector (OUT), 5-pole, reverse-keyed

##### Inputs/outputs

1 × 7/8" male connector (IN), 1 × 7/8" female connector (OUT), 5-pole

8 female M12 × 1 connectors; 5-pole

#### Housing

PA6-GF30, glass-fibre reinforced plastic housing with encapsulated electronics and nickel-plated brass connectors

##### Mounting

via 4 through-holes,  $\varnothing$  5.4 mm

##### Degree of protection

(IEC 60529/EN 60529) IP67

##### Vibration and shock tested

according to EN 60068-2-6, 2-27

##### EMC

to EN 61000-6-2, IEC 61000-6-4

##### Temperature range

##### – Operating temperature

-25 °C to +55 °C (-25 °F to +131 °F)

##### – Storage and transport temperature

-25 °C to +70 °C (-13 °F to +158 °F)

##### Dimensions

220.5 × 62.4 × 27 mm (H × W × D)

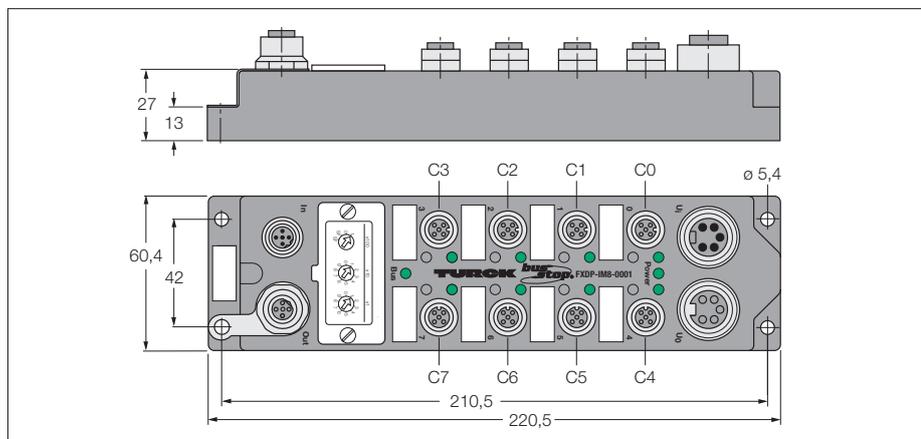

#### Approvals

CE, ,  II 3G EEx nA IIC T4X (EC Ex-regulations 94/9/EG)

# Compact fieldbus I/O modules in IP67 for PROFIBUS-DP

**TURCK**

Industrial  
Automation

## Series FGDP – general information

The compact FGDP series fieldbus I/O modules allow direct connection of up to 16 inputs/outputs to a PROFIBUS-DP network. The I/O modules offer channel-specific short-circuit diagnostics of the outputs and module specific short-circuit diagnostics of the inputs. The diagnostics can also be mapped to the user data area.

The I/O modules support transmission rates of 12 Mbps. The PROFIBUS-DP connection is implemented via 5-pole, reverse-keyed M12 × 1 connectors. The module is powered via a 7/8" round connector and can be fed through via a second 7/8" round connector. The I/O level is equipped throughout with metal M12 connectors.

The operating and load supply are fed separately to the module and are galvanically isolated from each other. If the load supply is switched off, the module electronics and all inputs continue operation when the outputs are turned off. In this case, the load voltage diagnostics can also be deactivated.

Glass-fibre reinforced plastic housings and the fully encapsulated module electronics guarantee protection degree IP67. The I/O modules are therefore particularly suited for use in harsh industrial environments.

### General technical data

#### Characteristics

Extended diagnostics, connector-specific short-circuit diagnostics of the sensor supply voltage, channel specific short-circuit monitoring of the outputs, Complete diagnostic information according to standards via the PROFIBUS-DP, channel-specific display of errors and status indications via LEDs, diagnostics can be mapped to user data area (diagnostic inputs), Galvanic isolation of operating and load voltage.

#### Settings

PROFIBUS-DP address 1...126 (decimal) adjustable via three coded rotary switches  
Transmission rate 9.6 kbps up to 12 Mbps, automatic

#### LEDs

Bus (dual colour LED) green: communication, red: no communication  
Power (dual colour LED) green: operational, off:  $U_b < 18$  VDC, red:  $U_L < 18$  V (modules with digital outputs)  
Inputs (dual colour LED) green: ON, red: short-circuit  
Outputs (dual colour LED) green: ON, red: short-circuit

#### Connections

PROFIBUS Nickel-plated brass  
1 × male M12 connector (IN), 1 × female M12 connector (OUT), 5-pole, reverse-keyed  
Power supply 1 × 7/8" male connector (IN), 1 × 7/8" female connector (OUT), 5-pole  
Inputs/outputs 8 female M12 × 1 connectors; 5-pole

#### Housing

brass connectors PA6-GF30, glass-fibre reinforced plastic housing with encapsulated electronics and nickel-plated  
Mounting via 4 through-holes,  $\varnothing$  5.4 mm  
Degree of protection (IEC 60529/EN 60529) IP67  
Vibration and shock testing according to EN 60068-2-6, 2-27  
EMC acc.to EN 61000-6-2, IEC 61000-6-4  
Temperature range  
– Operating temperature 0 °C to +55 °C (+32 °F to +131 °F)  
– Storage and transport temperature -25 °C to +70 °C (-13 °F to +158 °F)  
Dimensions 220.5 × 62.4 × 27 mm (H × W × D)

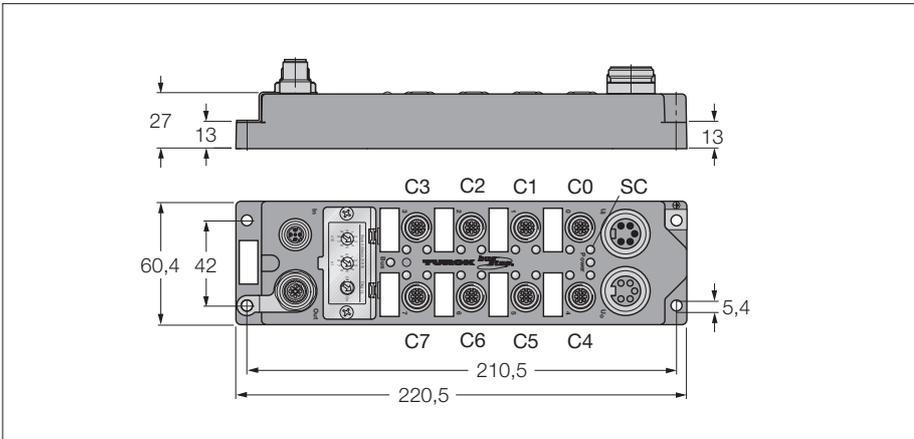

#### Approvals

# Compact fieldbus I/O modules in IP67 for PROFIBUS-DP

## Series FLDP – general information

The compact fieldbus I/O modules of the FLDP series allow direct connection of up to 32 inputs/outputs to a PROFIBUS-DP network. The I/O modules offer module-specific short-circuit diagnostics of the inputs and outputs.

Operating and load voltage are fed separately. If the load supply is switched off, the module electronics and all inputs continue operation when the outputs are turned off. In this case, the load voltage diagnostics can also be deactivated. The I/O modules support transmission rates of 12 Mbps.

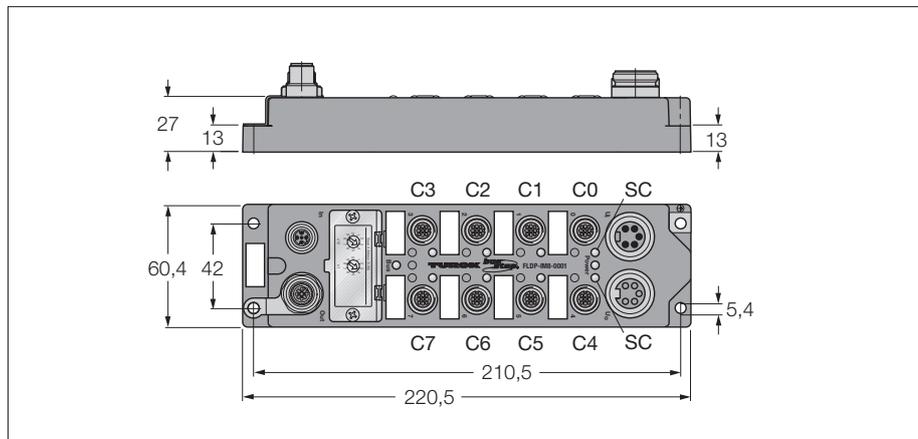

The PROFIBUS-DP connection is implemented via 5-pole, reverse-keyed M12 × 1 round connectors. The module is powered via a 7/8" round connector and can be fed through via a second 7/8" round connector. The I/O level is equipped throughout with M12 metal round connectors.

Glass-fibre reinforced plastic housings and the fully encapsulated module electronics guarantee protection degree IP67. The I/O modules are therefore particularly suited for use in harsh industrial environments.

### General technical data

<b>Characteristics</b>	Load voltage diagnostics can be disabled via rotary switch, common short-circuit diagnostics
<b>Settings</b>	
PROFIBUS-DP address	1...99 (decimal) adjustable via two coded rotary switches
Load voltage diagnostics	can be disabled via coded rotary switch (modules with digital outputs only)
Transmission rate	9.6 kbps up to 12 Mbps, automatic
<b>LEDs</b>	
Bus (dual colour LED)	green: communication, red: no communication
Power (dual colour LED)	green: operational, off: $U_b < 18$ VDC red: $U_L < 18$ V (modules with digital outputs)
Inputs	green: ON
Outputs	green: ON
Common short-circuit indication	red: short-circuit at one input
<b>Connections</b>	brass, nickel-plated
PROFIBUS	M12 × 1 connectors, reverse-keyed
Power supply	7/8" connector, 5-pole or
Inputs/outputs	female M12 × 1 connectors; 5-pole
– FLDP-IOM2012-0001 only:	2 × 19-pole Burndy connectors
<b>Housing material</b>	PA6-GF30, glass-fibre reinforced plastic housing with encapsulated electronics and nickel-plated brass connectors
Mounting	4 through-holes, Ø 5.4 mm
Degree of protection (IEC 60529/EN 60529)	IP67 (NEMA 1, 3, 4, 12, 13)
Vibration and shock tested	according to EN 60068-2-6, 2-27
Temperature range	0 °C to +55 °C (+32 °F to +131 °F)
Dimensions	
– Housings for modules with 8, 12 and 16 channels	220.5 × 62.4 × 27 mm (H × W × D)
– Housing for modules with 32 channels	220.5 × 115 × 27 mm (H × W × D)

# Compact fieldbus I/O modules in IP67 for DeviceNet™

## Type code

# Compact fieldbus I/O modules in IP67 for DeviceNet™

**TURCK**

Industrial  
Automation

Series FDNL

- Compact flat housing with up to 16 channels
- Module diagnostics (SE series) or channel-specific diagnostics (LX series)
- Power supply of the outputs is implemented via DeviceNet™

Series FDNP

- Compact flat housing with up to 16 channels,
- Module diagnostics (SE series) or channel-specific diagnostics (LX series)
- Separate connection to power supply

# Compact fieldbus I/O modules in IP67 for DeviceNet™

# Compact fieldbus I/O modules in IP67 for DeviceNet™

**TURCK**

Industrial  
Automation

## Series FDNL – General information

The compact FDNL series fieldbus I/O modules allow direct connection of up to 16 digital inputs/outputs to a DeviceNet™ network. Depending on type, the I/O modules offer channel (LX series) and module (SE series) specific wire-break/short-circuit diagnostics. The I/O modules support transmission rates of 500 Kbit/s as well as all types of DeviceNet™ communication modes, incl. "Poll", "Strobe", "Cyclic", "Change of State (COS)" and "UCMM".

electronics and also the inputs and outputs are supplied via DeviceNet™. The I/O level is equipped throughout with M12 metal round connectors.

Glass-fibre reinforced plastic housings and the fully encapsulated module electronics guarantee protection degree IP67. The I/O modules are therefore particularly suited for use in harsh industrial environments.

The DeviceNet™ connection is implemented via 5-pole, 7/8" connectors. Both the module

### General technical data

#### Characteristics

- LX series: Channel-specific short-circuit and wire-break diagnostics of inputs and outputs
- SE series: Module-specific short-circuit diagnostics of inputs and outputs

#### Settings

- DeviceNet™ address: 0...63 (decimal) adjustable via two coded rotary switches
- Transmission rate: automatic

#### LEDs

- Inputs: green: ON
- Outputs: green: ON
- wire-break and short-circuit, Only LX series (dual colour LED): yellow: wire-break, red: short-circuit
- Module status (dual colour LED): green: operational, green flashing: detection of the baud rate, red flashing: I/O short-circuit
- Network status LED (dual colour LED): green: communication, green flashing: ready to establish communication; red: communication failed, red flashing: communication time-out

#### Connections

- DeviceNet™: Nickel-plated brass; 7/8" connector, 5-pole; IN and OUT
- Inputs/outputs: female M12 × 1 connectors; 5-pole

#### Housing

- Housing: PA6-GF30, glass-fibre reinforced plastic housing with encapsulated electronics and nickel-plated brass connectors
- Mounting: via 4 through-holes, Ø 5.4mm
- Degree of protection: IP67 (NEMA 1, 3, 4, 12, 13)
- Temperature range:
  - LX series: -25 °C to +70 °C (-13 °F to 158 °F)
  - SE series: -40 °C to 70 °C (-40 °F to 158 °F)
- Dimensions: 197 × 60 × 27 mm (H × W × D)

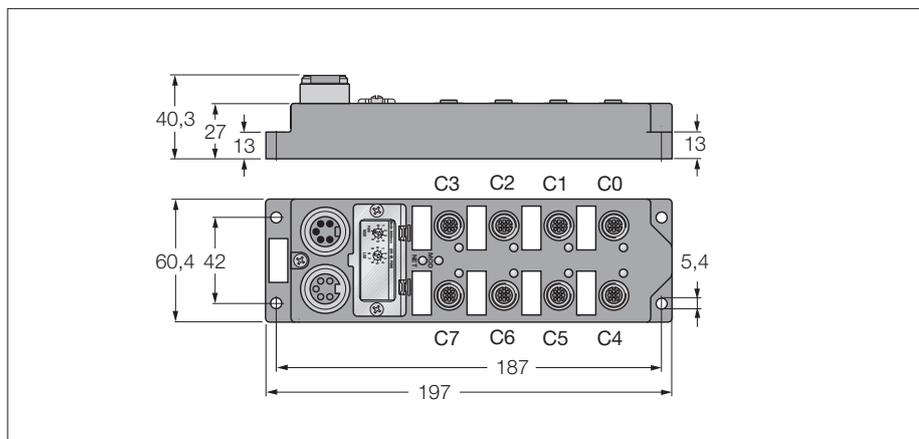

#### Approvals

# Compact fieldbus I/O modules in IP67 for DeviceNet™

**TURCK**

Industrial  
Automation

## Series FDNP – general information

The compact FDNP series fieldbus I/O modules allow direct connection of up to 16 digital inputs/outputs to a DeviceNet™ network. Depending on type, the I/O modules offer channel (LX series) and module (SE series) specific wire-break/short-circuit diagnostics.

The I/O modules support transmission rates of 500 Kbit/s as well as all types of DeviceNet™ communication modes, incl. "Poll", "Strobe", "Cyclic", "Change of State (COS)" and "UCMM".

The DeviceNet™ connection is implemented via 5-pole, 7/8" round connectors. The module electronics and the inputs are supplied via DeviceNet™; the auxiliary voltage for the outputs is also fed via a 7/8" round connector and can be fed through via a second 7/8" round connector. The I/O level is equipped throughout with metal M12 connectors.

Glass-fibre reinforced plastic housings and the fully encapsulated module electronics guarantee protection degree IP67. The I/O modules are therefore particularly suited for use in harsh industrial environments.

### General technical data

#### Characteristics

- LX series: Channel-specific short-circuit and wire-break diagnostics of inputs and outputs
- SE series: Module-specific short-circuit diagnostics of inputs and outputs

#### Settings

- DeviceNet™ address: 0...63 (decimal) adjustable via two coded rotary switches
- Transmission rate: automatic

#### LEDs

- Inputs: green: ON
- Outputs: green: ON
- wire-break and short-circuit, Only LX series (dual colour LED): yellow: wire-break, red: short-circuit
- Module status (dual colour LED): green: operational, green flashing: detection of the baud rate, red flashing: I/O short-circuit
- Network status LED (dual colour LED): green: communication, green flashing: ready to establish communication; red: communication failed, red flashing: communication time-out

#### Connections

- DeviceNet™: nickel-plated brass; 7/8" connector, 5-pole; IN and OUT
- aux power: 7/8" connector, 4-pole; IN and OUT
- Inputs/outputs: female M12 × 1 connectors; 5-pole

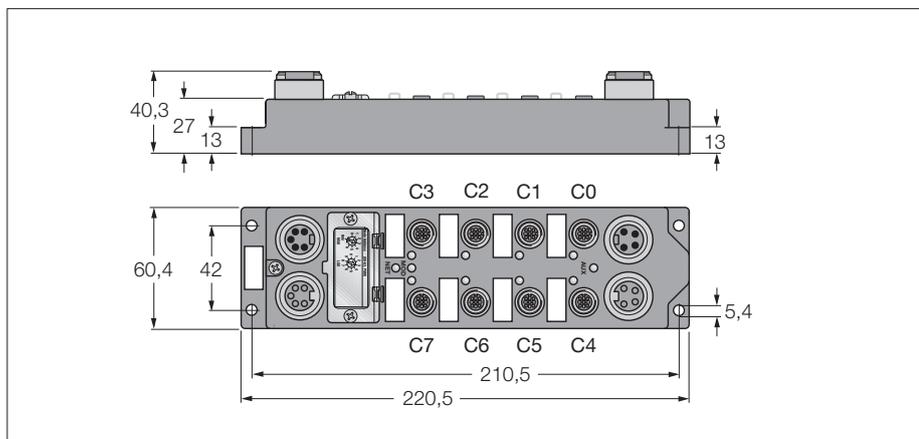

#### Housing

- Housing: PA6-GF30, glass-fibre reinforced plastic housing with encapsulated electronics and nickel-plated brass connectors
- Mounting: via 4 through-holes, Ø 5.4mm
- Degree of protection: IP67 (NEMA 1, 3, 4, 12, 13)
- Temperature range:
  - LX series: -25 °C to +70 °C (-13 °F to 158 °F)
  - SE series: -40 °C to 70 °C (-40 °F to 158 °F)
- Dimensions: 220 × 60 × 27 mm (H × W × D)

## Type code

**F G E N** - **X S G 16** - **5 0 0 1**

### Device type

(F) Compact fieldbus I/O-module

### Series

(G) Galvanically separated

### Fieldbus

(EN) Ethernet

### I/O configuration

(IM) Input module  
(OM) Output module  
(IOM) I/O module  
(XSG) freely parametrizable I/O range

### Version detection

(5001) Power supply via male 7/8",  
5-pin

### Number of channels

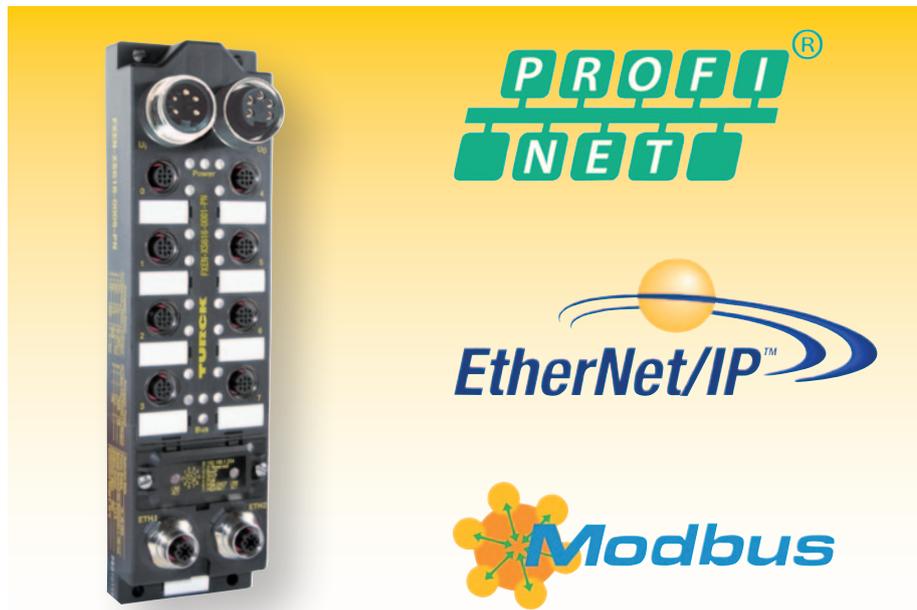

(16) 16 channels  
(88) 8 I/Os

# Compact multiprotocol I/O modules in IP67 for Ethernet

**TURCK**

Industrial  
Automation

## Multiprotocol I/O systems: One device – three Ethernet protocols

The devices marketed by TURCK under the concept of “multiprotocol”, share the same functionality.

- **Multiprotocol:**  
The gateways as well as the compact I/O modules combine the three Ethernet protocols PROFINET IO, EtherNet/IP™ and Modbus TCP in one device.
- **Line topology**  
All devices have a 3-port switch installed, allowing a network to be arranged in line topology.
- **Prioritized start-up:**  
A lean architecture and optimized Ethernet protocol stacks enable accelerated start-up. Thanks to these features, the devices support Fast Startup (FSU) in PROFINET IO or Quick Connect (QC) in EtherNet/IP™ applications.

## New TURCK multiprotocol platform

A TURCK multiprotocol device can be operated at a PROFINET IO, EtherNet/IP™ or a Modbus TCP system without having to be reprogrammed. After connecting the power, the integrated snooping functionality enables the device to identify the Ethernet protocol requesting for connection buildup during a predefined recognition phase. If one of the three protocols is identified, the device automatically selects this protocol and ignores the other two.

The implementation of the protocols leaves nothing to be desired: When operated as a PROFINET IO device, it supports prioritized start-up, the media redundancy protocol (MRP), topology recognition as well as address allocation via Link Layer discovery Protocol (LLDP). Both, QuickConnect (QC) and Device Level Ring (DLR) are implemented in EtherNet/IP™.

The multiprotocol interface from TURCK helps to reduce the variety of fieldbus devices considerably. Multiprotocol I/O systems can thus be installed in machines and systems that are largely built with identical components but only need a customer specific control resp. master. Not only purchase and stock keeping of spare-parts profit from these obvious advantages, also electrical construction plans can just be duplicated.

# Compact multiprotocol I/O modules in IP67 for Ethernet

## Selection guide

		Number of inputs	Number of outputs	Number of M12 connectors	Maximum load current [A]	Page
Ethernet	Ident-no.					
FGEN-IM16-5001	6825427	16	-	8	-	320
FGEN-OM16-5001	6825430	-	16	8	2	321
FGEN-IOM88-5001	6825424	8	8	8	2	322
FGEN-XSG16-5001	6825421	16 configurable channels		8	2	323

# Compact multiprotocol I/O modules in IP67 for Ethernet

**TURCK**

Industrial  
Automation

## Series FGEN – general information

The compact fieldbus I/O modules of the FGEN series are designed to interface up to 16 digital I/Os to an Ethernet network. The Ethernet application layer PROFINET IO, EtherNet/IP™ and Modbus TCP are processed with a single module from the FGEN series. The I/O modules feature a channel-related diagnostics of the outputs and a slot-related diagnostics of the inputs. The Ethernet connection is established via a 4-pin D-coded round connector M12 × 1.

The I/O modules have an integrated switch, allowing a network to be arranged in line topology. The module is powered via a 7/8" connector and can be looped through via a second 7/8" connector. The I/O connection level is throughout equipped with M12 round connectors. The glass-fiber reinforced plastic housing and the fully encapsulated module electronics guarantee IP67 rated protection. These I/O modules are thus particularly suited for use in harsh industrial environments.

### General technical data

#### EtherNet/IP™

Addressing	acc. to EtherNet/IP™
QuickConnect	< 100 ms
DLR	supported
Number of connections	6

#### Modbus TCP

Addressing	Static IP, BOOTP, DHCP
QuickConnect	FC1, FC2, FC3, FC4, FC5, FC6, FC15, FC16, FC23
Number of connections	6

#### PROFINET IO\*

Addressing	DCP
Conformance Class	B (RT)
MiniCycleTime	1 ms
Fast Startup	< 150 ms
Diagnostics	acc. to PROFINET Alarm Handling
Topology detection	supported
Automatic addressing	supported

#### System data

Transmission rate	10/100 Mbps; Full/Half Duplex; Auto Negotiation; Auto Crossing
Protocol detection/changeover	automatic
Web server	in preparation

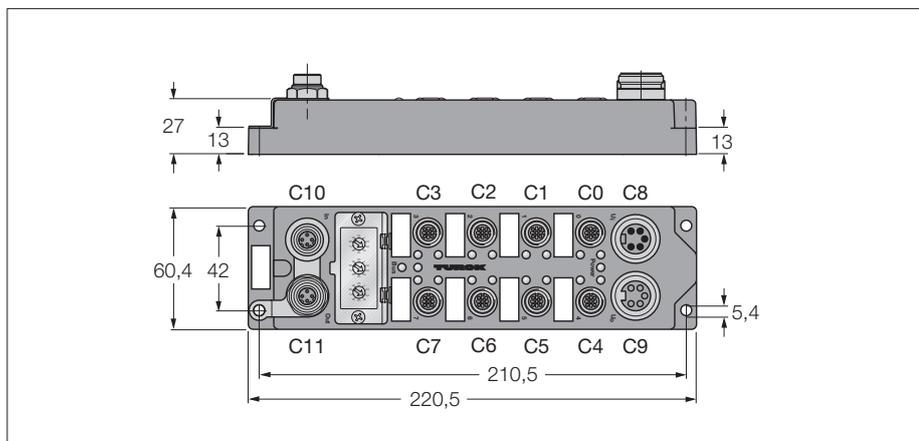

#### Mechanical data

Dimensions	220.5 × 60.4 × 27 mm
Housing material	PA6-GF30, Glass-fiber reinforced plastic housing
Mounted	via 4 holes, Ø 5.4 mm
Temperature range	
- Operation	0...+55 °C
- Storage	-25...+70 °C
Vibration	acc. to EN60068-2-6
Shock	acc. to EN60068-2-27

# Compact multiprotocol I/O module for Ethernet

## 16 digital pnp inputs

### FGEN-IM16-5001

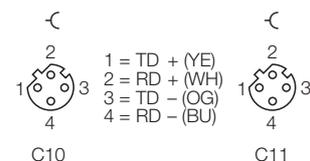

- Multiprotocol I/O module for Modbus TCP, EtherNet/IP™ and PROFINET
- EtherNet/IP™ supports QuickConnect (QC)
- PROFINET IO supports fast start-up (FSU)
- Galvanically separated power supply
- Input diagnostics per slot
- Diagnostics and user data mappable
- Two channels per connector
- Fibre-glass reinforced PA6 housing
- Vibration and shock-resistant
- Encapsulated module electronics
- Metal connector
- Degree of protection IP67

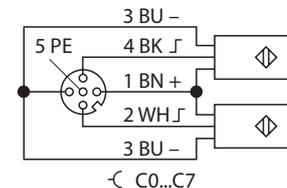

<b>Type</b>	FGEN-IM16-5001
<b>Ident-No.</b>	6825427
<b>Supply voltage</b>	24 VDC
Admissible range	18...30 VDC
Voltage supply connection	2 x 5-pin 7/8" connectors
Potential separation	Between operating, load and bus voltage
<b>System data</b>	
Transmission rate	10/100 Mbps; Full/Half Duplex; Auto Negotiation; Auto Crossing
Connection technology Ethernet	2 x female M12 x1, 4-pin, D-coded automatic
Protocol detection/changeover	automatic
Web server	in preparation
<b>Inputs</b>	
Number of channels	(16) 3-wire pnp sensors
Input voltage	18...30 VDC via operating voltage
Supply current	< 120 mA per channel, short-circuit proof
Switching threshold	2 mA / 4 mA
Input delay	2.5 ms
Max. input current	6 mA
<b>Operating temperature</b>	0 ... +55 °C

For mapping table and LED status indications see technical data sheet on [www.turck.com](http://www.turck.com)

# Compact fieldbus I/O-modules in IP20

## Type code

# Compact fieldbus I/O-modules in IP20

**TURCK**

Industrial  
Automation

Series FDN/FDP with 16 channels

Series FDN with 8 channels

- Extremely compact for restricted space conditions
- High flexibility through freely configurable I/Os
- Different potential groups for the I/O range
- Inputs: PNP, short-circuit protected
- Outputs: 0.5 A and 1.8 A (FDN20-16XSG), short-circuit protected
- Extended temperature range  
DeviceNet™: -40...+70 °C  
PROFIBUS-DP: -40...+55 °C

## Small housing style, flexible and inexpensive

The new compact IP20 modules are designed for use where conventional I/O bus terminal systems are unsuitable due to their large dimensions. In applications with a small number of signals, they have the edge on modular systems.

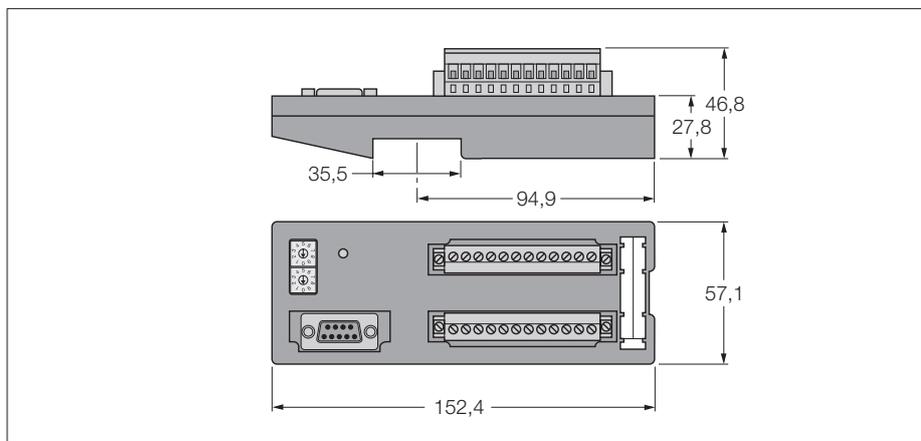

Low space requirements as well as simple handling make work easy for the design engineer and ensures fast setup.

Depending on type, the modules offer 8 or 16 digital channels. If necessary these can be configured as inputs or outputs, with the I/O supply circuits arranged in three galvanically isolated levels. In this way the modules offer optimum flexibility in an extremely compact design.

# Fieldbus I/O module for PROFIBUS-DP

## 16 configurable channels

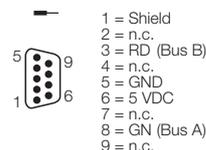

### FDP20-16XSG

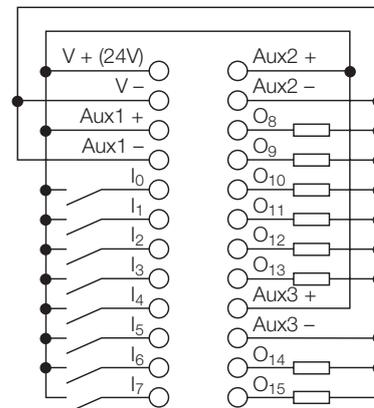

- Rotary coding switch for adjustment of the node address
- Degree of protection IP20
- 3 I/O power supply groups each galvanically isolated
- 16 configurable channels, DI or DO
- 24 VDC, pnp
- Output current: 0.5 A

<b>Type</b>	FDP20-16XSG
<b>Ident-No.</b>	6611466
<b>Number of channels</b>	16
<b>Electrical isolation</b>	I/Os to PROFIBUS
<b>Internal power consumption</b>	< 75 mA plus I/O supply
<b>Admissible range field supply</b>	18...30VDC
<b>Electrical isolation</b>	I/Os to PROFIBUS
<b>Fieldbus transmission rate</b>	9.6 kbps up to 12 Mbps
<b>Fieldbus addressing range</b>	1...99
<b>Fieldbus addressing</b>	2 decimally coded rotary switches
<b>Inputs</b>	
Input voltage	18...30VDC
Low level signal voltage	< 4 V
High level signal voltage	8...24 V
Low level signal current	< 0.5 mA
High level signal current	1...3.4 mA
Input delay	2.5 ms
Max. input current	700 mA
<b>Outputs</b>	
Output voltage	18...30 VDC, short-circuit proof
Output current per channel	0.5A (from Aux)
Switching frequency	≤ 100 Hz
<b>Operating temperature</b>	-40 °C...55 °C

## 4 digital inputs, 4 configurable channels

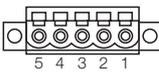

### FDN20-4S-4XSG

- Rotary coding switch for adjustment of the node address
- Degree of protection IP20
- 4 digital inputs
- 4 configurable channels, DI or DO
- 24 VDC
- pnp
- Output current: 0.5 A

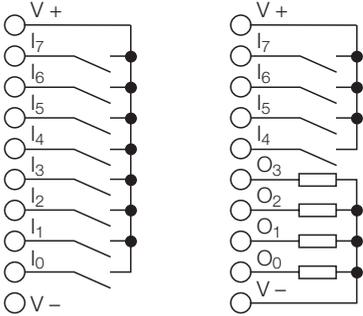

<b>Type</b>	FDN20-4S-4XSG
<b>Ident-No.</b>	6611359
<b>Number of channels</b>	8
Internal power consumption	< 50 mA plus I/O supply
Voltage supply via DeviceNet	24 VDC
Admissible range field supply	11...26 VDC
<b>Fieldbus transmission rate</b>	125 kbps to 500 kbps
Fieldbus addressing range	0...63
Fieldbus addressing	2 decimally coded rotary switches
<b>Inputs</b>	
Input voltage	11...26 VDC
Low level signal voltage	< 4 V
High level signal voltage	8...24 V
Low level signal current	< 0.5 mA
High level signal current	1...3.4 mA
Input delay	2.5 ms
Max. input current	total: 700 mA
<b>Outputs</b>	
Output voltage	18...26 VDC, short-circuit proof
Output current per channel	0.5 A (from DeviceNet™)
Switching frequency	≤ 100 Hz
<b>Operating temperature</b>	-40 °C...70 °C

# The BL20 I/O system – The integrator for fieldbus, ident system, motor starter

## Gateway – The system control

- The interface to the higher level control system
- Gateways e.g. for PROFIBUS-DP, CANopen, DeviceNet™, Ethernet/IP™ and Modbus TCP – also available as economy version

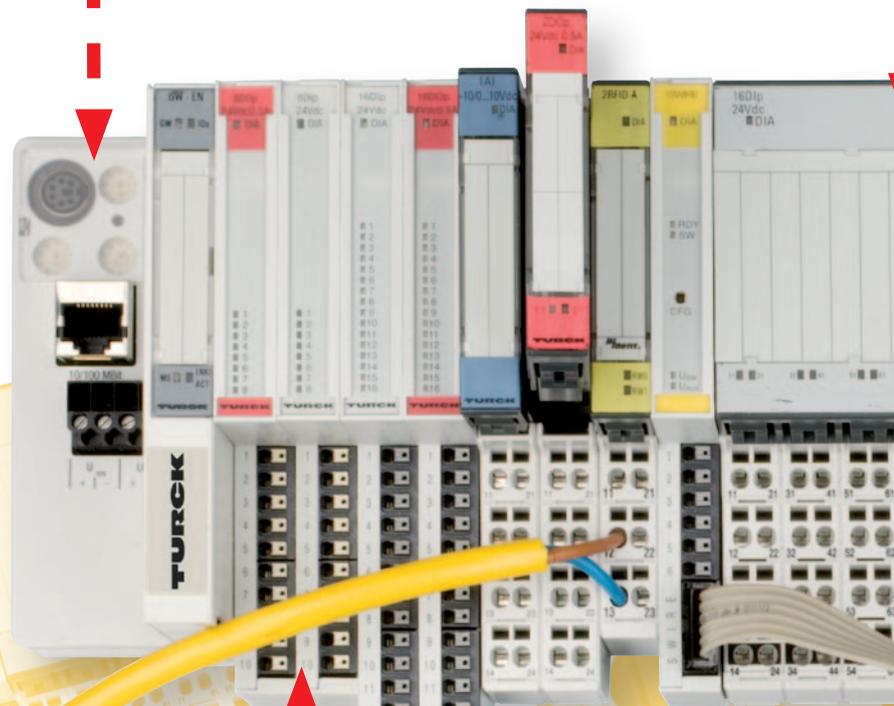

**CODESYS**

## Optional – CODESYS programmable according to IEC 61131

- Relieves higher-level controller and bus system
- I/O modules independent of the fieldbus
- Prefabricated function blocks e.g. for the RFID system *BL ident*®

## Economy I/O – extremely compact and competitively priced

- 8 or 16 I/Os in only 12.5 mm
- Integrated connection level with “Push-in” tension spring technology, no tools necessary
- Economy I/Os combinable with standard I/O slices

## *BL ident*®, the RFID system

- Up to 8 RFID channels
- Pre-processing in programmable gateway relieves the higher-level controller.

**Modbus TCP**

**Standard I/O – multifunctional and system friendly**

- Exchangeable electronic modules – disconnection of field wiring is not necessary.
- Up to two neighbouring modules are exchangeable during normal system operation without disrupting system functions
- Single or block modules with screw or cage clamp terminals

**I/O-ASSISTANT**

- Planning, configuration, commissioning and diagnostic software
- Based on FDT/DTM technology
- Available as freeware on [www.turck.com](http://www.turck.com)

**Motor starter**

- 3 connection-slices per gateway
- Up to 16 devices per slice
- Simple wiring

**CANopen**

**PROFI**  
PROCESS FIELD BUS  
**BUS**

**DeviceNet™**

## Easy programming with CODESYS according to IEC 61131-3

The programmable gateways become decentral control units with the CODESYS programming software. The graphical programming interface supports all IEC-61131-3 programming languages

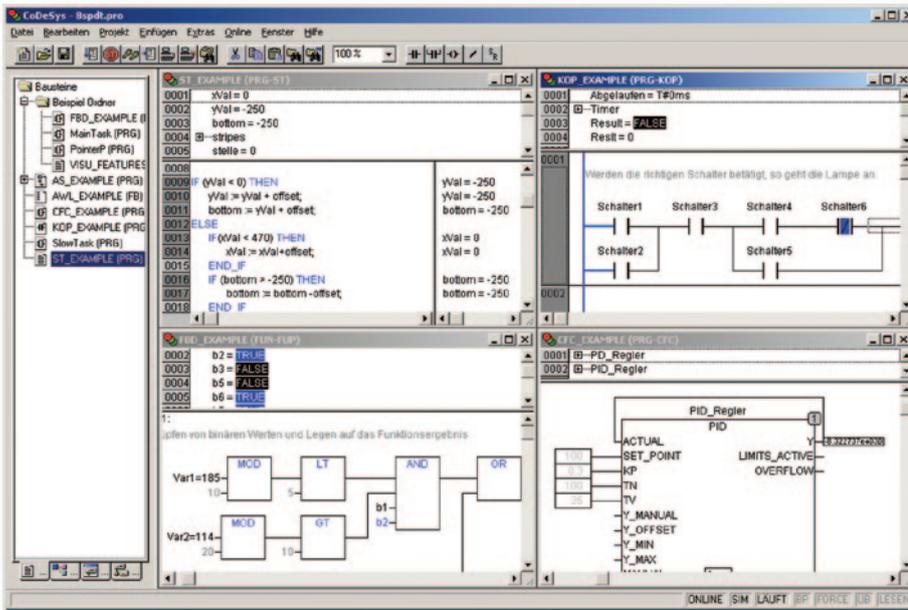

# CODESYS

- Statement list ( STL )
- Ladder Diagram ( LD )
- Continuous Function Chart ( CFC )
- Structured Text ( ST )
- Sequential Function Chart ( AS )

## Simple connection

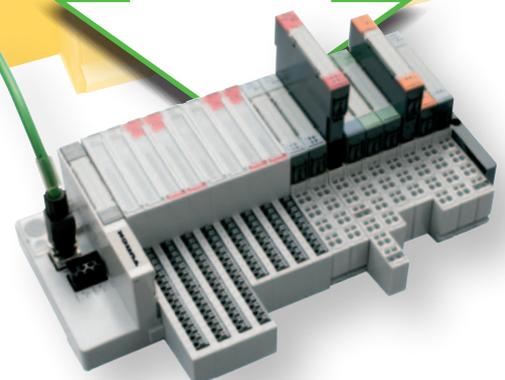

- Fast and simple networking of heterogeneous systems
- Standard transmission protocols such as TCP/IP and UDP/IP
- Global network variables
- Bidirectional data exchange between CODESYS systems
- No additional programming required

## Project planning and configuration

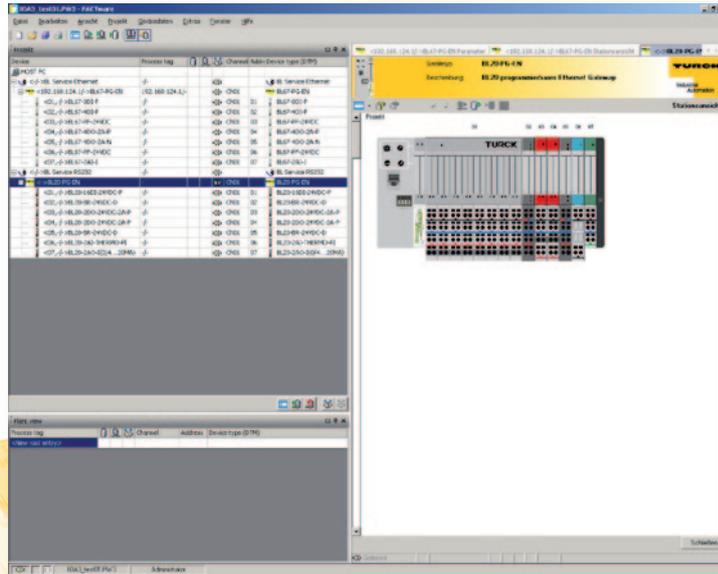

- Target Support Package as a driver for the target system
- Drag and Drop function for hardware configuration
- Standard editor for I/O configuration and parameterisation
- Symbolic display of variables for I/O addresses
- Numerous diagnostics and commissioning functions
- Function blocks e. g. for the RFID system *BL ident®*

Data-exchange via Ethernet

## Easy parameterisation with the I/O-ASSISTANT on the basis of FDT/DTM technology

- System configuration, parameterisation and diagnostics with a graphical interface based on FDT/DTM technology
- DTMs can be integrated in any FDT frame application for configuration, commissioning and maintenance
- I/O-ASSISTANT and DTMs are available as freeware on [www.turck.com](http://www.turck.com)

## Description

The configuration software I/O-ASSISTANT supports you in planning and implementation of your I/O system. No matter if you are online or offline, the I/O-ASSISTANT simplifies configuration and parameterisation of the modules.

This software is also extremely helpful in system set-up and testing.

## Functions

- Supporting software tool
- Selection of the required modules
- Offline planning and configuration of BL20 modules
- Configuration, parameterisation and commissioning of individual modules
- Reading and setting of process data
- Commissioning help for testing the wiring and sensors without PLC
- Realistic display of configured BL20 components
- Automatic documentation of configured BL20 systems

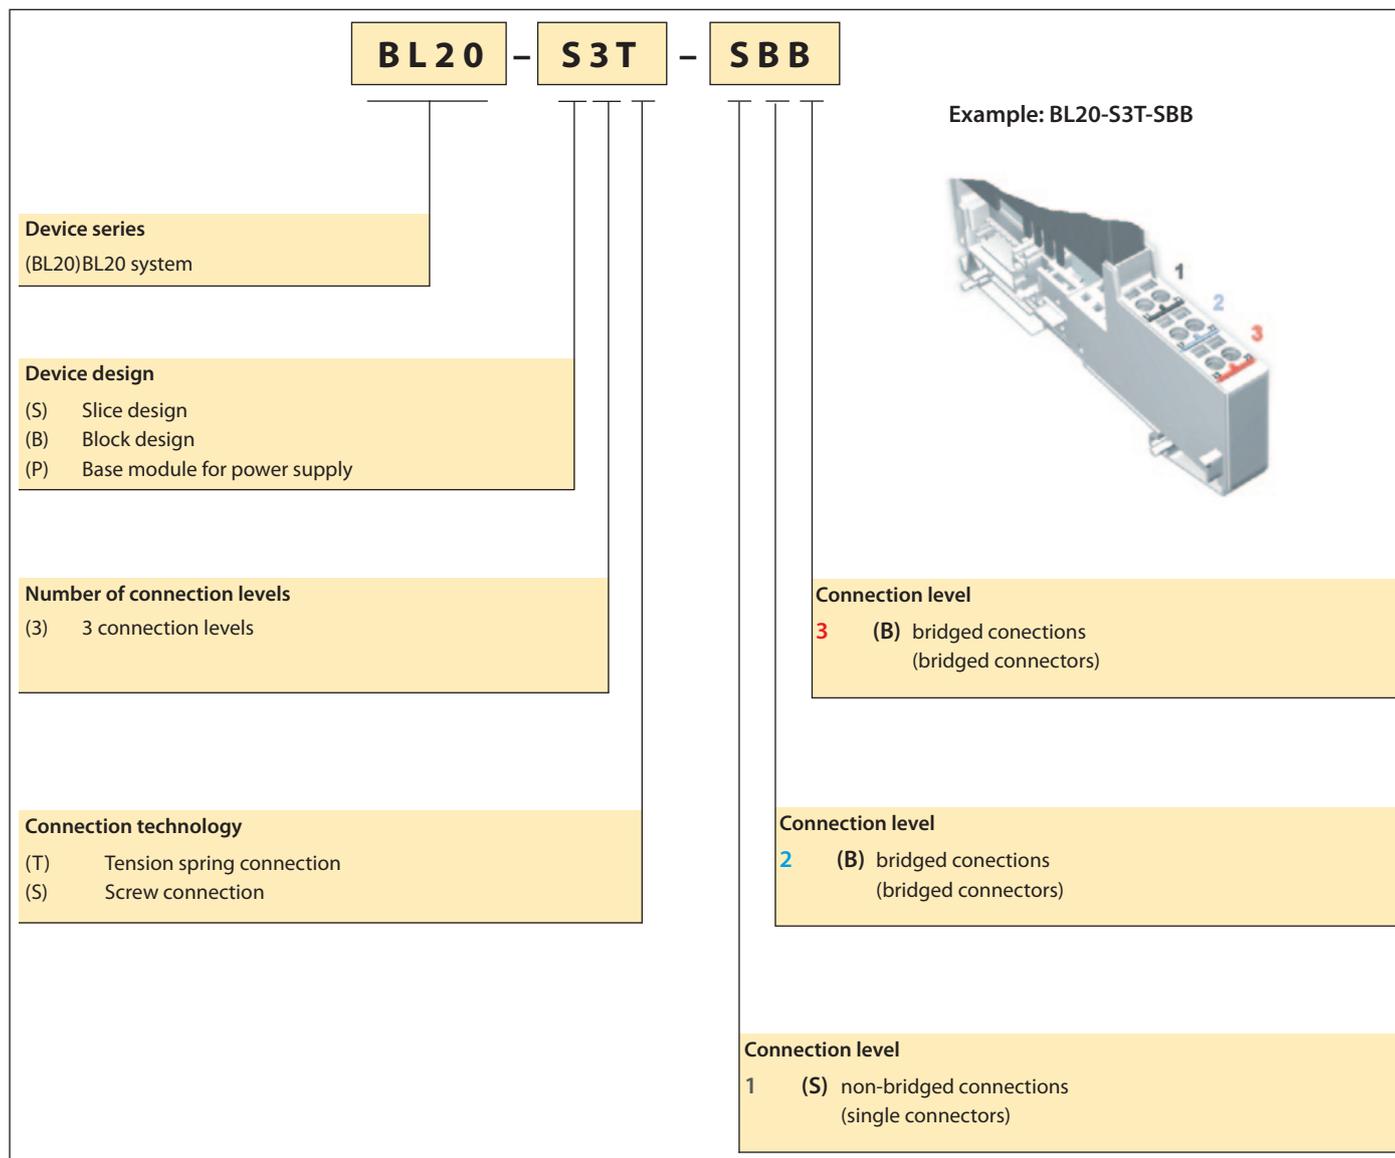

# BL20 Electronic modules – Type code and colour code

## Electronic module – Type code

Marking	Designation	Examples
GWBR	Gateway with integrated supply	BL20-GWBR-PBDP
PBDP	PROFIBUS-DP	BL20-GWBR-PBDP
E	ECONOMY modules	BL20-E-8DI-24VDC-P
BL20-8/-E-8	Number of channels	BL20-E-8DI-24VDC-P

# BL20 – System supply

## General system power supply

The BL20 system features two power circuits:

- The internal module bus feeds the module electronics and the gateway.
- The field supply feeds all connected fieldbus devices.

## Forming potential groups

Bus-Refreshing modules as well as Power-Feeding modules can be used for the creation of potential groups. Modules with 24 VDC and 120/230 VAC field supply should not be used in the same potential group. The use of digital input modules for 120/230 VAC requires the creation of a separate potential group with the Power-Feeding module BL20-PF-120/230VAC-D.

## Module bus supply

The voltage supply for the module bus is integrated in current BL20 gateways. If the module bus is not sufficiently supplied (max. 1.5 A), a second Refreshing-Module has to be applied – see chapter **Supply concept** on the next page .

**NOTE:** Bus-Refreshing modules can not be used in combination with the Economy gateway for PROFIBUS-DP.

## Field supply

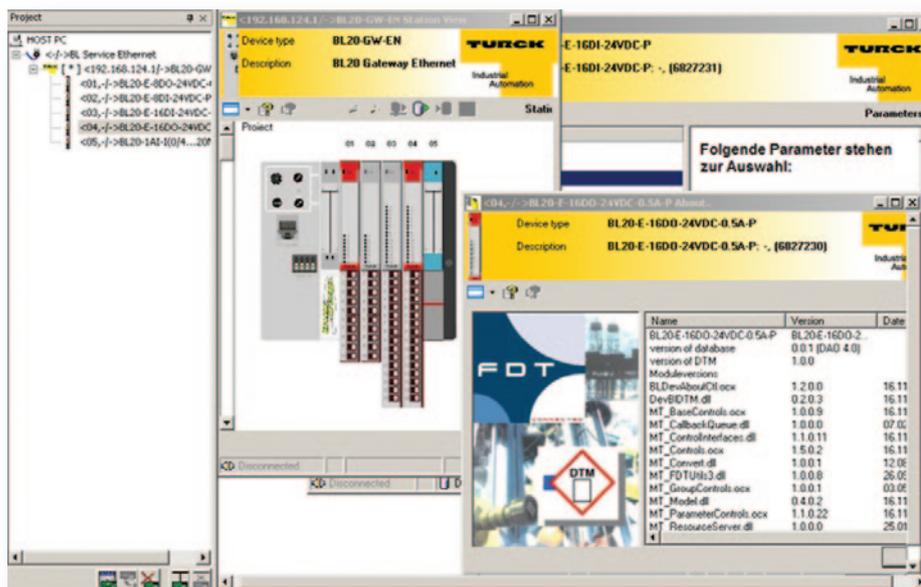

The field supply is provided by the gateway. A Power-Feeding module has to be used if the field supply of fieldbus nodes reaches 10 A or a new potential group is required (see section to the left).

## System planning

For the planning of many complex BL20 stations, different factors have to be considered. For example rated current consumption of the modules, number of modules, parameters and data volume and possible restrictions imposed by the higher level fieldbus.

The I/O-ASSISTANT (p. 339), which can be downloaded from our website checks all relevant parameters and simplifies project planning considerably.

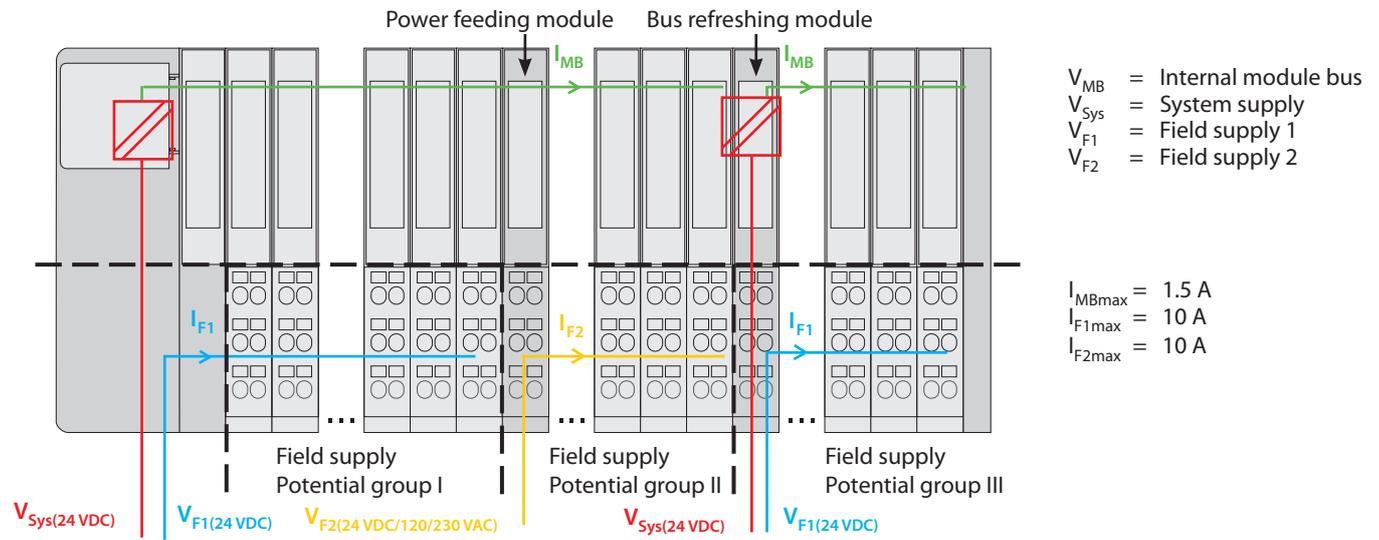

The I/O-ASSISTANT is also able to generate dimension drawings and documentation of the stations. Reading and setting of I/Os is also possible which proves very helpful for commissioning. Furthermore, module parameters can be set.

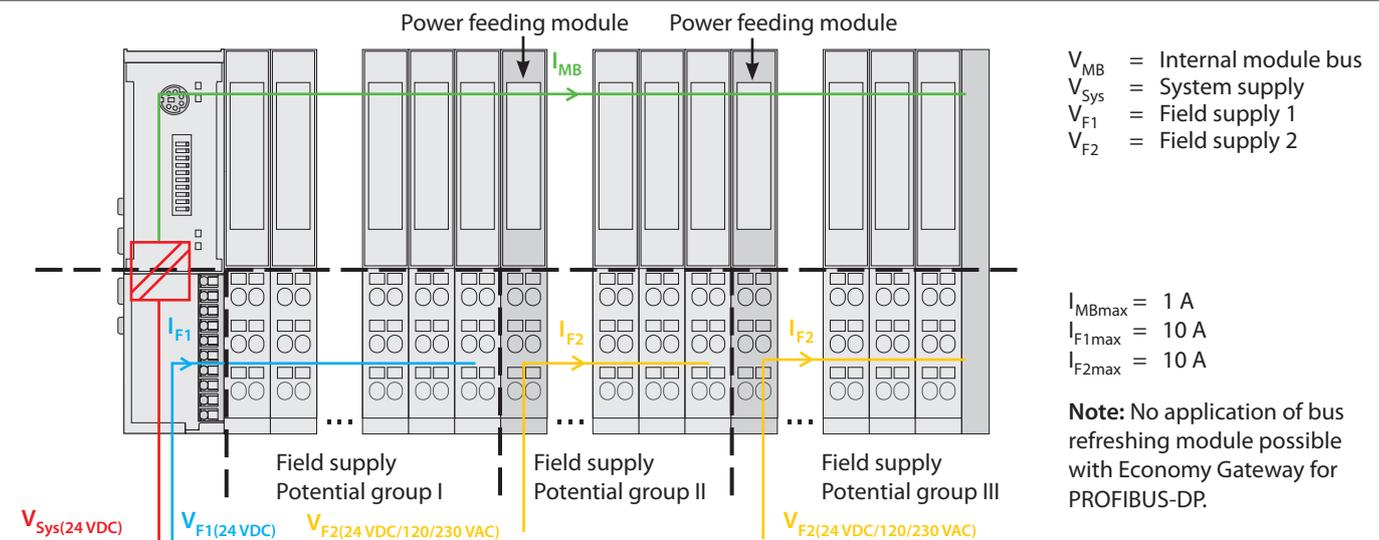

<sup>1</sup> I<sub>MB</sub>: current via the module bus

<sup>2</sup> I<sub>EI</sub>: electrical operating current (field supply)

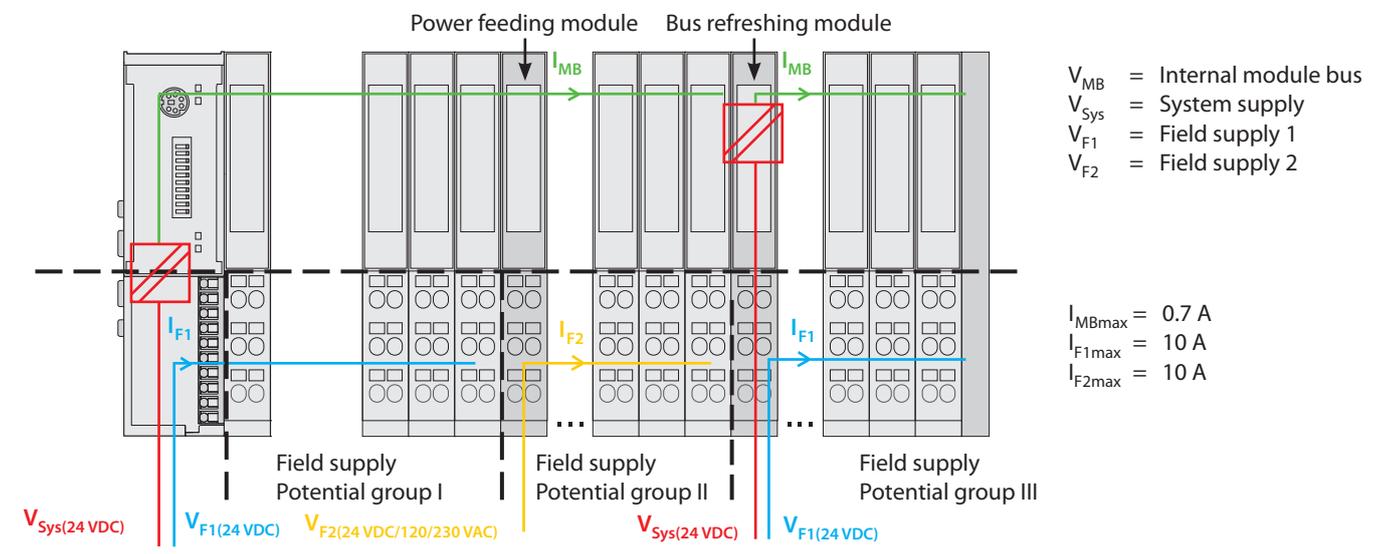

## Standard gateways (with integrated power supply)

## Economy gateway for PROFIBUS-DP (with integrated power supply)

## Economy gateway for DeviceNet™ and CANopen (with integrated power supply)

## C-rail (cross connection)

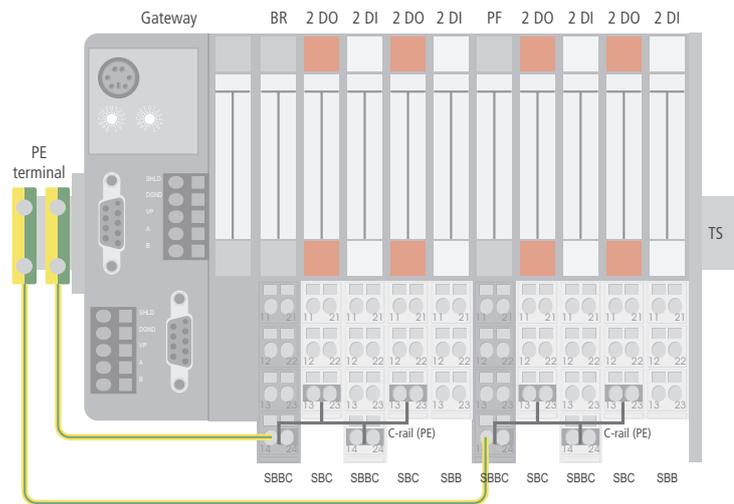

The C-rails run through all I/O base modules. The C-rail of the base modules for power distribution modules is mechanically separated; thus potentially isolating the adjoining supply groups.

## Using the C-rail as a protective earth

The C-rail can be used as required in the application, for example, as a protective earth (PE). In this case, the PE connection of each power distribution module must be con-

nected to the mounting rail via an additional PE terminal (see accessories), which is available as an accessory.

## Access to C-rail

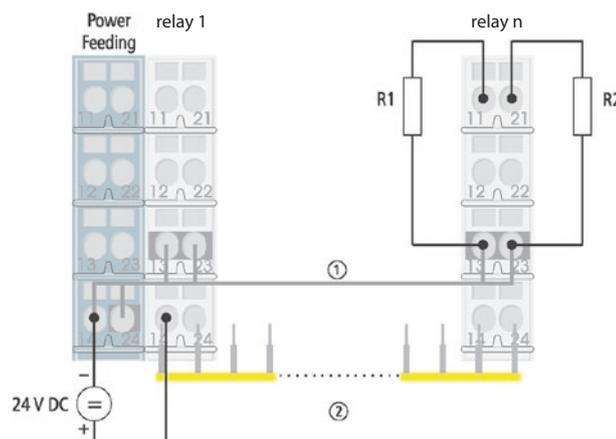

Access to the C-rail is made via base modules with a C in their designation, for example: BL20-S4T-SBCS. The corresponding connection level is indicated by a thick black line on all base modules for BL20 I/O modules.

With base modules for power distribution modules, the black line is above the connection 24 only. This makes clear that the C-rail is separated from the adjoining potential group to its left. A maximum load of 24 VDC to the C-rail is allowed, but never 120/230 VAC.

## Using the C-rail with relay modules

The C-rail can be used to supply a common voltage when relay modules are to be used. To accomplish this, the load voltage (24 VDC) is connected to a power distribution module with the base module BL20-P4x-SBBC using either tension springs or screw connections. All the following relay modules are supplied with 24 VDC via the C-rail (see ①, Fig. below). The cross-connection of the individual relay modules is achieved using the cross-connector QVR (see ②, Fig. below).

If the C-rail is to be used for the joint supply of voltage to relay modules, then there must subsequently be a further power distribution module used for the potential isolation of the following BL20 modules. The C-rail can again be put on other uses (for example, as a PE) once the potential isolation has been made.

# BL20 – General technical data

## BL20 modules – technical data

### Supply voltage/auxiliary power

Nominal value (provided for other modules)	24 VDC
Residual ripple	according to EN 61131-2
Electrical isolation ( $U_L^2$ to $U_{SYS}^3$ / $U_L$ to fieldbus/ $U_{SYS}$ to fieldbus)	yes, via opto-couplers
Ambient temperature	
Horizontal mounting ambient temperature	0 ... +55 °C
Vertical mounting ambient temperature	0 ... +55 °C
Storage temperature	-25 ... +85 °C
Relative humidity to EN 61131-2/EN 50178	5 ... 95 % (indoor), Level RH-2, no condensation (storage at 45 °C, no functional test)
Corrosive gases	
SO <sub>2</sub>	10 ppm (rel. humidity < 75 %, no condensation)
H <sub>2</sub> S	1.0 ppm (rel. humidity < 75 %, no condensation)
Vibration resistance	
10 to 57 Hz, constant amplitude 0.075 mm, 1 g	yes
57 to 150 Hz, constant amplitude 1 g	yes
Vibration type	Variable frequency runs at a rate of change of 1 octave/min
Vibration duration	20 variable frequency runs per coordinate axis
Shock resistance as per IEC 68-2-27	18 shocks, half-sine 15 g peak value/11 ms, for both ±-directions per spatial coordinate
Repeated shock resistance as per IEC 68-2-29	1000 shocks, half sine 25 g peak value/6 ms, for both ±-directions per spatial coordinate
Drop and topple	
Fall height (weight < 10 kg)	1.0 m
Fall height (weight 10 to 40 kg)	0.5 m
Test runs	7
Electromagnetic compatibility (EMC) as per EN 50082-2 (Industrial)	
Static electricity as per EN 61000-4-2	
Air discharge (direct)	8 kV
Relay discharge (indirect)	4 kV
Electromagnetic HF fields as per EN 61000-4-3 and ENV 50204	
Conducted interference, induced by HF fields as per EN 61000-4-6	10 V
Radiated interference as per EN 50081-2 (industrial)	to EN 55011 class A <sup>1</sup> , group 1

<sup>1</sup> Use in residential areas may lead to functional errors. Additional suppression measures are necessary!

<sup>2</sup>  $U_L$  : Field supply

<sup>3</sup>  $U_{SYS}$  : System supply

## BL20 stations – approvals and tests

Approvals	CE
Tests (EN 61131-2)	
Cold	DIN IEC 68-2-1, temperature -25 °C, duration 96 h; device not operational
Dry heat	DIN IEC 68-2-2, temperature +85 °C, duration 96 h; device not operational
Damp heat, cyclic	DIN IEC 68-2-30, temperature +55 °C, duration 2 cycles of 12 h; device operational
Temperature change	DIN IEC 68-2-14, temperature 0 to +55 °C, duration 2 cycles, temperature change per minute; device operational
Operating life MTBF	120000 h
Extraction/insertion cycles for electronics modules	20
Pollution level as per IEC 664 (EN 61131)	2
Degree of protection (IEC 60529/EN 60529)	IP20

## Base modules – technical data

	BL20 Base module	BL20 ECONOMY module
Degree of protection (IEC 60529/EN 60529)	IP20	IP20
Stripped length	8 mm	8 mm
Max. cross-section at terminal	0.5...2.5 mm <sup>2</sup>	0.14...1.5 mm <sup>2</sup>
Conductors to be clamped		
"e" solid H 07V-U	0.5...2.5 mm <sup>2</sup>	0.25...1.5 mm <sup>2</sup>
"f" stranded H 07V-K	0.5...1.5 mm <sup>2</sup>	0.25...1.5 mm <sup>2</sup>
"f" with core-end ferrules to DIN 46228/1 (ferrules are crimped gas-tight)	0.5...1.5 mm <sup>2</sup>	0.25...1.5 mm <sup>2</sup>
on wire end sleeves with plastic collar	0.25...0.75mm <sup>2</sup>	0.25...0.75 mm <sup>2</sup>
Finger test to IEC 947-1/1988	A1	A1
Rating data in accordance with VDE 0611 part 1/8.92/IEC 947-7-1/ 1989		
Rated voltage	250 V	250 V
Rated current	17.5 A	17.5 A
Rated cross-section	1.5 mm <sup>2</sup>	1.5 mm <sup>2</sup>
Rated surge voltage	4 kV	4 kV
Pollution degree	2	2
Connection method in TOP direction	Tension spring connector or screw terminal	Tension spring connector

- Multiprotocol interface between the BL20 system and the Ethernet protocols Modbus TCP and EtherNet/IP™ and PROFINET IO
- EtherNet/IP™ supports QuickConnect (QC)
- PROFINET IO supports fast start-up (FSU)
- Integrated switch 10/100 Mbps
- Two RJ45 males for fieldbus connection
- Push-in clamps for connection of power supply

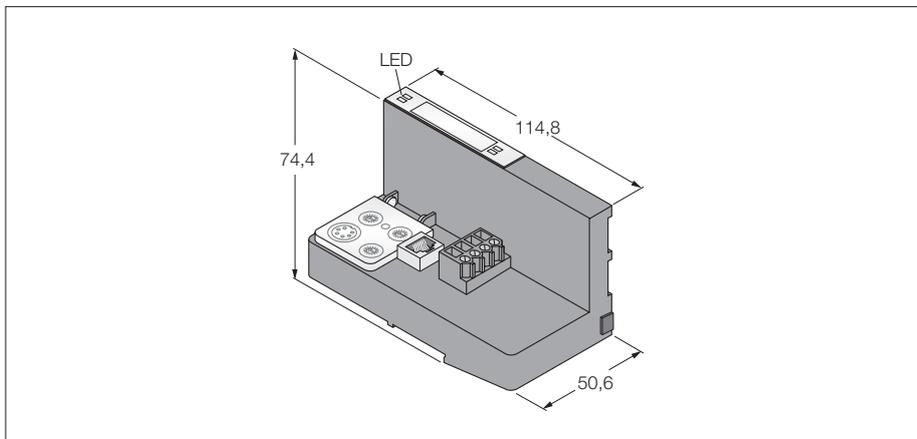

<b>Type</b>	BL20-E-GW-EN
<b>Ident-No.</b>	6827329
<b>Supply voltage</b>	24 VDC
Admissible range	18...30 VDC
Rated current from module bus	≤ 200 mA
Max. system supply current	0.4 A
Max. load current I <sub>o</sub>	10 A
Voltage supply connection	push-in clamps
<b>System data</b>	
Transmission rate	10/100 Mbps; Full/Half Duplex; Auto Negotiation; Auto Crossing
Connection technology Ethernet	2 × RJ45, female
Protocol detection/changeover	automatic
Service interface	Mini-USB, Ethernet
Web server	in preparation
<b>Modbus TCP</b>	
Addressing	Static IP, BOOTP, DHCP
Supported function codes	FC1, FC2, FC3, FC4, FC5, FC6, FC15, FC16, FC23
Number of connections	6
<b>EtherNet/IP™</b>	
	(available Q1/2013*)
Addressing	acc. to EtherNet/IP™ specification
Quick Connect (QC)	< 150 ms
Device Level Ring (DLR)	supported
Number of connections	6
<b>PROFINET IO</b>	
	(available Q1/2013*)
Addressing	DCP
Conformance Class	B (RT)
MinCycleTime	1 ms
Fast Startup	< 150 ms
Diagnostics	acc. to PROFINET IO Alarm Handling
Topology detection	supported
Automatic addressing	supported
<b>Operating temperature</b>	0 to +55 °C

**Field supply/system supply**

\* The current device firmware supports Modbus TCP, the EtherNet/IP™ and PROFINET IO protocols will be included in phase 2

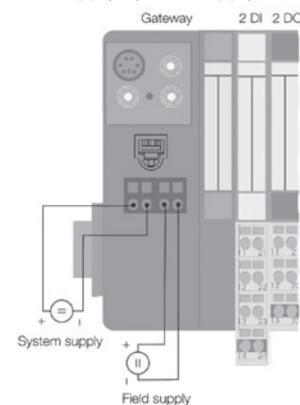

**Gateway for BL20 I/O system**  
**Interface for EtherNet/IP™ supply inclusive**  
**BL20-GW-EN-IP**

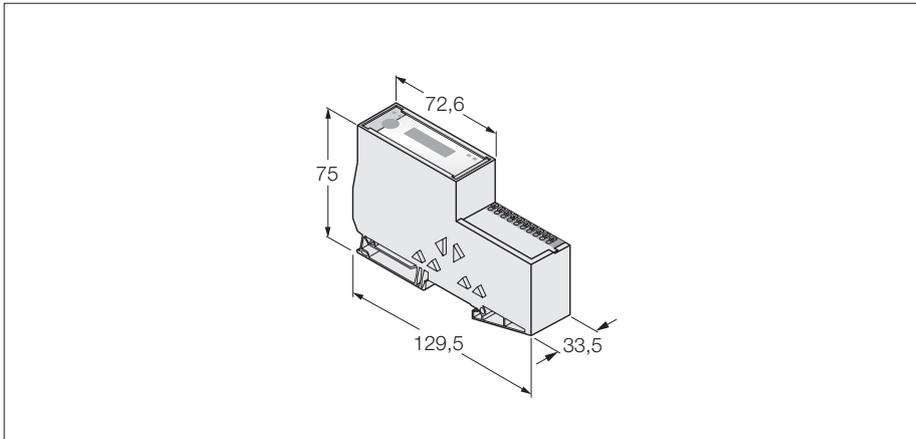

- Rotary coding switch for adjustment of the node address
- Degree of protection IP20
- 2 × end brackets BL20-WEW35/2-SW
- 1 × end plate BL20-ABPL
- With integrated supply
- LEDs for display of supply voltage, common alarm and bus errors
- Interface between the BL20 system and EtherNet/IP
- 10/100 Mbps
- RJ45 socket

<b>Type</b>	BL20-GW-EN-IP
<b>Ident-No.</b>	6827247
<b>System power supply</b>	24 VDC / 5 VDC
Field supply	24 VDC
Admissible range	18...30 VDC
Rated current from module bus	≤ 500 mA
Max. field supply current	10 A
Max. system supply current	1.5 A
Voltage supply connection	screw connection
<b>Fieldbus transmission rate</b>	10/100 Mbps
Fieldbus addressing	rotary switch, BOOTP, DHCP, IO-ASSISTANT
Service interface	PS/2 socket for I/O-ASSISTANT
Fieldbus connection technology	RJ45 socket
Voltage supply connection	screw connection
<b>Operating temperature</b>	0 to +55 °C

**Field supply/system supply**

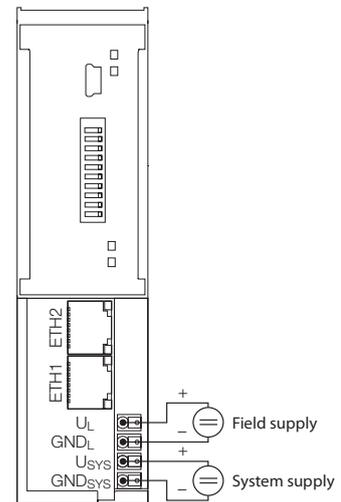

Gateway for BL20 I/O system  
Interface for EtherNet/IP™ supply inclusive  
BL20-E-GW-EN-IP

- DIP switch rotary for adjustment of the node address
- Degree of protection IP20
- 2 × end brackets BL20-WEW35/2-SW
- 1 × end plate BL20-ABPL
- With integrated supply
- LEDs for display of supply voltage, common alarm and bus errors
- Interface between the BL20 system and EtherNet/IP™
- 10/100 Mbps
- Integrated switch
- 2 × RJ45 socket

<b>Type</b>	BL20-E-GW-EN-IP
<b>Ident-No.</b>	6827330
<b>System power supply</b>	24 VDC / 5 VDC
Field supply	24 VDC
Admissible range	18...30 VDC
Rated current from module bus	≤ 250 mA
Max. field supply current	10 A
Max. system supply current	0.4 A
Voltage supply connection	push-in clamps
<b>Fieldbus transmission rate</b>	10/100 Mbps
Fieldbus addressing	per DIP switch
Service interface	Mini USB
Fieldbus connection technology	RJ45 socket
<b>Operating temperature</b>	0 to +55 °C
Approvals	CE, cULus, Zone2, ClassI, Div.2

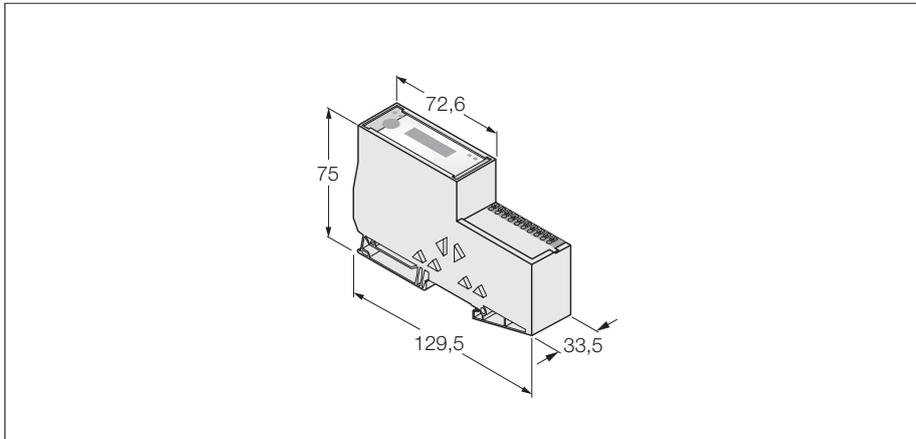

**Field supply/system supply**

# Gateway for BL20 I/O system

## High-feature interface for PROFINET IO (RT/IRT)

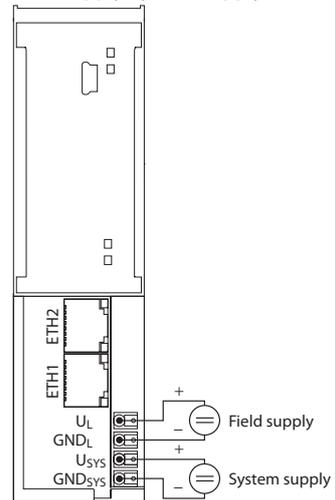

### BL20-E-GW-PN

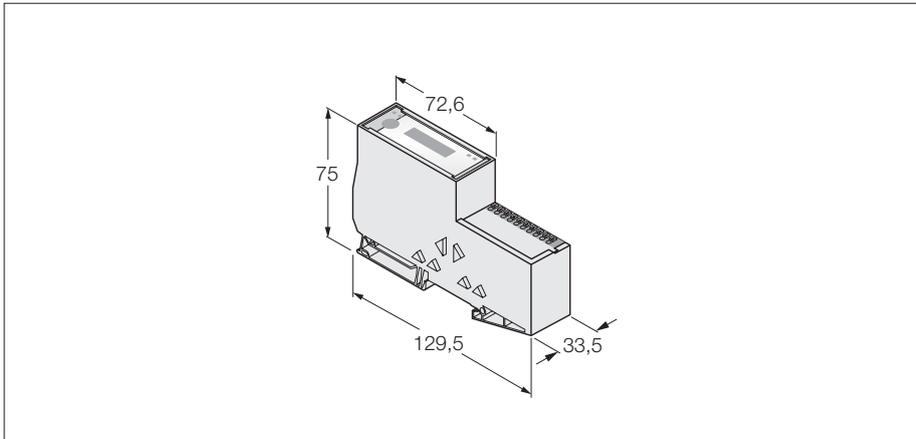

- Degree of protection IP20
- LEDs for display of supply voltage, common alarm and bus errors
- Interface between the BL20 system and PROFINET IO (IRT)
- Interface between BL20 system and PROFINET IO RT/IRT
- Supports topology recognition and LLDP
- Integrated switch 10/100 Mbps
- Two RJ45 males for fieldbus connection
- Push-in clamps for connection of power supply

<b>Type</b>	BL20-E-GW-PN
<b>Ident-No.</b>	6827377
<b>System power supply</b>	24 VDC
Admissible range	18...30 VDC
Rated current from module bus	≤ 200 mA
Max. system supply current	0.8 A
Max. load current $I_o$	10 A
Voltage supply connection	push-in clamps
<b>System data</b>	
Transmission rate	10/100 Mbps; Full/Half Duplex; Auto Negotiation; Auto Crossing
Connection technology Ethernet	2 × RJ45, female
Protocol detection/changeover	automatic
Service interface	Mini USB
Web server	in preparation
<b>PROFINET</b>	
Addressing	DCP
Conformance Class	C (IRT)
MinCycleTime	1 ms
Fast Startup	< 150 ms
Diagnostics	acc. to PROFINET Alarm Handling
Topology detection	supported
Automatic addressing	supported
Media Redundancy Protocol (MRP)	in preparation
Max. number of I/O modules	72
<b>Operating temperature</b>	0 to +55 °C

#### Field supply/system supply

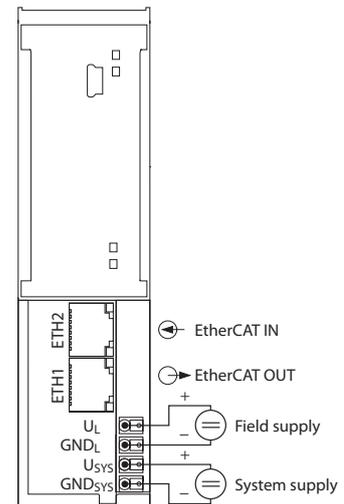

Gateway for BL20 I/O system  
Interface for EtherCAT  
BL20-E-GW-EC

- Degree of protection IP20
- LEDs for display of supply voltage, common alarm and bus errors
- Interface between the BL20 system and PROFINET IO (IRT)
- Interface between the BL20 system and EtherCAT
- Modular Device Profile (MDP) Support
- 10/100 Mbps, Auto MDIX
- Two RJ45 males for fieldbus connection
- Push-in clamps for connection of power supply

<b>Type</b>	BL20-E-GW-EC
<b>Ident-No.</b>	6827380
<b>System power supply</b>	24 VDC / 5 VDC
Admissible range	18...30 VDC
Rated current from module bus	≤ 200 mA
Max. system supply current	0.8 A
Max. load current I <sub>o</sub>	10 A
Voltage supply connection	push-in clamps
<b>System data</b>	
Transmission rate	10/100 Mbps; Full/Half Duplex; Auto Negotiation; Auto Crossing
Connection technology Ethernet	2 × RJ45, female
Protocol detection/changeover	automatic
Service interface	Mini USB
Web server	in preparation
<b>EtherCAT</b>	
Addressing	automatic
MinCycleTime	250 μs
Diagnostics	CoE Emergencies, DiagnosisHistory
CAN over EtherCAT	acc. to Modular Device Profile
Max. number of I/O modules	72
<b>Operating temperature</b>	0 to +55 °C

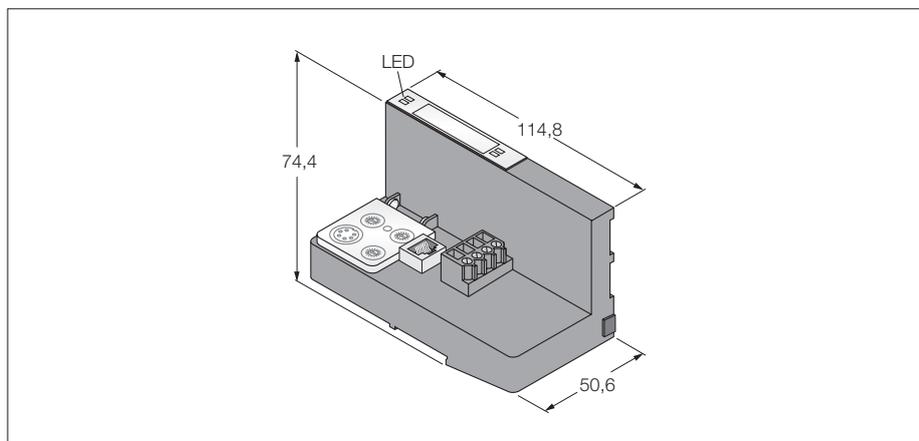

**Field supply/system supply**

# Programmable gateway for the BL20 I/O system

## Interface for MODBUS TCP incl. supply

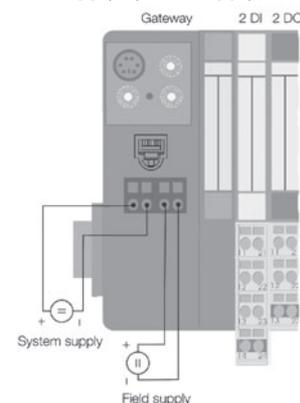

### BL20-PG-EN

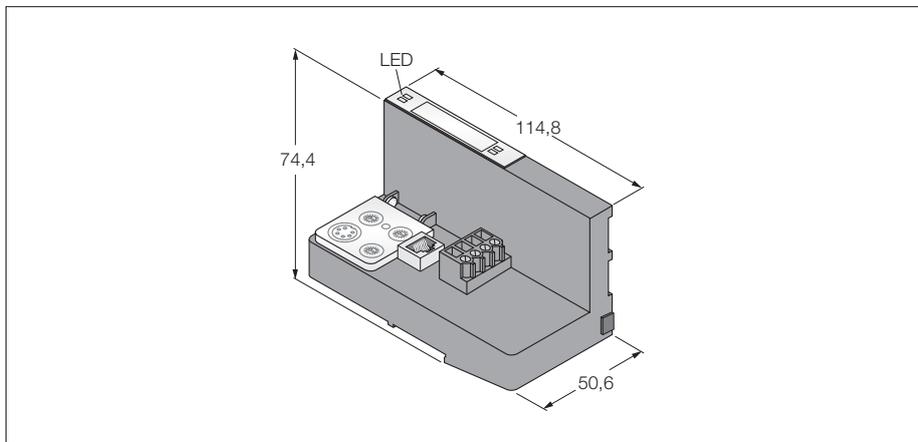

- Programmable acc.to IEC 61131-3 with CODESYS
- Ethernet and RS232 programmable interface
- 512 kByte program memory
- 32 Bit RISC processor
- < 1 ms for 1000 instructions
- 3 decimally coded rotary switches
- Degree of protection IP20
- With integrated supply
- LEDs for display of supply voltage, common alarm and bus errors
- Interface for MODBUS TCP
- 10/100 Mbps

<b>Type</b>	BL20-PG-EN
<b>Ident-No.</b>	6827249
<b>System power supply</b>	24 VDC
Admissible range	18...30 VDC
Rated current from module bus	≤ 500 mA
Max. field supply current	10 A
Max. system supply current	1.5 A
Voltage supply connection	screw connection
<b>Fieldbus transmission rate</b>	10/100 Mbps
Fieldbus addressing	rotary switch, BOOTP, DHCP, IO-ASSISTANT
Service interface	PS/2 socket for I/O-ASSISTANT
Fieldbus connection technology	RJ45 socket
Voltage supply connection	screw connection
<b>PLC data</b>	
Programming	CODESYS V2.3
Released for CODESYS version	V 2.3.6.4
Programming languages	IEC 61131-3 (IL, LD, FBD, SFC, ST)
Application tasks	1
Number of POU's	1024
Programming interface	RS232 interface, Ethernet
	RISC
	32 bit
Cycle time	< 1 ms for 1000 IL commands (without I/O cycle)
Program memory	512 kByte
Data memory	512 kByte
Input data	4 kByte
Output data	4 kByte
Non-volatile memory	16 kByte
<b>Operating temperature</b>	0 to +55 °C

#### Field supply/system supply

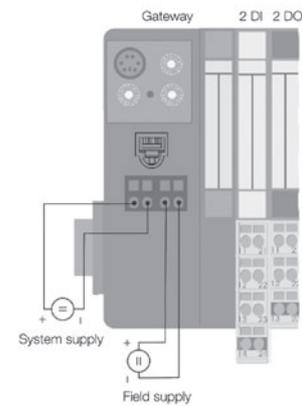

**Programmable gateway for the BL20 I/O system  
Interface for EtherNet/IP™ supply inclusive  
BL20-PG-EN-IP**

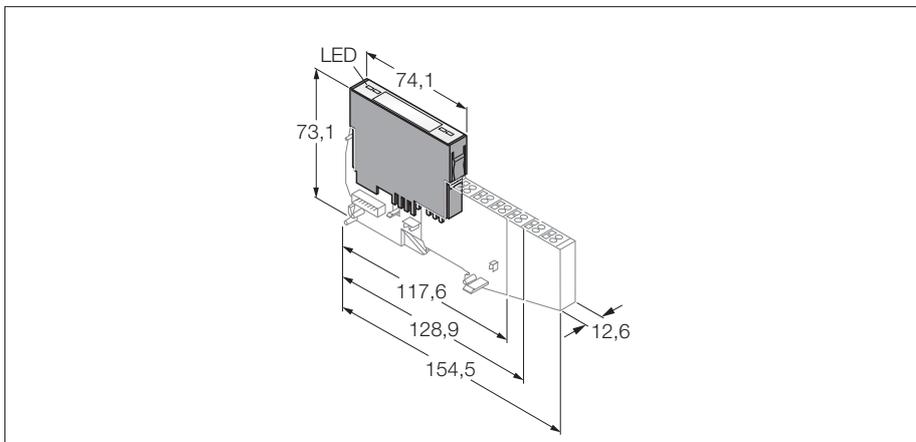

- Programmable acc.to IEC 61131-3 with CODESYS
- Ethernet and RS232 programmable interface
- 512 kByte program memory
- 32 Bit RISC processor
- < 1 ms for 1000 instructions
- 3 decimally coded rotary switches
- Degree of protection IP20
- With integrated supply
- LEDs for display of supply voltage, common alarm and bus errors
- Interface for EtherNet/IP™
- 10/100 Mbps

<b>Type</b>	BL20-PG-EN-IP
<b>Ident-No.</b>	6827248
<b>System power supply</b>	24 VDC
Admissible range	18...30 VDC
Rated current from module bus	≤ 500 mA
Max. field supply current	10 A
Max. system supply current	1.5 A
Voltage supply connection	screw connection
<b>Fieldbus transmission rate</b>	10/100 Mbps
Fieldbus addressing	rotary switch, BOOTP, DHCP, IO-ASSISTANT
Service interface	PS/2 socket for I/O-ASSISTANT
Fieldbus connection technology	RJ45 socket
Voltage supply connection	screw connection
<b>PLC data</b>	
Programming	CODESYS V2.3
Released for CODESYS version	V 2.3.6.4
Programming languages	IEC 61131-3 (IL, LD, FBD, SFC, ST)
Application tasks	1
Number of POU's	1024
Programming interface	RS232 interface, Ethernet
	RISC
	32 bit
Cycle time	< 1 ms for 1000 IL commands (without I/O cycle)
Program memory	512 kByte
Data memory	512 kByte
Input data	4 kByte
Output data	4 kByte
Non-volatile memory	16 kByte
<b>Operating temperature</b>	0 to +55 °C

**Field supply/system supply**

**BL20 electronic module**  
**Bus refreshing module with diagnostics**  
**BL20-BR-24VDC-D**

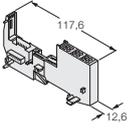

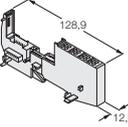

- Independent of the type of fieldbus and connection technology used
- Degree of protection IP20
- LEDs for display of system status, field supply and diagnostic information
- Can be used to form potential groups
- Power supply of the BL20 I/O module and the gateway with a nominal system voltage of 5 VDC via the internal module bus
- Field supply featuring a rated voltage of 24 VDC

<b>Type</b>	BL20-BR-24VDC-D
<b>Ident-No.</b>	6827006
<b>System power supply</b>	24 VDC / 5 VDC
Field supply	24 VDC
Admissible range	18...30 VDC
Max. field supply current	10 A
Max. system supply current	1.5 A
<b>Number of diagnostic bits</b>	4
<b>Operating temperature</b>	0 to +55 °C

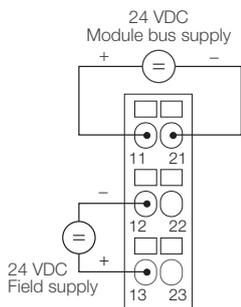

**BL20 electronic module**  
**Bus refreshing module with diagnostics**  
**BL20-BR-24VDC-D**

**Compatible base modules**

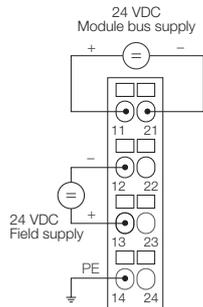

Dimensions	Type	Connection
	<b>6827036 BL20-P3T-SBB</b> Tension spring connection, with gateway supply	F186
	<b>6827037 BL20-P3S-SBB</b> Screw connection, with gateway supply Is placed on the right side of the gateway (for gateways without integrated power supply).	
	<b>6827040 BL20-P3T-SBB-B</b> Tension spring connection, without gateway supply	
	<b>6827041 BL20-P3S-SBB-B</b> Screw connection, without gateway supply Is applied to bigger BL20 systems in order to supply the module bus if required.	
Dimensions	Type	Connection
	<b>6827038 BL20-P4T-SBBC</b> Tension spring connection, C rail, with gateway supply	F187
	<b>6827039 BL20-P4S-SBBC</b> Screw connection, C rail, with gateway supply Is placed on the right side of the gateway (for gateways without integrated power supply).	
	<b>6827042 BL20-P4T-SBBC-B</b> Tension spring connection, C rail, without gateway supply	
	<b>6827043 BL20-P4S-SBBC-B</b> Screw connection, C rail, without gateway supply Is applied to bigger BL20 systems in order to supply the module bus if required.

- Electronics galvanically isolated from the field level via opto-couplers
- 2 analog inputs 0/4...20 mA

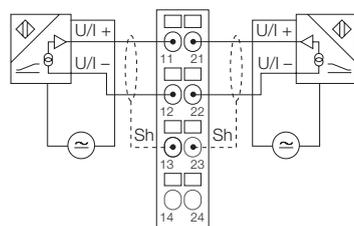

<b>Type</b>	BL20-2AI-I(0/4...20MA)
Ident-No.	6827021
<b>Number of channels</b>	2
Rated voltage from the supply terminal	24 VDC
Max. input current	50 mA
Rated current from field supply	≤ 12 mA
Rated current from module bus	≤ 35 mA
Power loss, typical	≤ 1 W
<b>Inputs</b>	
Input type	0/4...20 mA
Input resistance	< 0.125
Max. input current	50 mA
Electrical isolation	electronics for the field level
<b>Maximum limiting frequency, analog</b>	< 50 Hz
Basic fault limit at 23 °C	< 0.2 %
Repeatability	0.05 %
Temperature coefficient	< 300 ppm/°C of full scale
Resolution	16 Bit
Measuring principle	Delta Sigma
Measured-value display	16 bit signed integer 12 bit full range left justified
<b>Number of diagnostic bytes</b>	2
Number of parameter bytes	2
<b>Operating temperature</b>	0 to +55 °C

Compatible base modules

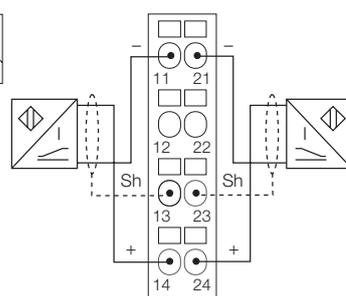

Dimensions	Type	Connection
	<b>6827044 BL20-S3T-SBB</b> Tension spring connection with external sensor supply	F210
	<b>6827045 BL20-S3S-SBB</b> Screw connection with external sensor supply

## BL20 electronic module

### 2 analog inputs

### BL20-2AIH-I

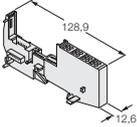

- Independent of the type of fieldbus and connection technology used
- Degree of protection IP20
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- 2 analog inputs 0/4...20 mA
- HART®

<b>Type</b>	BL20-2AIH-I
<b>Ident-No.</b>	6827331
<b>Number of channels</b>	2
Rated voltage from the supply terminal	24 VDC
Max. input current	24 mA
Rated current from field supply	≤ 20 mA
Rated current from module bus	≤ 30 mA
Power loss, typical	≤ 1 W
<b>Inputs</b>	
Input type	0/4...20 mA
Input resistance	> 250
Max. input current	24 mA
Electrical isolation	500 V electronics to field level, 500 V channel to channel
<b>Maximum limiting frequency, analog</b>	< 50 Hz
Basic fault limit at 23 °C	< 0.1 %
Repeatability	0.1 %
Temperature coefficient	< 150 ppm/°C of full scale
Resolution	16 Bit
Measuring principle	Delta Sigma
Measured-value display	16 bit signed integer ,NE43(PA), Extended
<b>Number of diagnostic bytes</b>	4
Number of parameter bytes	8
<b>Operating temperature</b>	0 to +55 °C

## BL20 electronic module

### 2 analog inputs for temperature measurement

#### BL20-2AI-THERMO-PI

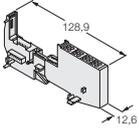

- Independent of the type of fieldbus and connection technology used
- Degree of protection IP20
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- 2 analog inputs for connection of thermoelements, types B, E, J, K, N, R, S and T
- Base module with internal cold junction point compensation

<b>Type</b>	BL20-2AI-THERMO-PI
<b>Ident-No.</b>	6827020
<b>Number of channels</b>	2
Rated voltage from the supply terminal	24 VDC
Rated current from field supply	≤ 30 mA
Rated current from module bus	≤ 45 mA
Power loss, typical	≤ 1 W
<b>Inputs</b>	
Input type	types B, E, J, K, N, R, S, T
Electrical isolation	electronics for the field level
<b>Voltage resolution</b>	+/-50mV: < 2μV
Basic fault limit at 23 °C	< 0.2 %
Repeatability	0.05 %
Temperature coefficient	< 300 ppm/°C of full scale
Resolution	16 Bit
Measured-value display	16 bit signed integer 12 bit full range left justified
Cycle time	≤ 60 ms
<b>Number of diagnostic bytes</b>	2
<b>Number of parameter bytes</b>	2
<b>Operating temperature</b>	0 to +55 °C

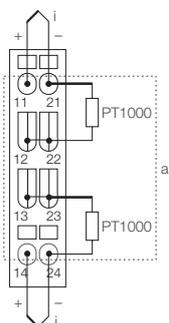

**BL20 electronic module**

## BL20 electronic module

### 4 analog inputs

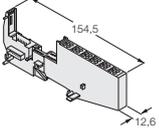

### BL20-4AI-U/I

- Independent of the type of fieldbus and connection technology used
- Degree of protection IP20
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- 4 analog inputs
- 0/4...20 mA or -10/0...+10 VDC
- Selectable per channel

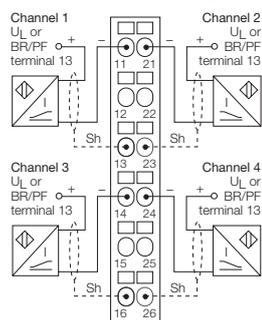

<b>Type</b>	BL20-4AI-U/I
<b>Ident-No.</b>	6827217
<b>Number of channels</b>	4
Rated voltage from the supply terminal	24 VDC
Max. input current	50 mA
Rated current from field supply	≤ 20 mA
Rated current from module bus	≤ 50 mA
Power loss, typical	≤ 1 W
<b>Inputs</b>	
Input type	0/4 ... 20 mA or -10/0 ... +10 VDC
Input resistance	< 62 Ω (current) or > 98.5 kΩ (voltage)
Max. input current	50 mA
Max. input voltage	35 V constant
Electrical isolation	electronics for the field level
<b>Maximum limiting frequency, analog</b>	< 20 Hz
Basic fault limit at 23 °C	< 0.3 %
Repeatability	0.05 %
Temperature coefficient	< 300 ppm/°C of full scale
Resolution	16 Bit
Measuring principle	Delta Sigma
<b>Number of diagnostic bytes</b>	4
Number of parameter bytes	4
<b>Operating temperature</b>	0 to +55 °C

Compatible base modules

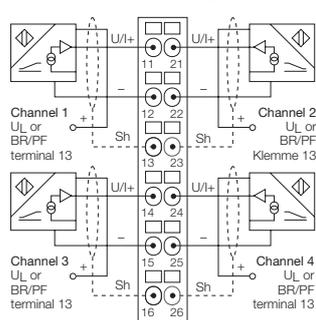

Dimensions	Type	Connection
	<b>6827064 BL20-S6T-SBCSBC</b> Tension spring connection	F216, F217, F218
	<b>6827066 BL20-S6S-SBCSBC</b> Screw connection	

Connection

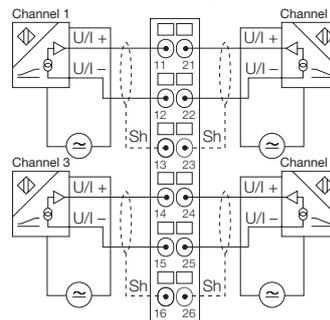

F216 - 2-wire technology

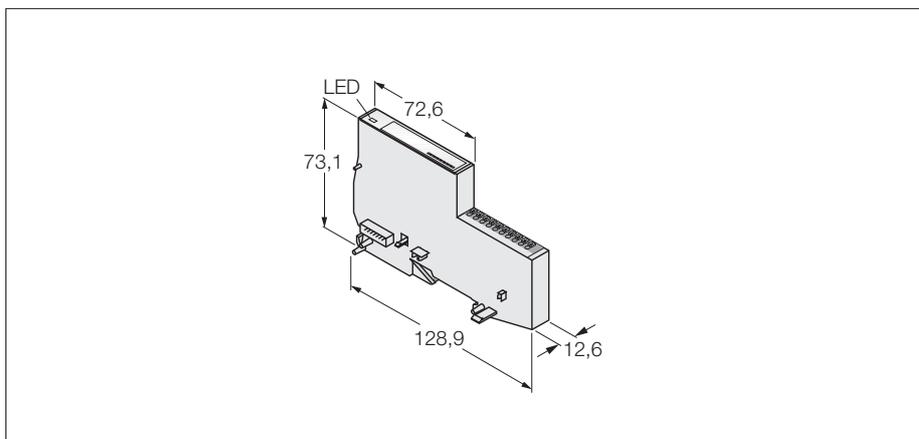

F217 - 3-wire technology

F218 - 4-wire technology

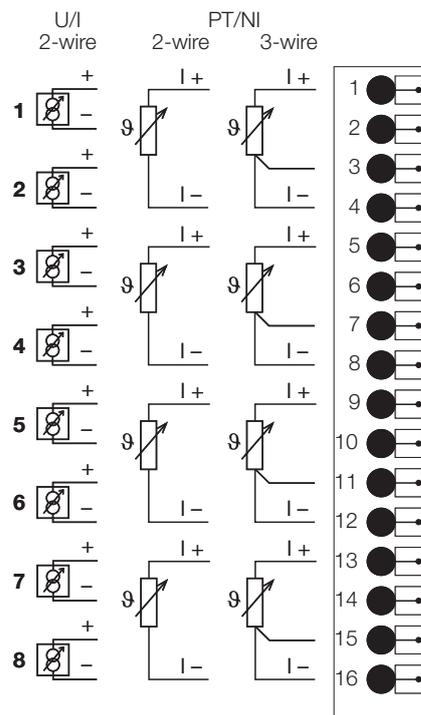

**BL20 electronic module**  
**8 2-wire analog inputs U/I resp.**  
**4 2/3-wire PT/Ni inputs**  
**BL20-E-8AI-U/I-4PT/Ni**

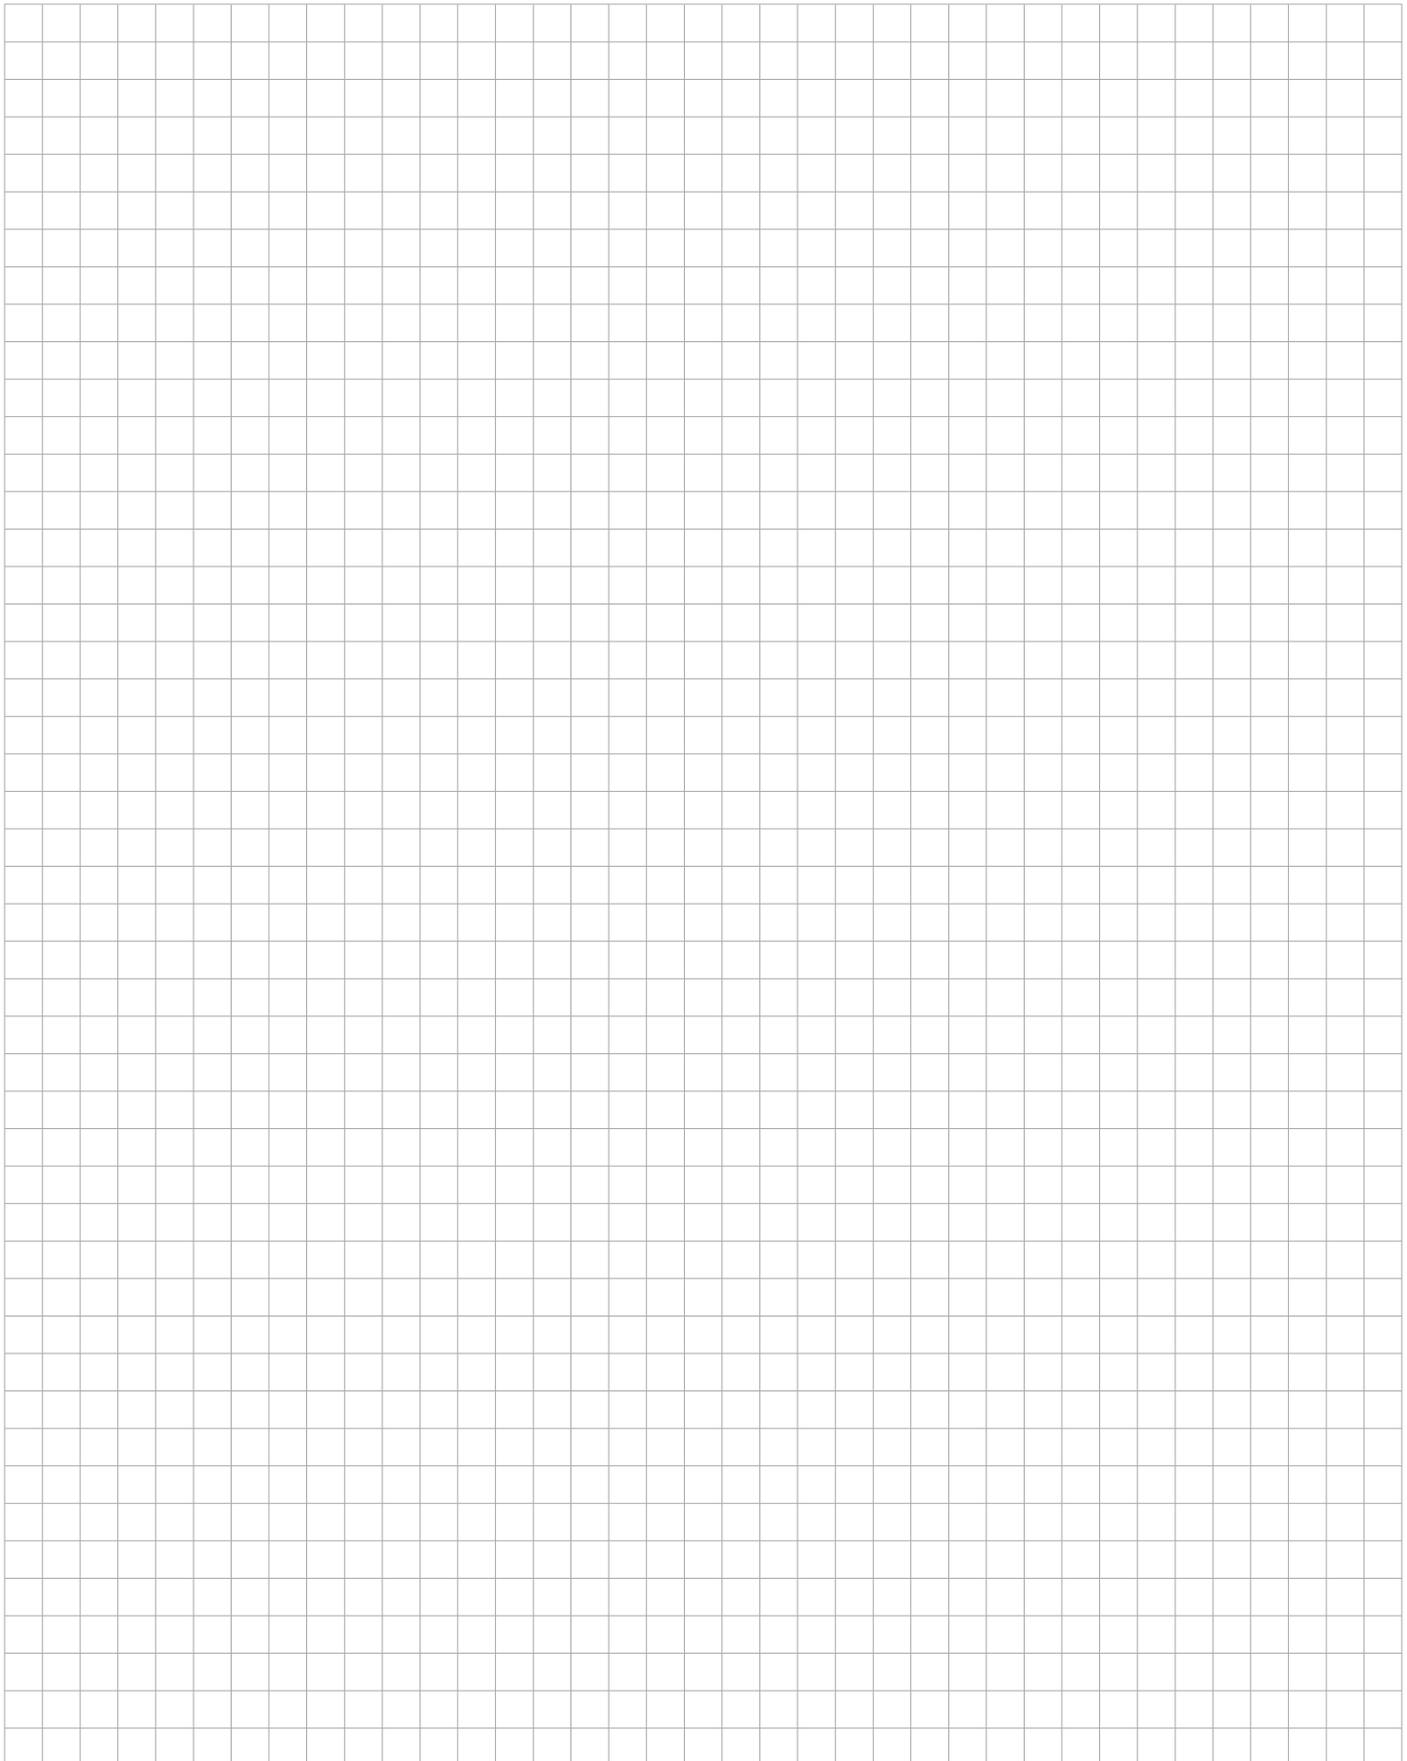

- Independent of the type of fieldbus and connection technology used
- Electronics and connection technology in a single housing
- Tension spring connection technology
- Degree of protection IP20
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- 8 2-wire analog inputs U/I
- Passive inputs – external power supply
- 0...20mA, 4...20mA, -10...+10VDC or 0...+10VDC, selectable per channel, resp.
- 4PT/Ni inputs (always 2 analog inputs are combined to a PT/Ni 2/3-wire input)

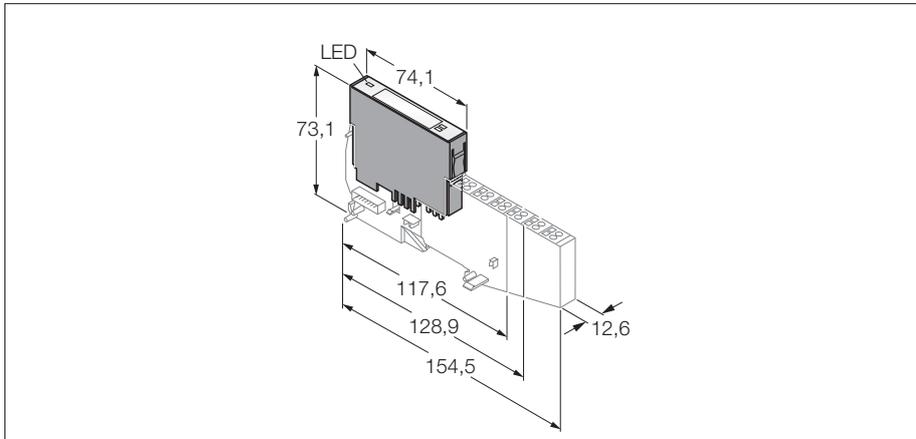

<b>Type</b>	BL20-E-8AI-U/I-4PT/Ni
<b>Ident-No.</b>	6827325
<b>Number of channels</b>	8/4
Rated voltage from the supply terminal	24 VDC
Rated current from field supply	≤ 35 mA
Rated current from module bus	≤ 35 mA
Power loss, typical	≤ 1 W
<b>Inputs</b>	
Input type	0/4...20 mA, -10/0...+10 VDC, PT100, PT200, PT500, PT1000, Ni100, Ni1000, 0...250 Ω, 0...400 Ω, 0...800 Ω, 0...2000 Ω, 0...4000 Ω
Input resistance	< 62 Ω (current) or > 98.5 kΩ (voltage)
Max. input current	50 mA
Max. input voltage	-20 VDC < U < 20 VDC (externally supplied)
<b>Basic fault limit at 23 °C</b>	< 0.2 %
Temperature coefficient	< 200 ppm/°C of full scale
Resolution	16 Bit
Measured-value display	16 bit signed integer
Conversion time	12 bit full range left justified < (44 × [number of channels being activated during parametrization]) ms
<b>Number of diagnostic bytes</b>	8
<b>Number of parameter bytes</b>	8
<b>Operating temperature</b>	0 to +55 °C

**Terminal connection**

**BL20 electronic module**  
**2 digital outputs**  
**BL20-2DO-24VDC-0.5A-N**

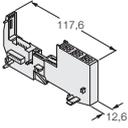

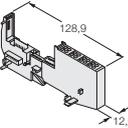

- Independent of the type of fieldbus and connection technology used
- Degree of protection IP20
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- 2 digital outputs, 24 VDC
- 0.5 A max.
- npn

<b>Type</b>	BL20-2DO-24VDC-0.5A-N
<b>Ident-No.</b>	6827025
<b>Number of channels</b>	2
Rated voltage from the supply terminal	24 VDC
Rated current from field supply	≤ 20 mA
Rated current from module bus	≤ 32 mA
Power loss, typical	≤ 1 W
<b>Outputs</b>	
Output type	npn
Output voltage	24 VDC
Output current per channel	0.5 A
Output delay	0.1 ms
Load type	resistive, inductive, lamp load
Load resistance, resistive	> 48 Ω
Load resistance, inductive	< 1.2 H
Lamp load	< 12 W
Switching frequency, resistive	< 100 Hz
Inductive switching frequency	< 2 Hz
Switching frequency, lamp load	< 10 Hz
Short-circuit protection	yes
Simultaneity factor	1
Electrical isolation	electronics for the field level
<b>Number of diagnostic bits</b>	2
<b>Operating temperature</b>	0 to +55 °C

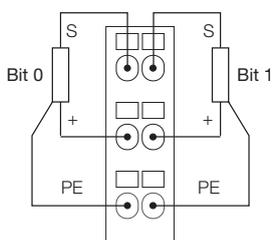

**BL20 electronic module**  
**2 digital outputs**

<b>Type</b>	BL20-E-8DO-24VDC-0.5A-P
<b>Ident-No.</b>	6827226
<b>Number of channels</b>	8
Rated voltage from the supply terminal	24 VDC
Admissible range	18...30 VDC
Rated current from field supply	≤ 3 mA
Rated current from module bus	≤ 15 mA
Power loss, typical	≤ 1.5 W
<b>Outputs</b>	
Output type	pnp
Output voltage	24 VDC
Output current per channel	0.5 A
Output delay	0.3 ms
Load type	resistive, inductive, lamp load
Load resistance, resistive	> 48 Ω
Lamp load	< 6 W
Switching frequency, resistive	< 100 Hz
Switching frequency, lamp load	< 10 Hz
Short-circuit protection	yes
Simultaneity factor	1
Electrical isolation	electronics for the field level
<b>Operating temperature</b>	0 to +55 °C

**Terminal connection**

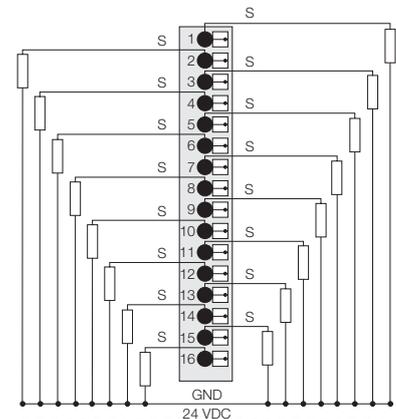

**BL20 Economy Module**  
**16 digital outputs**

## 4 analog outputs

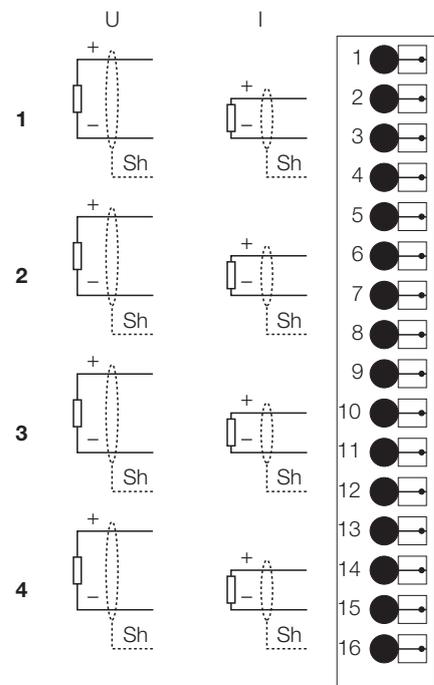

### BL20-E-4AO-U/I

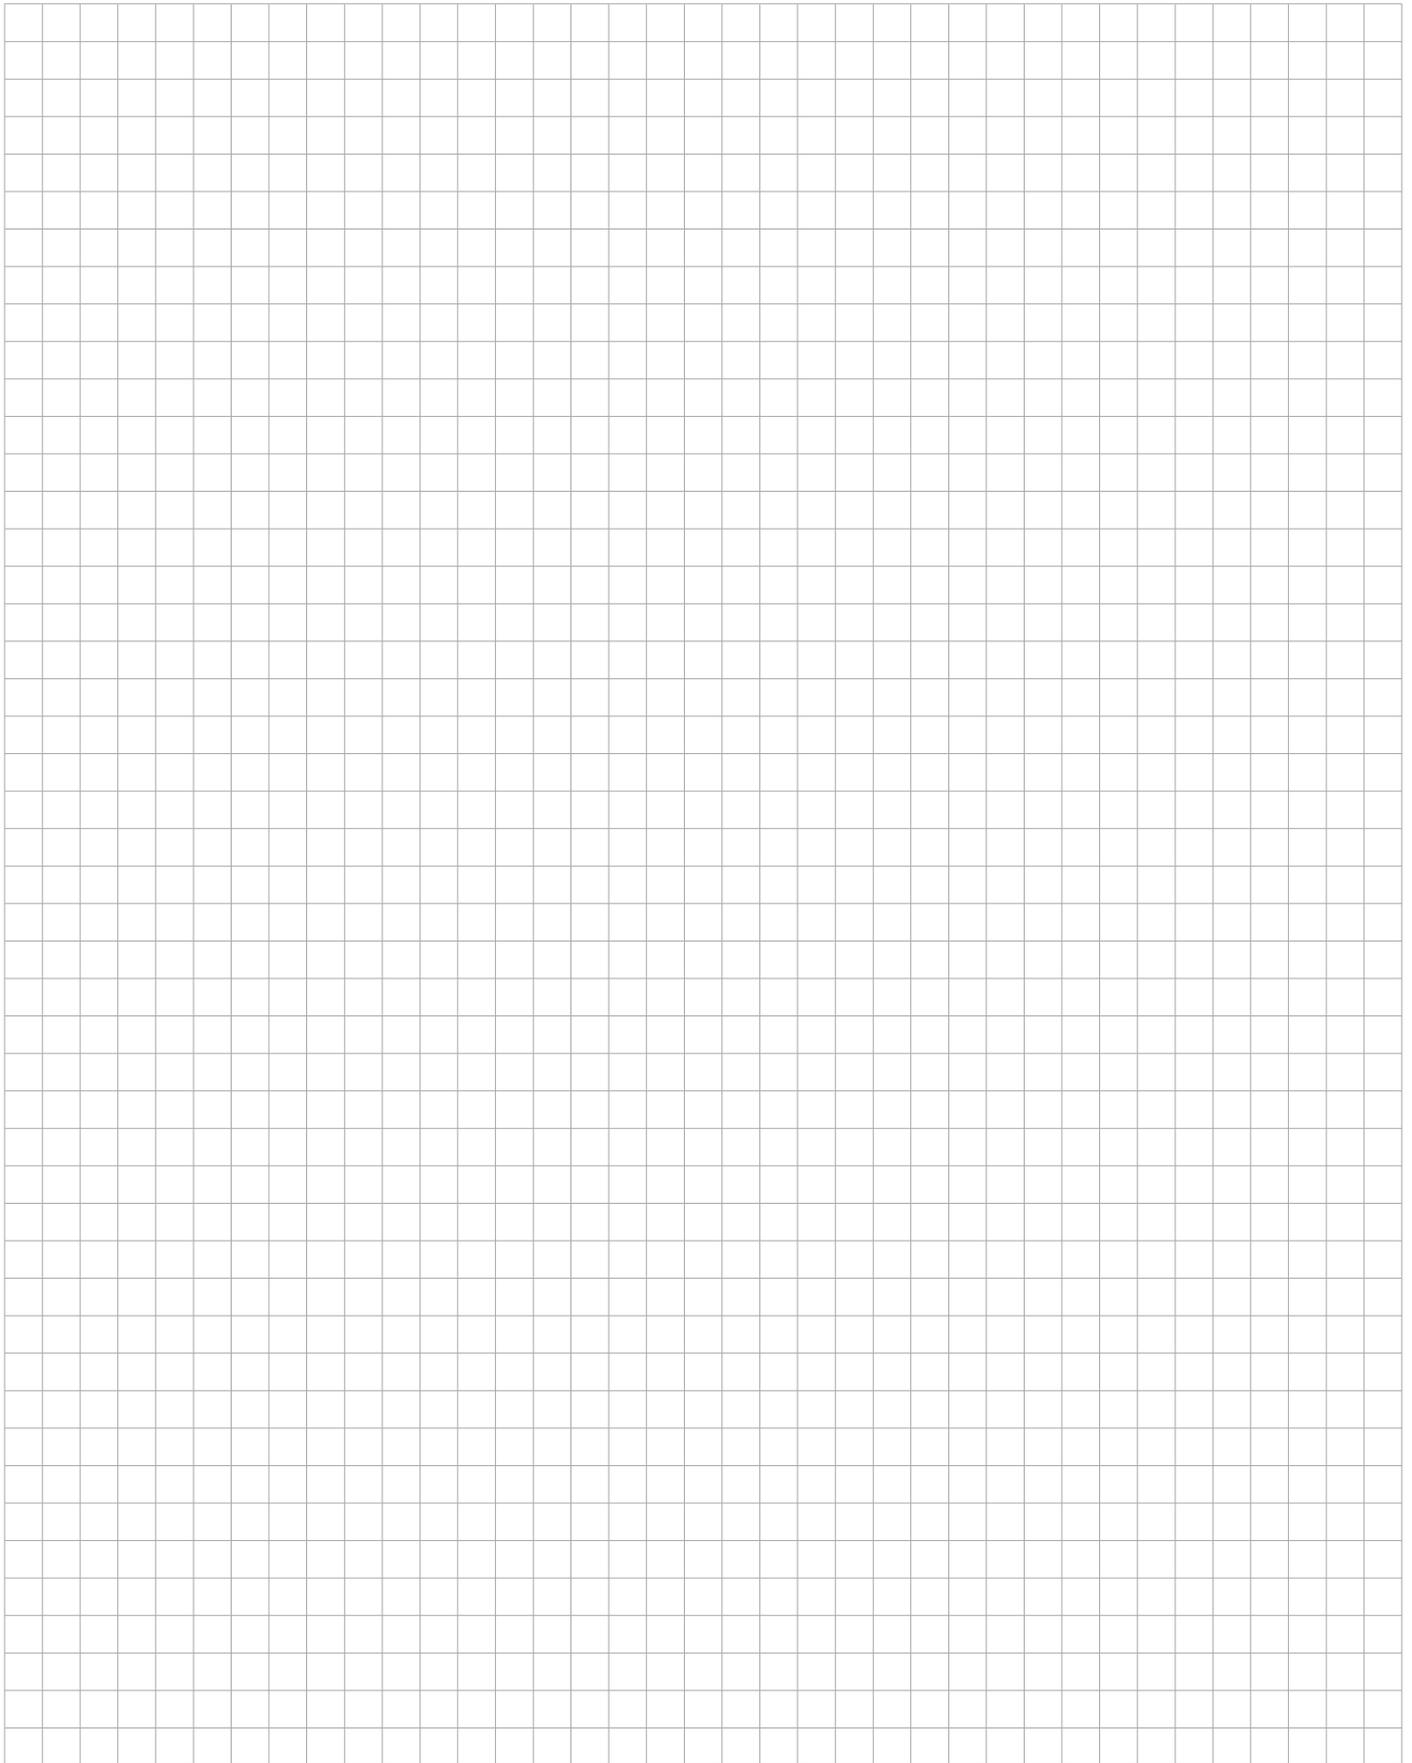

- Independent of the type of fieldbus used
- Electronics and connection technology in a single housing
- Tension spring connection technology
- Degree of protection IP20
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- 4 analog outputs
- 0...20 mA, 4...20 mA, -10...+10 VDC or 0...+10VDC,
- Selectable per channel

<b>Type</b>	BL20-E-4AO-U/I
<b>Ident-No.</b>	6827328
<b>Number of channels</b>	4
Rated voltage from the supply terminal	24 VDC
Rated current from field supply	≤ 130 mA
Rated current from module bus	≤ 50 mA
Power loss, typical	≤ 2.6 W
<b>Outputs</b>	
Output type	0...20 mA, 4...20 mA, -10...+10 VDC or 0...+10 VDC
Load resistance, resistive	< 0.45 (current) or > 1 (voltage) kΩ
Load resistance, inductive	< 0.01 (voltage) mH
Load resistance, capacitive	< 1 (current) μF
Electrical isolation	electronics for the field level
<b>Basic fault limit at 23 °C</b>	< 0.2 %
Measured-value display	16 bit signed integer
Temperature coefficient	< 300 ppm/°C of full scale
Resolution	16 Bit
Cycle time	≤ 50 ms

## RS232 interface

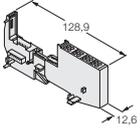

### BL20-1RS232

- Independent of the type of fieldbus and connection technology used
- Degree of protection IP20
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- Transmission of serial data via RS232 interface
- For connection of different devices, such as printers, scanners or bar code readers

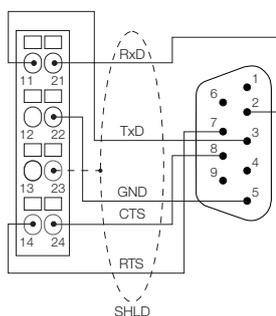

<b>Type</b>	BL20-1RS232
<b>Ident-No.</b>	6827169
<b>Number of channels</b>	1
Rated voltage from the supply terminal	24 VDC
Rated current from field supply	≤ 25 mA
Rated current from module bus	≤ 140 mA
Power loss, typical	≤ 1 W
<b>Inputs / Outputs</b>	
Transmission level active (U RS1)	-15 to -3 VDC
Transmission level inactive (URSO)	3 to 15 VDC
Common-mode range (UGL)	-7 to 12 VDC
Transmission signals	RxD, TxD, RTS, CTS
Data buffer received	128 Byte
Send data buffer	64 Byte
Connection type	full duplex
Transmission rate	300 to 115200 bps
Parameter	transmission rate, diagnostics, data bits, stop bits, XON - character, XOFF - character, parity, flow control
Cable length	15 m
Electrical isolation	isolation of electronics and field level via opto-couplers
<b>Number of diagnostic bytes</b>	1
Number of parameter bytes	4
<b>Operating temperature</b>	0 to +55 °C

Compatible base modules

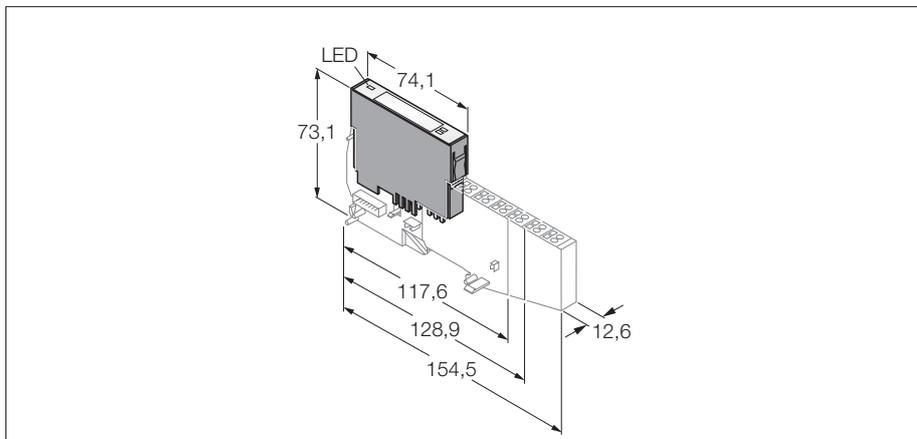

Dimensions	Type	Connection

# BL20 electronic module connection of SSI sensors BL20-1SSI

- Independent of the type of fieldbus and connection technology used
- Degree of protection IP20
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- Connection of SSI sensors
- Maximum bit transmission rate 1 Mbps

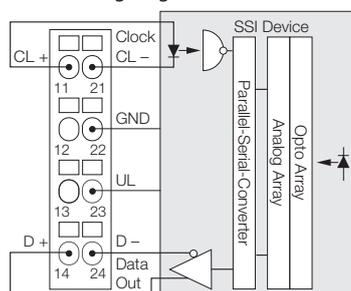

<b>Type</b>	BL20-1SSI
<b>Ident-No.</b>	6827166
<b>Number of channels</b>	1
Rated voltage from the supply terminal	24 VDC
Rated current from field supply	≤ 25 mA
Rated current from module bus	≤ 50 mA
Power loss, typical	≤ 1 W
<b>Inputs / Outputs</b>	
Transmission signals	CL, D
Connection type	4-wire full duplex (clock output/signal input)
Transmission rate	62.5 kbps up to 1 Mbps
Parameter	transmission rate, diagnostics, data format (binary / GRAY coded), data frame bits (1-32), number of invalid bits (LSB: 0-15, MSB 0-7)
Cable length	30 m
Electrical isolation	isolation of electronics and field level via opto-couplers
<b>Number of diagnostic bytes</b>	1
<b>Number of parameter bytes</b>	4
<b>Operating temperature</b>	0 to +55 °C

Compatible base modules

### Interface for connection of *BL ident*<sup>®</sup> write-read heads (HF/UHF)

#### BL20-2RFID-A

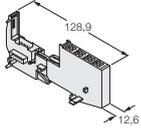

- This module is used together for example with the gateway BL20-GW-DPV1
- Degree of protection IP20
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- Connection of 2 *BL ident*<sup>®</sup> write-read heads
- Mixed operation of HF and UHF write-read heads
- transmission rate: 115.2 kbps
- Cable length: 50 m maximum

<b>Type</b>	BL20-2RFID-A
<b>Ident-No.</b>	6827233
<b>Number of channels</b>	2
Rated voltage from the supply terminal	24 VDC
Rated current from field supply	≤ 100 mA
Rated current from module bus	≤ 30 mA
Power loss, typical	≤ 1 W
<b>Inputs / Outputs</b>	
Transmission rate	115.2 kbps
Cable length	50 m
Electrical isolation	isolation of electronics and field level via opto-couplers
<b>Simultaneity factor</b>	1
<b>Sensor supply</b>	0.25 A per channel, short-circuit proof
<b>Number of diagnostic bytes</b>	4
Number of parameter bytes	8
Number of input bytes	4
Number of output bytes	4
<b>Operating temperature</b>	0 to +55 °C

**BL20 Economy Module**  
**SWIRE communication module**  
**BL20-E-1SWIRE**

- Independent of the type of fieldbus used
- Electronics and connection technology in a single housing
- Tension spring connection technology
- Degree of protection IP20
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- Supports the connection of a SWIRE branch.
- Maximum 16 nodes per SWIRE branch
- Maximum 3 SWIRE modules per BL20 station

<b>Type</b>	BL20-E-1SWIRE
<b>Ident-No.</b>	6827251
<b>Number of channels</b>	1 SWIRE branch
<b>Admissible range</b>	18...30 VDC
<b>Voltage supply for contactor</b>	24 VDC
<b>Voltage supply for contactor</b>	3 A
<b>Rated current from module bus</b>	≤ 60 mA
<b>Electrical isolation</b>	isolation of electronics and field level via opto-couplers
<b>Number of diagnostic bytes</b>	8
<b>Number of parameter bytes</b>	24
<b>Operating temperature</b>	0 to +55 °C

**Terminal connection**

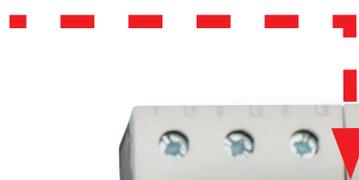

# BL20 motor starter – Save switching and protection of motors

## Direct and reversing starters up to 15 kW

The motor starters consequently build upon the advantages of the BL20 system:

- Modular
- Flexible
- Simple mounting and operation
- Cost-efficient

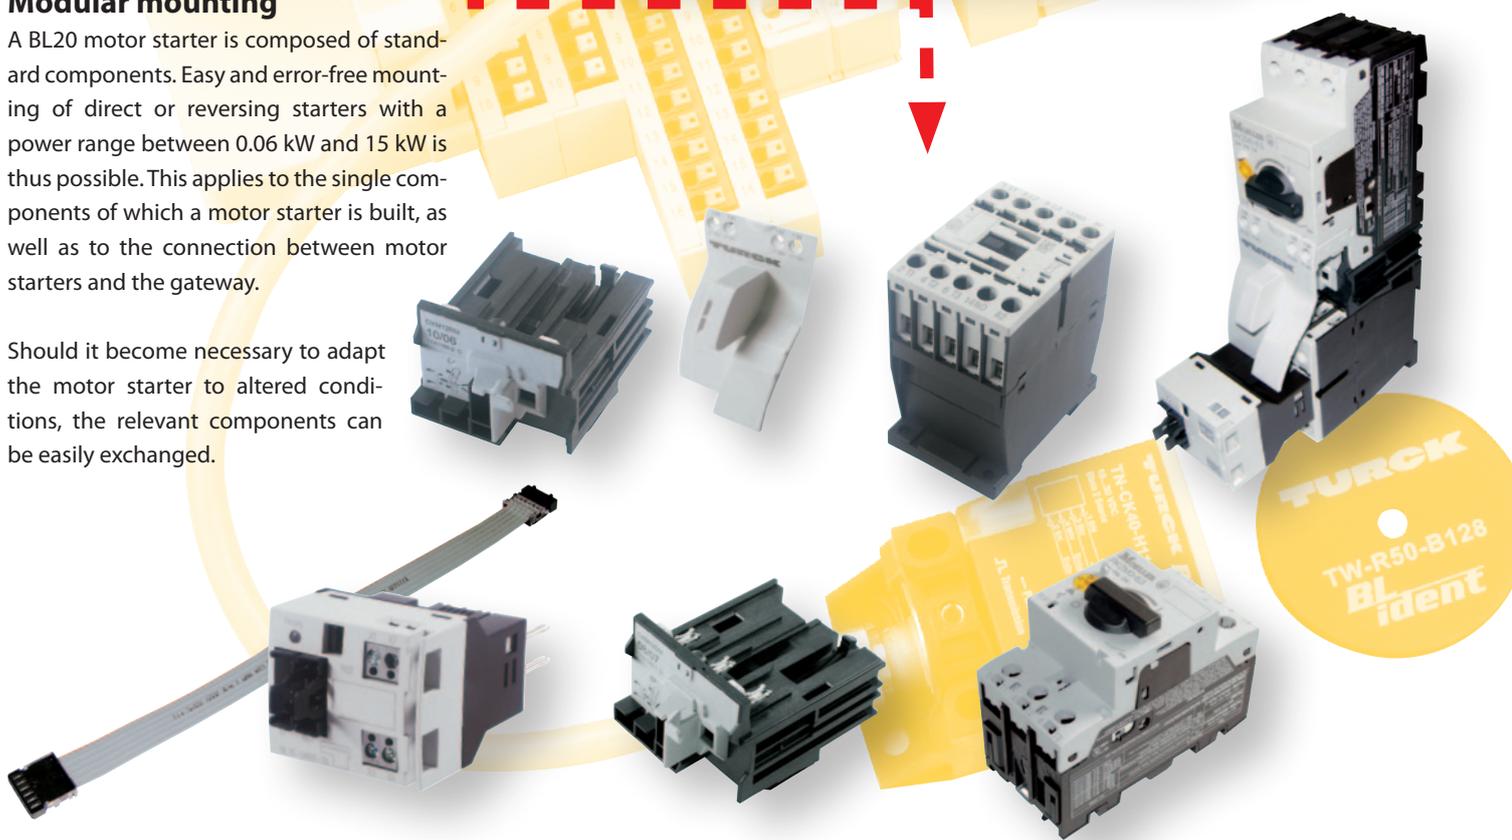

BL20 direct and reversing motor starters fulfil the requirements of the IEC/EN 60947-4-1 norm for industrial switching devices.

## Modular mounting

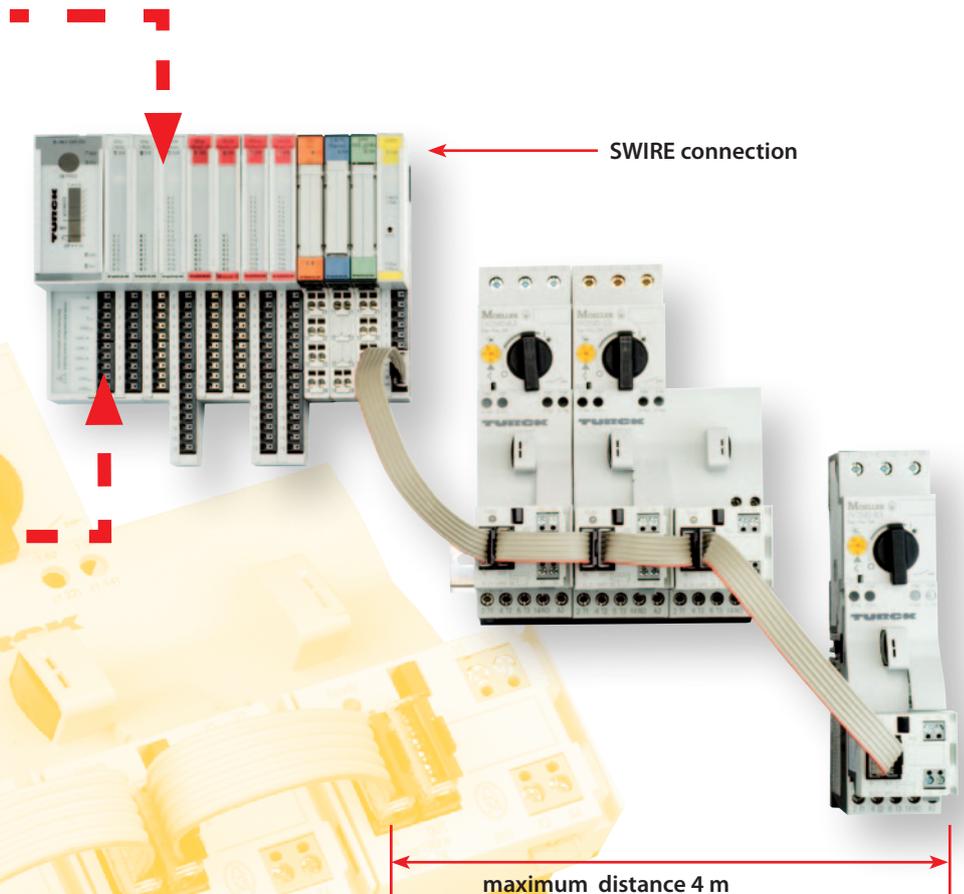

A BL20 motor starter is composed of standard components. Easy and error-free mounting of direct or reversing starters with a power range between 0.06 kW and 15 kW is thus possible. This applies to the single components of which a motor starter is built, as well as to the connection between motor starters and the gateway.

Should it become necessary to adapt the motor starter to altered conditions, the relevant components can be easily exchanged.

**Compact system solution**

The SWIRE connection module allows a maximum of 4 m between the module and the last motor starter. This allows an exceptionally flexible layout of the motor starters in the control cabinet and thus compact solutions.

**Communication**

Due to digital communications between the motor starters and the BL20, various diagnostics are available to the host system. This is realised without the need for extra I/Os.

This means:

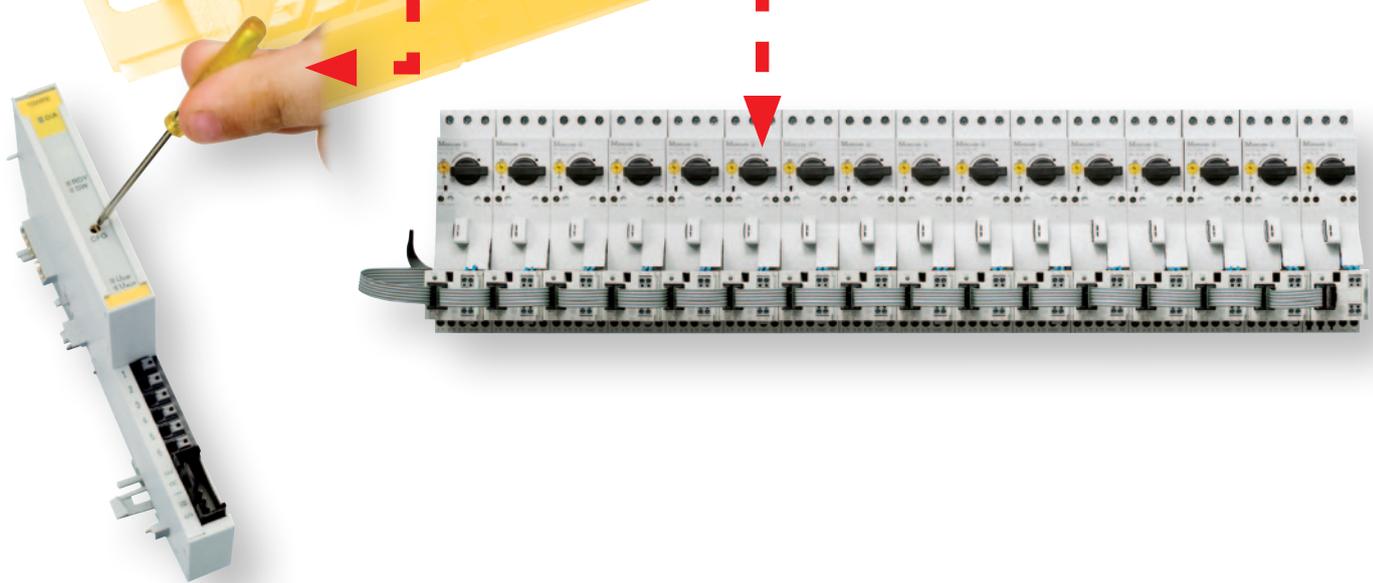

- Reduction of commissioning times
- Quick trouble shooting
- Lower costs

**Configuration**

The integration of motor starters in the BL20 system is very easy: All connected motor starters are configured in the BL20 system by a simple tap on a pushbutton.

**Maximum system expansion**

Up to 16 motor starters per SWIRE module, up to 3 SWIRE branches per BL20-system = up to 48 motor starters per fieldbus interface!

## Electrical interlock wiring for reversing starters

Power contactors with a N. C. output are obligatory for the electrical interlock of reversing starters. The wiring is implemented by the user as shown on the left. All other necessary connections are implemented with pluggable bridges which are included in the wiring sets.

# BL20 motor starter – Accessories

Figure	Description	Type	Ident-no.
	Three-phase current rail, insulated, $U_e = 690\text{ V}$ , $I_U = 63\text{ A}$ , extension enabled by rotated mounting, length 90 mm	B3.0/2-PKZ0	6827099
	Three-phase current rail, insulated, $U_e = 690\text{ V}$ , $I_U = 63\text{ A}$ , extension enabled by rotated mounting, length 180 mm	B3.0/4-PKZ1	6827098
	Input terminal for three-phase current rail, insulated, $U_e = 690\text{ V}$ , $I_U = 63\text{ A}$ ,	BK25/3-PKZ0	6827134
	No-load connection cover for non-assigned con- nections at three-phase current rails 20 pcs/ package	H-B3-PKZ0(20pcs)	6827544
	SWIRE power module. For power supply of SWIRE branches. Is applied when groups of motor starters have to be disconnected. Max. 4 Power modules per SWIRE branch.	BL20-SWIRE-PF	6827288
	Terminating connector for SWIRE-branches, no electrical function 25 pcs / package	BL20-SWIRE-CAB-000 (25pcs)	6827292

# JIT – Just in Time

Ideally the length of the cord set is adjusted according to the requirements of the plant. For this reason TURCK now offers a Just-In-Time-delivery service (JIT) for premoulded cables.

## The new JIT-5D-Programme for perfect connections:

- Just-In-Time delivery within 5 days only\*
- Free choice of cable length
- Premoulded fieldbus and power cables
- High flexibility with respect to planning and mounting of your application
- High cost savings

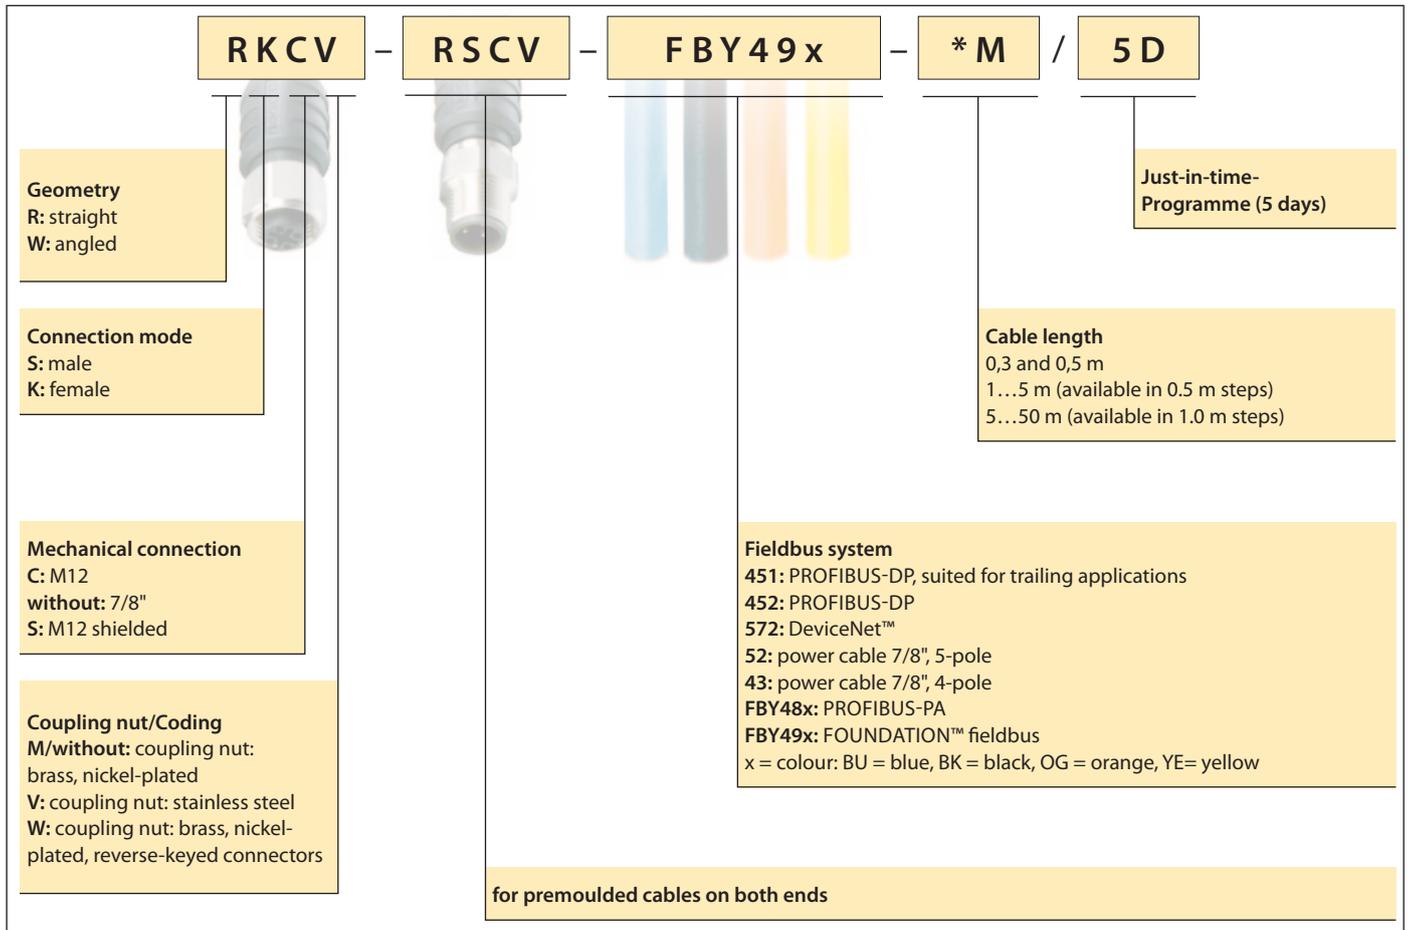

\* valid for deliveries within the European Union (EU)

# JIT – product range
